Educational Statistics.

I.—Elementary.

Statutes require parents in *England and Wales* to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age, in *Scotland*, to provide efficient education up to 15 years, in *Ireland*, to cause their children to attend school from 6 to 14 years

In *England and Wales* (1926) there were 20,727 public elementary schools with accommodation for 7,050,024 pupils and average attendance of 4,956,585; in addition, there were 124 special schools for blind and deaf children, with accommodation for 8,846, and 432 for defective and epileptic children, with accommodation for 36,425. There were (1926) 31,614 certificated college-trained men teachers and 60,050 women, 5,792 certificated non college-trained men teachers and 21,835 women, and 2,158 uncertificated men and 31,644 uncertificated women

In *Scotland* (1926) there were 2,896 primary schools with accommodation for 867,589, and average attendance of 585,678. There were (1926) 3,676 certificated men teachers and 14,696 women teachers, 4 provisionally certificated and assistant men, and 50 women.

Elementary school education includes teaching in practical matters—needlework, drawing, gardening, handicrafts, cookery, &c.—and the sections upon health, medical attendance, physical training, evening play centres, home study, future employment, &c., show that the schools are valuable agencies in child-welfare generally.

II.—Education beyond Elementary.

Secondary

The aims, methods, and instructions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute, undifferentiated 4-year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial, commercial, &c., employments.

In *England and Wales* (1926) the number of Secondary schools recognised for grant was 1,301, with 9,721 full time men and 9,919 full time women teachers. The Authorities aim at securing graduate teachers as far as possible. The full time pupils numbered 46,225 boys and 44,541 girls under 12; 129,913 boys and 109,354 girls between 12 and 16; 18,153 boys and 19,378 girls over 16—a total of 194,291 boys and 173,273 girls. Of these about one-fourth come up from elementary schools with "free places," others with scholarships. Nine-tenths of these schools receive State grants, and nearly one-third are controlled by Local Authorities. Fees are charged to most of the pupils. Of these "efficient" schools about 40 per cent. receive boarders (about 27,000) in varying proportions and drawn in many cases from distant areas Most of them are endowed or under trusts, and their trust incomes and property form a considerable asset in secondary school finance. The system in *Wales* is much the same as in England, though the schools are under earlier statutory provisions, and are called "Intermediate" in many cases. In Wales there is a Central Welsh Board.

In *Scotland* there are Preparatory and Secondary Departments under the same Commissioners and Local Authorities as the Elementary schools. In 1926 there were 209 Preparatory Departments with 76,136 children on the Register and average attendances of 66,015, and 249 Secondary Departments with 74,279 children on the Register and average attendances of 71,676. The Authorities aim at securing honours graduates as far as possible, and all teachers are certificated.

Technical.

Technical Education in England and Wales is provided in Evening and similar schools and in Day Technical Classes and Technical Institution Courses (mostly controlled by Local Authorities). State grants are paid on the number of students of whom about one-half are under 17 years of age The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses, Tutorial Classes, and also Schools of Art, Branch Schools of Art, and Art Classes. In Scotland Technical Education is provided in like manner.

Training.

Training is provided by the State for Elementary School Teachers, of whom 50 per cent. have been trained in Colleges having nearly 13,000 places. Slight progress has been made lately towards providing for the Training of Teachers for Secondary Schools, a small annual State grant being made for the purpose; in *Scotland* all candidates for employment as teachers must undertake a course of training of at least one year in teaching.

Universities.

Many of these institutions now receive annual State grants, mainly in the form of "block" grants paid by the Treasury on the advice of the University Grants Committee. Substantial grants are also received from local Education Authorities in England and Wales. State grants to Irish Institutions were transferred from the Treasury to the Irish Governments as from April, 1922.

In 1924-5 the Professors and Undergraduates were approximately as under:—

Universities.	Professors, &c.	Under graduates.
England (10)	3,074	31,250
Wales (1)	362	2,750

Headmasters' Conference Schools.

THE HEADMASTERS' CONFERENCE (*Secy.*, W A Bulkeley-Evans, C B E., M A., 5 Paper Buildings, Temple, E C 4.).—The Headmasters' Conference was founded in 1869 and incorporated in 1909 The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge In considering what Schools shall be included in the List, or removed from it, the Committee will have regard to the Governing Scheme or other Instrument under which the School is administered, and if the School is maintained or aided by a Local Education Authority (*a*) how the Governing Body is constituted, (*b*) to what extent by right or in practice the Governing Body acts independently of the Local Education Authority in directing general policy or administering disposable funds, to the numbers in the School and, in the case of Schools in Great Britain and Ireland, the number of resident Undergraduates of Oxford and Cambridge educated at the School. The Committee may also take into account the proportion of boys in the School, who, having passed the School Certificate or other equivalent Examination, are continuing their studies beyond that stage The annual meetings are, as a rule, held in December, alternately (*a*) at some school represented on the Conference, (*b*) at London or some University town

NOTES.—(*a*) "Annual Fees" represent the average amount payable annually, *exclusive* of fees for optional subjects

(*b*) "Headmaster" In certain Schools other titles prevail, *e.g.*, Beaumont, "Rector", Belfast Academical, "Principal", Dulwich, "Master"; Edinburgh Academy, "Rector", Glenalmond, "Warden"; Haileybury, "Master", King William's, I of Man, "Principal"; Liverpool College, "Principal", Magdalen Coll Sch, "Master"; Manchester Gr., "High Master", Marlborough, "Master", Radley, "Warden"; St Columba, Dublin, "Warden"; St. Edward's, Oxford, "Warden"; St. Paul's, "High Master"; Stonyhurst, "Rector"; Victoria College, Jersey, "Principal", Wellington, "Master"

THE HEADMASTERS' CONFERENCE (*see* p. 338)

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 29 Gordon Square, W.C. 1. (*President* (1927), R. F. Cholmeley, C.B.E., M.A. *Joint Hon Secs*, W. Jenkyn Thomas, M.A., F.R. Hutchinson-Jones, M.A.; *Asst. Sec*, H. Marshall) — The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND (*Secy*, J. Thompson, M.A., The High School, Dublin) is similar to the I.A.H.M.

ASSOC. OF ASSISTANT MASTERS IN SECONDARY SCHOOLS, 29 Gordon Sq., W.C. 1. *Sec*, G. D. Dunkerley, B.Sc.

GIRLS.

ASSOCIATION OF HEAD MISTRESSES. — Head mistresses of Public Secondary Schools with at least 50 pupils are eligible for membership. Members are marked § in the preceding lists. A Conference is held annually in June. *President*, Miss Lowe, M.A., Leeds Girls' High School, *Secretary*, Miss R. Young, 29 Gordon Square, W.C. 1.

THE SALVATION ARMY

THE SALVATION ARMY was founded by General William Booth (*b.* 1829, *d.* 1912). In Dec., 1926, the number of *Officers*, *Cadets* and *Employes* was 31,843, of *Corps* and *Outposts*, 15,146, *Local Officers*, 100,020. The number of countries occupied was 82, and of languages used 57. Connected with the Salvation Army are numerous philanthropic institutions, including 333 Industrial Homes, 65 Maternity Homes and 106 Children's Homes, 175 Slum Posts, 14 Prison-Gate Homes, 344 Shelters and Cheap Food Depots for the Homeless, 161 Labour Bureaux, 11 Farms, &c., 1,144 Industrial and Day Schools. The total raised in the British Isles during "Self-Denial Week" in 1927 amounted to £188,566. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 101 Queen Victoria Street, E.C. 4.—GENERAL, Bramwell Booth (1912), Queen Victoria Street, London, E.C. 4.

THE BROTHERHOOD

THE BROTHERHOOD MOVEMENT, "to lead men and women into the Kingdom of God, to unite in Brotherhood of mutual help, to win the masses of the people to Jesus Christ, and to encourage the study of social service," may be said to have been founded in 1875 as the outcome of the *Pleasant Sunday Afternoon* movement initiated by John Blackham of West Bromwich. The movement is non-political and unsectarian, and connected with it are other societies—Sisterhoods, P.S.A., Bible Classes, etc. *President*, Eben Goold, M.A., B.Mus., *General Secretary*, Rev. J. W. Tuffley; *Headquarters*, 37 Norfolk Street, Strand, W.C. 2.

THE BOY'S BRIGADE. (Incorporated.)

(with which is united The Boys' Life Brigade)

The senior boys' organisation, founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of discipline and religious training. Every Company is connected with a Church or other Christian body. The total strength is 100,000 officers and boys, with 30,000 juniors in the Life Brigade — Abbey House, Westminster, S.W. 1.

CHURCH LADS' BRIGADE

An organisation especially valuable for helping a parish to keep the elder lads to their religious duties, was founded in 1891, and combines a military method with moral and religious instruction. It is estimated that 1,000,000 lads have had the advantage of the Brigade's training, and to-day there are 1,283 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C. 2. *Chaplain-General and Secretary*, Rev. Edgar Rogers, O.B.E., M.A.

BOY SCOUTS. (Incorporated)

A Movement initiated and organised by Sir Robert Baden-Powell, Bt., G.C.M.G., K.C.B., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance, inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

The Movement (whose membership approximates 2,000,000) has taken root in all parts of the British Empire, and nearly every other country has adopted it.—*Imperial Headquarters*, 25 Buckingham Palace Road, S.W. 1.

THE GIRL GUIDE ASSOCIATION.

A movement founded by Sir Robert Baden-Powell, Chief Scout, in the year 1910, on the lines of the Boy Scouts and incorporated by Charter in 1915, while in the year 1923 H.M. the King granted the Movement a Royal Charter. Its aim is to develop good citizenship amongst girls by forming their character, training them in habits of observation, obedience, and self-reliance, inculcating loyalty and thoughtfulness for others, and teaching them services useful to the public and handicrafts useful to themselves. It also seeks to promote their physical development, making them capable of keeping good homes and of bringing up good children. Its desire is to co-operate with educational and other bodies working to this end. The membership of the Movement now numbers over 672,500 all over the world, that of the British Isles alone being over 403,000. *Imperial Headquarters*, 25 Buckingham Palace Road, London, S.W. 1.

GIRLS' LIFE BRIGADE (Inc.).

An organisation founded by the National Sunday School Union in 1902, with the supreme purpose of keeping girls in close touch with the Church and Sunday School, and of training them for useful and noble Christian womanhood. Its four-fold programme covers every phase of a girl's life. Spiritual, Physical, Educational and Social. This interdenominational-temperance Movement has an international membership which is rapidly increasing.—*Headquarters*, 56 Old Bailey, London, E.C. 4.

CONSUMPTION AND CHEST DISEASES.

The number of deaths from tuberculosis in the United Kingdom and the rate per 100,000 of the population for each year since 1915 were as follows :—

Year	Deaths.	Rate per 100,000
1915	54,295	151·5
1916	53,858	152·9
1917	55,934	162·4
1918	58,073	169·4
1919	46,322	135·8
1920	42,545	122·8

The fall in the rate of 56·6 per 100,000 between 1918 and 1920 is attributable partly to the cessation of the War and consequent better living conditions, and partly to the valuable work done by Local Government Authorities. The increase of facilities for the treatment since 1912 is as follows :—

Year.	No. of beds in public institutions	Dispensaries.
1912	1,500	8
1918	6,749	375
1921	9,879	470

At the same time the beds in voluntary institutions increased from 2,800 in 1912 to 7,568 in 1921, a total increase of beds from 4,300 in 1912 to 17,447 in 1921

GENERAL REGULATIONS

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*, if not otherwise expressed, the fare to be paid according to distance ; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time ; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour, if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40*s*.

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing cab number, name and address of Proprietor, &c

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40*s*., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation ; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare ; or, fraudulently endeavours to avoid payment of a fare ; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40*s*.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner ; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, 109, Lambeth Road, S.E. 1 ; but inquiries as to property left in a cab or stage carriage should be

made at the **Lost Property Office**, 109, Lambeth Road, S.E. 1. Office hours, 10 to 4 (Saturdays, 10 to 1). The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays.

LAMPS TO BE LIGHTED.

By the Road Transport Lighting Act, 1927 (17 and 18 Geo. 5, ch. 37) "every vehicle on any road shall during the hours of darkness carry—

(*a*) two lamps, each showing to the front a white light visible from a reasonable distance,

(*b*) one lamp showing to the rear a red light visible from a reasonable distance,

and every such lamp shall, while the vehicle is on any road during such hours as aforesaid, be kept properly trimmed, lighted and in efficient condition, and shall be attached to the vehicle in such position and manner as the Minister (of Transport) may by regulations prescribe.

It shall be the duty of any person who causes or permits a vehicle to be on any road during the hours of darkness to provide the vehicle with lamps in accordance with the requirements of this Act and of any regulations made thereunder" (Sec. 1 (1)).

(Regulations have been made and are contained in S.R. & O. No. 286 of 1928.)

Whole or partial exemption may be given to vehicles used for naval, military or air force purposes (Sec. 1 (3) (*b*)), vehicles carrying inflammable or explosive goods of a nature specified in the regulations, vehicles when standing on places specially set aside for the purpose, vehicles drawn or propelled by hand, save as provided (Sec. 1 (2)).

The Minister may by regulation require or permit, on conditions, distinctive lamps to be carried displaying coloured lights on vehicles used as Hackney Carriages or public service vehicles or vehicles used for naval, military, or air force, or police purposes, or as ambulances.

The "hours of darkness" are defined thus:—

(*a*) As respects the period of summer time, the time between one hour after sunset and one hour before sunrise.

(*b*) As respects the remainder of the year the time between half an hour after sunset and half an hour before sunrise.

Bicycles (pedal and mechanical solo), pedal tricycles, and invalid carriages, require a single white light to the front.

Pedal bicycles and tricycles need not show a red light to the rear if they have attached an unobscured and efficient red reflector.

Pedal bicycles and tricycles and solo motor cycles need not carry a lamp if being wheeled by a person on foot as near as possible to the near or left hand edge of the carriage way.

Horse vehicles.—A separate lamp showing a red light to the rear shall not be required to be carried if the lamps showing a light to the front also show a red light to the rear visible from a reasonable distance and no part of the vehicle or load extends more than 6 feet behind such lamps.

Any vehicle carrying a load overhanging laterally more than 12 inches from the centre of the nearest side lamp must have either an additional lamp on the sides where the load overhangs or the position of the one lamp must be such that no part of the load projects outwards more than 12 inches beyond a vertical line drawn through the centre of the substituted or additional lamp.

On any vehicle carrying a load more than 6 feet behind any lamp showing a red light to the rear carried in accordance with the Act, an additional or substituted lamp shall be carried so that such load shall not project more than 6 feet beyond such additional or substituted lamp.

Certain vehicles engaged in agriculture are exempt from carrying lamps.

There are special provisions as to vehicles towing and being towed. A lamp showing a red light need not be carried by the drawing vehicle, no lamp showing a light to the front need be carried on any vehicle being drawn; a lamp showing a red light need not be carried on any vehicle being drawn except the rearmost vehicle: Provided—if the distance between any such vehicles exceeds 5 feet, each vehicle shall be required to carry the same lamps as if it were not a drawing vehicle or a vehicle being drawn, and if a drawn vehicle carries a load that projects laterally more than 12 inches beyond the outermost of the lamps showing a white light to the front, an additional lamp shall be carried on the projecting load so that no part projects more than 12 inches beyond a vertical line through the centre of such lamp.

STAGE CARRIAGES licensed in the Metropolitan Police District must carry a lamp inside, properly lighted, between sunset and sunrise when plying for hire.

HACKNEY CARRIAGE STATISTICS.

During 1927 there were licensed public carriages—Hansoms, 9; clarences—animal 141, mechanical 7,997, omnibuses—animal 3, mechanical 5,834, char-a-bancs, 229, tramway cars—mechanical 2,750, total, 16,963. Drivers and conductors—Cab drivers—animal 193, mechanical 10,436, stage drivers—animal nil, mechanical 16,138, composite licences (stage driver and conductor)—animal 4, mechanical 2,334, conductors, 17,857, total, 46,962.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1927, 305 applicants for cab drivers' licenses passed the examination as to knowledge of London and its environs. 7,503 separate examinations were held.

LOST PROPERTY.

Of lost property, 185,165 articles were deposited of which 73,142 were claimed by the owners. The number of awards paid to drivers, &c., was 62,927.

Regnal Years.—The years of a king's reign are the regnal years, and each begins on the anniversary of his accession: *e.g.*, Regnal year 17 of the present King began on May 6, 1926; regnal year 18 begins on May 6, 1927. The system is used for dating Acts of Parliament. The Summer Time Act of 1925, for example, is quoted as 15 and 16 Geo. V. ch. 64, because it became law in the session which extended over part of these two regnal years. The regnal years of Edward VII began on January 22, so that Acts passed in that reign are, in general, quoted with only one year number, but year 10 of this series ended on May 6, 1910, and Acts of the Parliamentary Session 1910 are headed 10 Edw. VII and 1 Geo. V.

L'ACADÉMIE FRANÇAISE.

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting *l'Institut de France* (*Secretary of the Institute*, M. Robert Reguier). The Academy was founded by Cardinal Richelieu in 1635 and reorganized in 1816. The special object of the Academy is the composition of a Historical Dictionary of the French Language, and its members, "The Forty Immortals" are as follows:—

Elected	Name	Born
1894	Paul Bourget	1852

	(and one vacancy).	

The four other Academies are:—

ACADÉMIE DES INSCRIPTIONS ET BELLES-LETTRES, founded 1663, 40 members.

ACADEMIE DES SCIENCES, founded 1666, divided into 11 sections, each of which comprises 6 members.

ACADÉMIE DES BEAUX-ARTS, 5 sections, comprising 40 members, as follows—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6

ACADÉMIE DES SCIENCES MORALES ET POLITIQUES (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of honorary members and of foreign correspondents.

LIFE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, and of eight Colonial companies (marked C), all of which transact business in this country

CLASS OF BUSINESS. The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P) Life offices transacting other insurance business are marked O in this column In such cases the Life funds are kept separately, and are not liable for the claims of other departments The Share Capital is usually liable for the claims of all branches Those having an Industrial branch are indicated by letters I.

FIGURES These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 31 December, 1927

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets

PREMIUM INCOME - The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassurance parts of the risks.

EXPENSES. The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown The average percentage of British offices is about 12½%, of which about 5% is expended on commission and 7½% on other expenses This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a sum to the policy holder through reduced premium being equivalent to an immediate cash bonus

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is without deduction of Income Tax except where marked (N) net

VALUATIONS The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate Various mortality tables are employed, those most usual being known as the H^m and O^m, and the corresponding Tables, $H^m(5)$ and $O^m(5)$ which exclude mortality in the first five years of assurance If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and $O^m(5)$ tables in combination are more stringent than the O^m table alone, the H^m is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

FIRE INSURANCE RATES.

Most large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:-

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, 1s. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from 2s.

Private Dwelling Houses, brick and timber built and tiled or slated, in no hazardous proximity, from 2s. 6d.

Most fire insurance companies transact accident and miscellaneous business, and if a strong company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several companies The "comprehensive" policies previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

INCOME TAX ALLOWANCES ON PREMIUMS PAID

Where an allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax on the "Taxable Income" (*i.e.*, that part of the income on which the tax is actually charged—the first £225 of the taxable income being charged at half the standard rate of tax, the remainder at the standard rate of tax). The allowance is made on the premiums paid, and is calculated at the following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916 (limited to premiums not exceeding one-sixth of total income, and to a rate of premium not greater than 7 per cent of the sum assured), and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000. The *Repayments* of Income Tax on account of Life Insurance Premiums are shown for a series of years on page 433

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses can either be payable with the sum assured, applied to reduce the premium, or surrendered for cash An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset This is called the 'Discounted Bonus" or 'Cost Price' system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with profits. It is not sufficient to judge a life office by premium rates only An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium and on this plan the rates are usually high to commence with, but are greatly reduced after a few years Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance

Endowment Assurances.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—*see* first page of Life Assurance section.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100 WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 with profits at the age of 55 or 60, or at death, if previous

Notes for page 438 —
* Australian Mutual and Mutual and Citizens' Rates are for quarterly payments.
† London Life Rates are for exact age stated, but are apportioned for actual age at time of purchase.

THIS Table shows amount of Annuity granted for every £100 paid The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to *day of death*. Some Companies pay whole or part of stamp duty See note as to rates on introductory page. [For Notes see page 437]

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same, in others it is a little less Some offices grant special terms in case of impaired lives.

ADVICE REGARDING LIFE ASSURANCE.

Apart from the immediate protection thereby given, a life or endowment assurance policy, if effected in a first-class bonus-paying company, provides exceptional opportunity for the remunerative investment of savings. Policyholders can claim relief from Income Tax in respect of life assurance premiums not exceeding in amount one-sixth of their income, where the death risk is involved.

The selection of the office best suited to requirements and likely to produce the best results should be carefully made, but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies. There are many good offices, and in the most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made.

Medical examinations are sometimes dispensed with in the case of new proposals, but policies in these instances are sometimes subject to certain restrictive conditions of a temporary character.

In view of the fact that life assurance premiums are governed by age, it is advisable to produce a birth certificate or other satisfactory evidence of this, when effecting a Policy. It is not always asked for then but is required by the offices before the policy monies are paid.

INQUIRIES.—On receipt of an inquiry containing particulars of requirements (accompanied by 5s.) addressed to "The Insurance Editor, 12, Warwick-lane E.C 4," advice will be given as to the system and policies best adapted to the special requirements. Inquiries should state the age at and date of next birthday. The following are suggested as the policies most likely to be required.—

(*a*) *Whole Life*—With and without profits.
(*b*) „ „ —With limited number of payments.
(*c*) „ „ —Reduced premium for first 5 years.
(*d*) *Endowment*—With and without profits.
(*e*) „ —Reduced premium for first 5 years.
(*f*) *Children's Insurances*—Educational, &c.
(*g*) "*Non-Medical*" Insurances

Building Societies.

THE two-fold function of a modern Building Society is to enable its members to purchase houses in which to dwell, also to foster thrift by providing safe and profitable investments The pioneer Societies of the 18th century were formed for specific objects, ceasing operations when their purposes were attained Greater security was afforded by the Societies being brought under the Friendly Societies Act of 1834, and by extended powers, duties and privileges granted to them in the Act of 1836 In 1846 the Office of Registrar of Friendly Societies was constituted and, during that year, an important new feature was introduced, by the application of the permanent principle to Building Societies, which were previously organised on a terminating basis. The adoption of this system had a remarkable effect upon the expansion of the work and brought into the movement a new class of subscriber, *i.e.* the small investor. Although investments in Building Societies are not recognised as Trustee securities, they, ordinarily, must appreciate in value, as the margin of cover becomes greater year by year, and frequently, by a further payment, a leasehold is converted into a freehold. The strong tendency to build up adequate reserves is also a substantial benefit. The deliberations of a Royal Commission in 1872 led to the passing of the Act of 1874, by which all the existing Societies were brought under the jurisdiction of the Chief Registrar of Friendly Societies, and were required to furnish Annual Returns duly attested, new Societies becoming, on formation, incorporated bodies The Building Societies Act of 1894 provided that all incorporated bodies should furnish Annual Returns, on a prescribed form, under heavy penalties for default, and the figures in the following tables are taken from the latest published Report of the Chief Registrar of Friendly Societies.

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint

Standard Gold contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy, fineness, 916·66, or 22 carats; 240 troy ounces of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 17s 10½d, and one ounce of pure gold, on the same basis, £4 4s. 11½d. During 1927, the average market price of gold was a fraction below these figures

Standard Silver formerly consisted of thirty-seven-fortieths of fine silver and three-fortieths of alloy, fineness, 925 Silver for coinage, by an Amending Act (10 Geo V. ch 3), consists of one-half silver, one-half alloy, or in millesimal fineness, 500. 12 troy ounces of 500 fineness are coined into 66 shillings † [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz 10 dwt (958 33), is practically obsolete It is occasionally used, however, for high-class plate]

The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—1918, 47$\frac{9}{16}$d.; 1919, 57$\frac{1}{16}$d., 1920, 61$\frac{7}{16}$d; 1921, 36$\frac{7}{8}$d.; 1922, 34$\frac{7}{16}$d.; 1923, 31$\frac{15}{16}$d; 1924, 34d.; 1925, 32$\frac{1}{16}$d; 1926. 28$\frac{11}{16}$d, 1927, 26d. On Oct. 13, 1928, the price of silver was 26$\frac{7}{8}$d. per oz

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2 192, to express a United States price on the English system, multiply the cents by 0·4562.

‡Bronze is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part, or of copper 95½ parts, tin 3 parts and zinc 1½ parts

* Issued on special occasions.

† By law a shilling weighs one sixty-sixth of 12oz Troy, 12oz of pure silver would be used in coining 72 shillings of 925 fineness and 132 of 500 fineness

‡ The legal weight of a penny is one-third, of the halfpenny one fifth, and of the farthing one tenth of an ounce avoirdupois, the halfpenny is one *inch* in diameter

§ Discontinued.

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20

Melting of Coins.—The melting of British gold and silver coin is prohibited

Light Gold.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight, but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of £5, £10, £20, £50, also for £100, £200, £500, and £1,000

Treasury Notes are of the value of £1 and 10s. These notes are being replaced by Bank of England notes as from November 22, 1928

Bank Post Bills can be obtained at the Bank of England for amounts of £10 and over at seven days' sight. They are issued for the full sum named thereon, without allowance for discount No charge is made for bills so drawn: they may be obtained at the Chief Office of the Bank of England in London, or at any of the branches

Legal Tender of Money.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England) No one can be compelled to give change Gold, if above the least current weight, and Treasury notes are legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

British Coinage Statistics.—During 1926 the number of coins struck at the Royal Mint was 183,954,872, of which 79,043,480 were Imperial, 98,777,023 Colonial, and 6,134,369 Foreign

HALL MARKS ON PLATE.*

Assay Office Marks.—The official marks stamped on gold and silver plate at Assay Offices are distinguished as under:—

Assay Office ...	*Distinguishing Mark*
London (Goldsmiths' Hall)	Leopard's Head (crowned, until 1823).
Birmingham	Anchor (square frame for gold; pointed shield for silver).
Chester	City Arms (3 Garbs and a Sword).
Sheffield	Crown.
Edinburgh	Castle.
Glasgow	Tree, Fish & Bell.
Dublin	Harp crowned.

In addition to the above, there have been Assay Offices at Bristol, Exeter, Newcastle-upon-Tyne, Norwich and York, all of which have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker

Date Mark.—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 26 years. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is omitted from the alphabet; at Glasgow all the letters are employed in a 26-year cycle

The Sovereign's Mark.—The "lion passant" introduced in the reign of Edward I (1300) for *silver* articles only.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784—1889–90 The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On *gold* articles only, in lieu of the "lion passant" on silver.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697–1720; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz 2 dwt of fine metal to each 18 dwt. of alloy.

Sterling Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The *relative* values of the various standards is shown below:—

	£	s.	d.
Pure gold, 24 carats	4	4	11½
Standard, 22 carats	3	17	10½
2nd ditto, 18 carats	3	3	8½
3rd ditto, 15 carats	2	13	1
4th ditto, 12 carats	2	2	5¾
5th ditto, 9 carats	1	11	10½

The Collector will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be sufficient to judge by the style and period of the article itself, *e.g.*

An article marked with the letter F 1721–2 can be distinguished from letter F 1801–2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant, the absence of the sovereign's head in the former as against its presence in the latter case, the different form of the leopard's head (which was "crowned" until 1823); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881–2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801–2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Imported Plate.

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed, stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St Andrew's Cross, *Glasgow*, double block letter F inverted; *Dublin*, Boujet. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

The Periods of English Architecture.

	Date.		*Style.*
I.	Before B C 55		Ancient British.
II.	B.C. 55 to A.D. 420		Roman Period.
III.	A.D. 449 to Norman Conquest (1066)		Anglo-Saxon.
IV.	1066–1189 (*i.e.* to end 12th cent.)		Norman.
V.	1189–1307 (*i.e* 13th cent)		Early English (Lancet, or Geometrical).
VI.	1307—1377 (*i.e.* 14th cent.)		Decorated (or Curvilineal).
VII.	1377–1485 (*i.e.* 15th cent)		Perpendicular (or Rectilinear).
VIII.	1485–1558 (*i.e.* first half 16th cent.)		Tudor
IX.	A.D. 1558–1625.	Early Renaissance	{Elizabethan (A.D. 1558–1603). Jacobean (A.D. 1603–1625).
X.	A.D. 1625–1830.	Late Renaissance	{Stuart (A D. 1625–1702) Queen Anne and Georgian (A.D 1702–1830).
Modern Architecture (The Age of Revivals)	19th cent. to present time		{William IV. (A.D. 1830–1837). Victoria (A.D. 1837–1901). Edward VII. (A D. 1901–1910). George V. (A.D. 1910–).

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Note.—The first portion (I–VIII) of this table is based upon that given on p. 319, Parts IX, and X on p. 701; and "Modern" on p. 764, of "A History of Architecture on the Comparative Method" (18th ed.), by Sir Banister Fletcher, F S.A., F.R I.B.A. (Batsford.)

Weights and Measures.

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

20 grains = 1 scruple (℈1) (= 1·296 *Grammes*).
3 scruples = 1 drachm (℥1) (= 3·888 *Grammes*).
8 drachms = 1 ounce (= ℥1 1035 *Grammes*).

Measures of Capacity

60 minims (*mn.*) = 1 fluid drachm (= 3·552 *Millilitres*).
8 fluid drachms = 1 fluid ounce (= 2 84123 *Centilitres*).
20 fluid ounces = 1 pint (= 0·568 *Litre*)
8 pints = 1 GALLON (= 4 545963I *Litres*).

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *dram*, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437 5 grains). A fluid *drachm* (54 6875 grains) is equal in weight to TWO Avoirdupois *drams*.

Approximate Equivalents :—
1 "table-spoon" = ½ fluid oz.; 1 "dessert-spoon" = ¼ fluid oz.; 1 "tea-spoon" = ⅓ fluid oz.

Avoirdupois Weight.

7000 grains (*gr.*) = 1 pound (*lb.*).
16 drams (*dr.*) = 1 ounce (*oz.*) (= 28 350 *Grammes*).
16 ounces = 1 POUND (= 0·45359243 *Kilogram*).
14 pounds = 1 stone* (= 6·350 *Kilograms*).
28 pounds = 1 quarter (of a *cwt*) (= 12·70 *Kilograms*)
100 pounds = 1 cental (= 45·359243 *Kilograms*)
4 quarters (112 lb.) = 1 hundredweight (*cwt.*) (= 50 802 *Kilograms*).
20 hundredweight (2,240 lb.) = 1 ton (= 1·0160 *Tonnes* or 1016·0 *Kilograms*).

Troy Weight.

24 grains = 1 pennyweight (*dwt.*) (= 1 5552 *Grammes*).
20 dwt. = 1 ounce (= 31·1035 *Grammes*).

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains (31 1035 *Grammes*) in weight There is *no* Troy POUND.

Jewellers' Weight.

The metric carat of 200 *milligrammes* is the legal standard of weight for precious stones and pearls.

* The *Smithfield stone* (for dead meat) is 8 lb only.

Measures of Capacity.

4 gills = 1 pint (= 0 568 *Litre*).
2 pints = 1 quart (= 1·136 *Litres*).
4 quarts = 1 GALLON (= 4·545963I *Litres*).
2 gallons = 1 peck (= 9 0919 *Litres*).
8 gallons = 1 bushel (= (3·637 *Dekalitres*).
8 bushels = 1 quarter (= 2·909 *Hectolitres*)
A chaldron is 36 bushels = 4½ quarters.

Measures of Length.

12 inches (*in*) = 1 foot (*ft*) (= 0·30480 *Metre*).
3 feet = 1 yard (*yd*) (= 0·914399 *Metre*).
6 feet = 1 fathom (= 1 8288 *Metres*)
5½ yards = 1 pole (=5 0292 *Metres*).
22 yards = 1 chain = 100 links (=20·1168 *Metres*).
10 chains = 1 furlong (= 201·168 *Metres*).
8 furlongs = 1 mile = 1,760 yards (= 1·6093 3 miles = 1 league (obsolete). [*Kilometres*).

A *Cricket Pitch* is 22 yards (one chain) between the stumps

A *Lawn Tennis Court* is 78 × 36 feet (double) and 78 × 27 feet (single).

A *Croquet Lawn* is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

A *Badminton Court* is 44×20 ft, with net 30 ins. deep and 5 ft high at centre

A *Polo Ground* is 300 × 160 yds

A *Football Ground* (*Association*) is 120 × 80 yds. (full size), (*Rugby*) 110 × 75 yds. (full size).

Birmingham Gauge.

The equivalent of an inch is 15/0 B.G. The numbers proceed by units down to 1/0 B.G., which = 0 3964 inch, and from 1 B G. (·353 inch) by units to 52 B G. (·00095 inch).

Square or Surface Measure.

144 sq. inches = 1 sq. foot (= 9 2903 *Sq. Decimetres*).
9 sq. feet = 1 sq. yard (= 0·836126 *Sq. Metre*).
30¼ sq. yards = 1 perch, or rod, or pole (= 25·293 *Sq. Metres*).
40 perches = 1 rood (= 10·117 *Ares*).
4 roods = 1 acre (= 0·40468 *Hectare*)
10 square chains = 1 acre. [*metres*).
640 acres = 1 square mile (= 2 58995 *Sq. Kilo-*

Dimensions of an Acre.—The Anglo-Saxon acre's-length is the furlong, and the acre's-breadth the chain, an acre being 4,840 sq yards, or 220 × 22 yards The length of a side of a *square* acre is 69·57 yards; an area 110 × 22 yards (or 220 × 11 yards) would be *half an acre*; an area 55 × 22 yards (or 110 × 11 yards) would be *one quarter of an acre*, and so on.

Cubic Measure.

1,728 cubic inches = 1 cubic foot (= 0·028317 *Cubic metre*).
27 cubic feet = 1 cubic yard (= 0·764553 *Cubic metre*).

Angular or Circular Measure.

60 seconds (″) = 1 minute (′).
60 minutes = 1 degree (°).
30 degrees = 1 sign.
90 degrees = 1 right angle or quadrant.
12 signs (4 quadrants) = 1 circumference.
Diameter of circle × 3·1416 = circumference.
Diameter squared × ·7854 = area of circle.
Diameter squared × 3·1416 = surface of sphere.
Diameter cubed × ·5236 = solidity of sphere
One degree of circumference × 57·3 = radius.
Diameter of cylinder × 3·1416; product by length or height, gives the surface.
Diameter squared × ·7854; product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Miscellaneous Weights and Measures.

Apples (Bushel) = 37 to 43 lb (average 40 lb.)
Ballast (Pig) = 56 lb.
Beef (Barrel) = 200 lb.
Biscuits (Bag) = 102 lb.
Blacklead (Cask) = 11½ cwt.
Butter (Barrel) =4 firkins = 224 lb.
Camphor (Box) = 1 cwt.
Cloves (Matt) = 80 lb.
" (Chest) = 200 lb.
Coal (Sack) = 224 lb.
" (Bushel) = 80 lb.
" (Chaldron) = 85 bushels.
" (Ton) = 20 sacks.
Cocoa (Bag) = 112 lb.
" (Cask) = 1 cwt. 28 lb.
Coffee (Bag) = 140 to 168 lb.
" (Bale of Mocha) = 224 to 280 lb.
" (Barrel) = 112 to 168 lb.
" (Tierce) = 5 to 7 cwt.
Cotton (U.S. Bale) = 450 to 550 lb.
" (Egyptian Bale) = 700 to 740 lb
" (Indian Bale) = 400 lb.
" (Tinivelly) 500 lb.
Currants (Caroteel) = 5 to 9 cwt.
Flour (Peck) = 14 lb.
" (Bag) = 140 lb.
Glass (Seam) = 24 stone of 5 lb. = 120 lb
Gunpowder (Barrel) = 100 lb.
Hides (Last) = 12 dozen
Honey (Gallon) = 12 lb.
Hops (Bag) = 280 lb.
" (Pocket) = 1½ to 2 cwt.
Lead (Fodder):—
London and Hull = 19½ cwt.
Derby and Newcastle = 22½ cwt.
Meat (Stone) = 8 lb.
Nuts (Barcelona, Bag) = 126 lb.
Oats (Barrel)= 14 stone.
Pepper (Bag of black) = 326 lb.
" (Bag of white) = 168 lb.
Pork (Barrel) = 224 lb.
Potatoes (Sack) = 112 lb. (since 1923).
Raisins (Barrel) = 112 lb.
Rice (Bag) = 168 lb.
Sago (Bag) = 112 lb.
Saltpetre (Bag) = 168 lb.
Soft Soap (Barrel or Pack) = 256 lb.
" (Firkin) = 64 lb.
Steel (Faggot) = 120 lb.
Sugar (Bag) = 112–196 lb.
" (Hogshead) = 13 to 16 cwt.
" (Tierce) = 7 to 9 cwt.
Tar (Barrel) = 26¼ gallons.
Tea (Chest) = 84 lb.
Tobacco (Hogshead) = 12 to 18 cwt.
Turpentine (Barrel) = 224 to 280 lb.
Wood (Cord) = 128 cubic feet.
Wool (Sack) = 364 lb.

Wheat, Corn, and Flour.

Under the *Corn Sales Act* of 1921 the Corn Returns Act of 1882 is amended, and provision is made for the sale of cereals by weight in terms of the hundredweight of 112 imperial standard pounds.

100 lb. wheat produces 70 lb. flour.
100 lb. flour produces 130 lb. bread.
A quartern loaf = 4 lb.
A last of grain = 80 bushels.

NOTE.—A *Quarter* is a heaped measure of 8 bushels. A quarter of English wheat is reckoned as 504 lb. weight. On the Winnipeg Grain Exchange the standard *bushel* of oats is reckoned as 34 lb.; in U.S.A. at 32 lb.

Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb.
Load of hay or straw = 36 trusses.
Ton of hay = 36 trusses.
An acre of grass should yield 1 to 2 tons of hay.

Sizes of Barrels and Bottles.

	Gals.
Firkin or Quarter Barrel.	9 = 9 × 1
Kilderkin, Rundlet, or ½ Barrel	18 = 9 × 2
Barrel	36 = 9 × 4
Hogshead (1½ barrels)	54 = 9 × 6
Puncheon (2 barrels)	72 = 9 × 8
Butt of Ale (3 barrels).	108 = 9 × 12

An *Anker* = 10 gallons; a *Tierce* = 42 gallons; a *Pipe* of Port or Masdew = 115 gals.; Teneriffe = 100 gals.; Marsala = 93 gals.; Madeira and Cape = 92 gals.; Sherry and Tent = 108 gals.; *Butt* of Lisbon and Bucellas = 117 gals.; *Aum* of Hock and Rhenish = 30 gals; *Hogshead* of Brandy, 60 gals., Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons; *Puncheon* of Brandy or Rum = 120 gals.

Bottles.—The customary glass bottle of wine or spirits should contain one-sixth of a gallon = 26⅔ fluid ounces.

In the drug trade two large bottles are used:—
Corbyn... . ..... =40 fluid oz (quart).
Winchester quart =80 " (½ gallon).

Water.

The British Ton is the weight of a cubic British Metre of pure water at the temperature of melting ice, very nearly. At present, the following relations hold good:—

Cubic inch .... = 252·458 grains
Gallon (277·274 cub. in.) = 10 lb. (distilled).
Cubic foot .... = 62·321 lb.
35·943 cubic ft. (224 gals.) = 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lb. in addition to its own weight.

Railway Gauges.

In Great Britain = 4 ft. 8½ in.
" Ireland = 5 ft. 3 in.
" U S A = 4 ft. 8½ in.
The 4 ft. 8½ in. gauge is also used in Canada, France, Germany, Netherlands, Belgium, Denmark, Austria, Hungary, Italy, Switzerland, Sweden and European Turkey.
" Australia:—
N.S.W. = 3 ft. 6 in. and 4 ft. 8½ in
Victoria and South Australia = 5 ft 3 in
Queensland and Western Australia = 3 ft. 6 in.
" New Zealand = 3 ft. 6 in.
" India = 2 ft. 6 in.; 3 ft 3½ in. and 5 ft. 6 in.

" Russia = 5 ft. 0 in.
" Spain and Portugal = 5 ft. 6 in.
" Asia Minor = 4 ft. 8½ in. and 3 ft. 5½ in.

A single track of 4 ft. 8½ in. gauge requires 12 ft. of roadway; a double track requires 23 ft. of roadway.

Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of the units has been fixed by international agreement The principal units are as follow —

As a unit of resistance, the international *Ohm*, which is based upon the ohm equal to 10^9 units of resistance of the C G.S. system of electromagnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14 4521 grammes in mass, of a constant cross-sectional area, and of a length of 106 3 centimetres.

As a unit of current, the international *Ampère*, which is one-tenth of the unit of current of the C G.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of 0 001118 of a gramme per second.

As a unit of electro-motive force, the international *Volt*, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampere, and which is represented sufficiently well for practical use by $\frac{1000}{1434}$ of the E.M F. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of 15° C, and prepared in the manner described in a certain specification

As a unit of quantity, the international *Coulomb*, which is the quantity of electricity transferred by a current of one international ampère in one second

As a unit of capacity, the international *Farad*, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the *Joule*, which is 10^7 units of work in the C.G S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampere in an international ohm In practice the watt-hour is usually employed. It represents the work done by such a current in an hour, and equals 3,600 joules.

As the unit of power, the *Watt*, which is 10^7 units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 746 watts = 1 horse-power, and the value of a Board of Trade unit (B O.T.U) is 1,000 watt-hours, or 3,600,000 joules, or 1⅓ horse-power hours.

As the unit of induction, the *Henry*, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampère per second.

A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11⅓ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar. The rod being 5 British metres, a rod of brickwork is 25 square metres 1½ bricks thick = very nearly 10 cubic metres.

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton 11 cwt. 1 qr.

A *Piece* of *machine* printed *Wall Paper* is 11½ yd. long and 21 in. wide; of *hand* printed 12 yd long × 21 in wide. French wall papers are usually 9 yd. × 18 in.

50 cubic feet of planks = 1 load.
42 do. timber = 1 shipping ton.
108 do do = 1 stack
128 do. do. = 1 cord

A standard hundred of deals contains 120 pieces. The Petrograd standard consists of 165 cubic feet, or 120 pieces 1½ in. × 11 in. × 12 ft., or 120 pieces 3 in. × 11 in × 6 ft

A Batten is not more than 7 inches wide; a Deal not more than 9 inches; Planks are 2 to 4 inches thick, and 10 inches and up in width

Fish.

In Scotland, and at certain places in England and Wales at which the Cran Measures Act, 1908, has been put into operation, fresh herrings must be sold by the *Cran*, containing 37½ imperial gallons, or *Quarter Cran* of 9¾ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Maze*, which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320, 10 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be 26¼ imperial gallons, or in half-barrels of 13⅛ gallons Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force.

A *Quintal* of fish (Newfoundland, &c.) is 100 lb.; a barrel of anchovies = 30 lb.: a "box of fish" is about 90 lb.

Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England).

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group on the same side of the line, or for political reasons. The line is indicated by joining up the following eight points:—

(1) Lat. 60° S., long 180°.
(2) " 51½° S., long 180°.
(3) " 45° S., long 172½° W.
(4) " 25° S., long 172½° W.
(5) " 5° S., long 180°.
(6) " 48° N., long 180°.
(7) " 52½° N., long 170° E.
(8) " 65° N., long 169° W.

Then through the centre of Bering Strait to a point lat. 70° N., long 180°.

A *Geographical Mile* is the length of one minute of Latitude If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076·8 feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English miles. The mean equatorial diameter is 7,926 miles. The circumference of the Equator is 24,899 miles.

Nautical Measures.

6 feet = 1 fathom.
100 fathoms = 1 cable length.
10 cables = 1 nautical mile.
60 nautical miles = 1 degree.

The assumed length of the cable is 600 feet (=182·87 *metres*), but it is strictly 606 97 feet (= 185 *metres*). The conventional Nautical Mile (the *Knot* in speed measurements) is 10 cables, assumed at 6,080 feet (strictly 6,069·7 feet), but the Nautical Mile is strictly the length of a minute of the meridian and differs according to latitude.

Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the Ton-register used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

Net tonnage is the gross tonnage *less* certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

Dead-weight tonnage, or carrying capacity, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (*q v*).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to the load water line (*q.v.*), i.e., it is the *weight* of vessel and contents in tons.

Load-water-line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light" or "in ballast."

Free Board is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

Bells and Watches on Board Ship.

Bells.—Time is kept by means of a bell, which is struck every half hour. Anyone who, in an effort to terminate his watch prematurely, strikes the bell early, is accused of "warming the bell," an expression which has grown to include the doing of anything before the appointed time.

Watches.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the *Starboard* (right side, looking forward) and the *Port* (left). The day commences at noon, and is thus divided:—

Watch.	*Bells* (in ½ hours).
Afternoon	noon to 4 p.m., 1 to 8.
First Dog	4 p.m. to 6 p.m., 1, 2, 3, 4.
*Last or †Second Dog	6 p.m. to 8 p.m., 1, 2, 3, 8.
First	8 p.m to midnight, 1 to 8.
Middle	midnight to 4 a.m., 1 to 8.
Morning	4 a m. to 8 a.m., 1 to 8.
Forenoon	8 a.m. to noon, 1 to 8.

*Last = Royal Navy; †Second in Mercantile Marine

This makes seven Watches, enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p m. into *two* Watches.

For TIME AT SEA *see* p. 78.

Speed of Ships.

The *Knot* is a measure of speed of ships. The following table shows the equivalents of 1 to 42 knots in land (statute) miles per hour:—

Knots	Miles	Knots	Miles	Knots	Miles
1	1·1515	15	17·2727	29	33·3939

Measures of Energy, &c.

In Physics the unit of force is the *dyne*, the amount that, acting for one second on one gramme mass, gives it a velocity of one centimetre per second. The British unit is the *poundal*, which in one second gives one pound a velocity of one foot per second. One *poundal* = 13,825 5 *dynes*. In Meteorology the unit of atmospheric pressure is the *Bar*, equal to the pressure of 1,000,000 dynes (1 megadyne) per sq. centimetre. The Meteorological *Bar* is thus 1,000,000 Chemical *Bars*

Horse power is energy exerted at the rate of 550 foot-pounds per second; an alternative unit is the *kilowatt* (102 kilogram-meters per second)= 737·59 foot pounds per second.

Thermal Unit.—The British Thermal Unit (B Th.U.) is the amount of heat required to raise one pound of water one degree Fahrenheit. The *Gas Therm* = 100,000 B Th U. If *V* = cu. ft. consumed, *H*=declared heat value of the Company's gas (in B.Th.U. per cu. ft.), *P* = cost of therm in pence, *B*=total bill in pence—then $B = V \times H \times P \div 100{,}000$, whence equivalent cost (in pence) per 1,000 cu. ft. $= B \times 1{,}000 \div V = H \times P \div 100$.

Yarn Measures.

Cotton and Spun Silk Count.—
Thread = 1½ yards.
Lea or Skein, *skn* = 120 yards.
Hank, *hk.* = 7 Skeins, or Leas = 840 yards.
Spindle, *spdl* = 18 Hanks.
Counts = the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lb or 10 lb.
Reels of cotton vary from 30 to 1,760 yards; they must be marked correctly.
Bundles of Cotton are chiefly made up for export.

Worsted Count.—Wrap, 80 yards; Hank = 560 yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linen Count.—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is 200 hanks.

West of England Count.—The Hank is 320 yards, and the number of hanks in 1 lb. is the count of the yarn.

Paper and Book Measure.

Writing Paper.

24 sheets = 1 quire.
20 quires = 1 ream.

Printing Paper.

516 sheets = 1 ream.
2 reams = 1 bundle.
5 bundles = 1 bale

NOTE.—Books are usually bound up in sheets of 16 or 32 pages Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, and a ream will provide 100 books, the odd 16 sheets being reckoned as waste. Newspapers (and books circulating in large numbers) are printed on rotary presses, for which the paper is supplied on reels (and not in cut reams) "Whitaker" is printed on a rotary press, 192 pages at a time, the paper being served to the press from a reel, and 6 sheets of 32 pages are delivered, printed and folded, at the opposite end of the press.

Sizes of Type.

All Founders cast their type to one uniform height ("type high"), which is 11/12 inch, though the letters may vary considerably in their breadth.

The type chiefly used in "Whitaker" is named *Nonpareil* (6 point). The column contains 75 lines, and is 12 Pica ems wide; on an average every column contains about 3,000 letters, or 600 words.

The Point System.—The basic unit in American (and many British) type foundries is the "point" of 0·013837 inch (72 points to the inch), and the names of the various types in the point system are added in parentheses.

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 124 lines, and about 7,500 letters.

METRIC WEIGHTS AND MEASURES.

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres (*mm.*)	= 1 centimetre (*cm.*)	= 0·39370113 inch
10 centimetres	= 1 decimetre (*dm.*)	= 3·9370113 inches.
10 decimetres	= 1 METRE (*m*)	= 1·0936143 yards.
10 metres	= 1 dekametre (*dam.*)	= 10·936143 yards.
10 dekametres	= 1 hectometre (*hm.*)	= 109·36143 yards.
10 hectometres	= 1 kilometre (*km.*)	= 0·62137 mile.

A kilometre is approximately *five eighths* of a mile, so that 8 kilometres may be regarded by pedestrians as 5 miles.

2.—MEASURES OF WEIGHT.

10 milligrams (*mg.*)	= 1 centigram (*cg.*)	= 0·15432 grains.
10 centigrams	= 1 decigram (*dg.*)	= 1·5432 ,,
10 decigrams	= 1 gramme (*grm.*)	= 15·4323 ,,
10 grammes	= 1 dekagram (*dag.*)	= 5·6438 drams.
10 dekagrams	= 1 hectogram (*hg.*)	= 3·5274 *oz.*
10 hectograms	= 1 KILOGRAM (*kg.*)	= 2·2046223 lb.
10 kilograms	= 1 myriagram	= 22·046223 lb.
10 myriagrams	= 1 quintal (*q.*)	= 1·9684 cwt.
10 quintals	= 1 tonne (*t.*)	= 0·9842 ton.

3.—MEASURES OF CAPACITY.

10 millilitres (*mil.*)	= 1 centilitre (*cl.*)	= 0·0704 gill.
10 centilitres	= 1 decilitre (*dl.*)	= 0·17598 pint.
10 decilitres	= 1 LITRE (*lit.*)	= 1·7598 pints
10 litres	= 1 dekalitre (*dal.*)	= 2·1997 gals.
10 dekalitres	= 1 hectolitre (*hl.*)	= 2·7497 bushels.

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF LAND.

100 sq. metres	= 1 are (*a.*)	= 0·0988 rood.
100 ares	= 1 hectare (*ha.*)	= 2·4711 acres.
100 hectares	= 1 sq. kilometre	= 0·3861 sq. mile.

NOTES.

1 hectolitre = 2·75 bushels.
1 hectolitre per hectare = 1·11 bushels per acre.
1 quintal = 3·67 bushels.
1 quintal per hectare = 1·49 bushels per acre.
1 franc a hectolitre = 3·6*d.* a bushel (par).
1 ,, a quintal = 4·3*d.* a cental (par). = 2*s.* 3*d.* a quarter (par).
7 francs ,, (duty) = 25*s.* 6*d.* a quarter (par).

THE UNITED STATES.

The weights and measures of the U.S.A. are the same as those of Great Britain, with the following exceptions:—

Weight.—In the short ton of 2,000 lb., the Cental of 100 lb takes the place of the Cwt. in the long ton. There are two tons, therefore, the long ton of 2,240 lb, the short ton of 2,000 lb.

Capacity.—For grain, the old bushel of 2,150·42 cubic inches; its gallon = 268·8 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the British gallon and = 58,327·8 grains of water. It is divided into 8 pints = 7,289·7 grains of water = 16·6 Imperial ounces. In medicine the pint is divided into 16 fluid ounces = 455·6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

BRITISH DOMINIONS.

Australia and New Zealand.—*Same as* British.

Canada.—*Same as* British but with *short* ton of 2,000 lb., as in U.S.A.

Newfoundland.—*Same as* British.

Channel Islands.

The weights and measures in use in the Channel Islands are those of Great Britain, the *cental* of 100 lb. being used as well as the *cwt.* of 112 lb. The *Old Island Measures* are as follows.—

	Jersey.	Guernsey.
Vergée (Normandy rood)	= 0·44 acre	0·4 acre.
Bushel	= 8·9 gallons	5·8 gallons.
Pound	= 7,561 grains	7,623 grains.
Cwt.	(104 lb.) = 112·3 lb.	(100 lb.) = 108·9 lb.

British India.

Ungul	= 0·75 inch.
Guz, usually 33 inches; also the yard.	
Koss	= 2,000 yards.
Bigha (Bengal) usually	= 0·625 acre,
Cawny (Madras)	= 1·33 ,,
Tola (rupee-weight)	= 180 grains.
Chittak	= 2·0572 oz.
Seer, 16 chittak, or 80 tolas	= 2·0572 lb.
Maund, 40 seers	= 82·284 lb.
,, (Bombay)	= 27·864 lb.
,, (Madras)	= 24·68 lb.
Seer (Liquid)	= 1·760 pints.
Candy ,,	= 500 lb.
Visham = 3 lb.; Dangali	= 3 pints.
Pa'ah	= 15 gallons.
Catty (Singapore)	= 1⅓ lb.
Pikul ,, 100 catties	= 133 lb.

Irish Free State.—*Same as* British.

Malta.

Piede	= 11·166 inches.
Canna	= 2·2283 yards.
Libbra	= 12 oncia = 4886 Troy gr.
Rotolo	= 1·745 lb.

Sudan.—*See* Egypt.

South Africa.

Money, Weights, and Measures.—The *Metric System* is compulsory in the case of chemists, and is permissible (along with British standard of weights and measures) in other cases. In addition, the following old Dutch measures are still used:—*Liquid Measure:* Leaguer = about 128 imperial gallons; half aum = 15¼ imperial gallons; anker = 7½ imperial gallons. *Capacity:* Muid = 3 bushels. The general surface measure is *Morgen*, equal to 2·1165408 acres; 1,000 Cape lineal feet are equal to 1,033 British feet. The short ton of 2,000 lb. is used.

FOREIGN WEIGHTS AND MEASURES.

The *Metric System* has been adopted by the whole of Europe (except *Great Britain* and *Russia*) and is *permissive* in all countries.

China.

Tael weight	=	1·33 oz.
Catty ,,	=	1 33 lb.
Picul ,,	=	133·33 lb.
Ts'un . . .	=	1 41 inches.
Ch'ih	=	1·175 feet.
Chang . .	=	11 75 feet.
Li	=	2,115 feet.

Egypt.

The *Metric System* of *Weights and Measures* and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use, with their British equivalents, are as follows :—

Length—

Dira Baladi (used for piece goods)= 29·83 inches
Dira Mamari, or Pic (used by architects) ....= 29 53 inches
Qasaba (used for agricultural land)= 11·65 feet

Area—

1 Qirat ....=209·3 sq. yards
1 Feddân (=24 qiiats) ... ...= 1·038 acres

Example 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent? Answer:—19 24 years' purchase, or £1,924.

Example 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? Answer.—Looking at the Table of Expectation of Life (q. v.), it will be seen that the expectation for age 54 is about 17 years; and from the above table an annuity certain for 17 years interest at 5 per cent., is worth 11·27 years purchase. The present payment required would therefore be £1,127 *approximately*.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

REPAYMENT OF PUBLIC LOANS.

Sums needed annually for the liquidation of a debt (principal and interest) of £100, at the stated percentage, in 5 to 80 years. If the loan be for £1,000, each annual instalment must be multiplied by 10, and so on. Thus, a Municipal Loan of £1,000,000 at 5 per cent., repayable in 80 years, would cost the ratepayers £51,031 5*s.* annually for that period, and would then be extinguished.

REDEMPTION OF CAPITAL BY ANNUAL PAYMENTS.

THE following are the rates charged by certain first-class Insurance Companies for "Redemption Policies," to secure the payment of £100 in return for so many annual premiums, *e. g.*, an Insurance Company will undertake to pay £100 on Midsummer Day, 1951, in return for the payment of £2 5*s.* 2*d.* on Midsummer Day, 1923, and each year afterwards until 1950, or 28 payments in all; for £1,000 the annual premium would be £22 11*s.* 8*d.*, and so on. This table is of particular interest to purchasers of *Leasehold* property, as it enables such purchasers to see, at a glance, the amount to be paid out of the income from the property for a redemption policy to provide the sum originally expended (with a margin for dilapidations, if necessary), by the time the leasehold interest has expired.

THE RULE OF THE ROAD.

The Rule of the Road is a paradox quite,
For in driving your carriage along,
If you bear to the left you are sure to go right,
If you bear to the right you go wrong.

But in walking the streets 'tis a different case,
To the right it is right you should steer,
On the left should be left enough of clear space
For the people who wish to walk there.

THE RULE OF THE ROAD AT SEA.

1. *Two steamships meeting.*

When both side-lights you see ahead,
Port your helm, and show your RED.

2 *Two steamships passing.*

GREEN to GREEN, or RED to RED,
Perfect safety—Go a-head!

3. *Two steamships crossing.*

If to your starboard RED appear,
It is your duty to keep clear;
To act as judgment says is proper;—
To Port—or Starboard—Back, or Stop her.

But when upon your port is seen
A Steamer's starboard light of GREEN,
There's not so much for you to do,
For GREEN to Port keeps clear of you.

Both in safety and in doubt,
Always keep a good look-out;
In danger, with no room to turn,
Ease her—stop her—go astern.

THE DERBY, 1885-1928

For particulars of the Derby from 1780-1884 see 1921 edition.

The *Distance* of the Derby course at Epsom is now exactly 1 mile 4 furlongs, having been shortened 29 yards by the rounding off of Tattenham Corner. Sir J. Hawley scored four successes with Teddington, Beadsman, Musgrid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. Lady James Douglas was the first lady to win the Derby.

THE TURF IN 1928.

LORD DERBY'S Fairway, by Phalaris out of Scapa Flow, bred by his owner, proved himself to be the champion three-year-old colt of 1928 His easy victories in the Eclipse Stakes and St Leger were achieved in a style which stamped him as the best of his age He could not run in the Guineas but won the Newmarket Stakes His defeat in the Derby was due to nervousness, but his victory in the Eclipse was so easily won that it was no surprise that Lord Derby's horse took the St. Leger in convincing fashion and so set the seal on his three-year-old career

The classic races proved that the colts were, with the exception of Fairway, below the average in merit. The 2,000 guineas was won by Flamingo, the property of Mr. Lionel Phillips, and the 1,000 guineas by His Majesty's filly Scuttle. Flamingo in his turn was beaten in the Derby by Felstead, a son of Spion Kop (himself a Derby winner), but this colt afterwards developed splints and could not run in the St. Leger. He was a genuine stayer but beyond this one could not go. In the Oaks, Lord Derby's filly Toboggan by Hurry On out of Glasier, proved superior to Scuttle. Lord Derby has now won the St. Leger four times, viz , with Swynford, Keysoe, Tranquil and Fairway. Other good horses of the year were Priory Park, winner of the City and Suburban and Royal Hunt Cup, and Abbot's Pride, winner of the Jubilee Stakes at Kempton; but on the whole the quality was below the average.

There is quite a number of high-class two-year-olds, chief of which are the fillies Arabella and Tiffin, while Reflector, Mr. Jinks, Reedsmouth and Lord Dewar's The Black Abbot, and Merton Abbey show great promise. Perhaps the speediest is Arabella, a grandaughter of the famous Pretty Polly, bred by Colonel Loder, who, if she possesses the staying power of her grand-dam, will turn out one of the best three-year-olds Reedsmouth, too, is a candidate for classic honours These were first and second in the Champagne Stakes at Doncaster.

A great change is imminent on the Turf this year by the legislation of the totalisator for betting The present system is unsatisfactory owing to the flagrant frauds on the Exchequer which will be got rid of to a great extent. A Racing Commission has been set up by the Government to deal with the totalisator and to lay down regulations for its use.

Prices of bloodstock showed no falling off Sir Hugo Cunliffe-Owen refused an offer of £100,000 for his Derby winner, Felstead. The record price for a racehorse is the £60,000 paid by Sir H Mallaby Deeley for Call Boy who won the Derby in 1927 A yearling colt by Whisk Broom was bought for £15,400 at the Saratoga sales. The record price in this country is 14,700 guineas, paid for Blue Ensign by Lord Glanely, and this horse is now a promising sire, though he was of no use as a racehorse.

The yearling sales at Doncaster in September produced a total of 398,865 guineas, 70,000 guineas more than the previous year.

Lord Derby topped the list of winning owners with over £50,000; next being Mr S. B Joel, Sir H. Cunliffe-Owen, Mr. J. B. Joel. the Aga Khan, and Lord Dewar Lord Derby was also at the head of breeders, Lord Dewar and Sir John Robinson coming next Frank Butters was first of winning trainers, with F. Darling second. G. Richards heads the winning jockeys with considerably over 100 winners, with F. Fox second. Phalaris was the chief of the sires, and Fairway the chief winning horse with £28,067.

CRICKET IN 1928.

Thanks to a fine summer the cricket matches in the County Championship pursued their normal course and Lancashire for the third time in succession were at the head of the competition with Kent second and Notts third This year the position of the competing counties will not be reckoned by percentages but on the simple League football method of home and away matches.

AVIATION IN 1928.

The King's Cup.

The King's Cup for 1928 was won for the second time by Capt W. L Hope, whose time during the two days was 20 hrs 24 mins 4 secs, with an average speed of 105·1 m p h Miss Spooner (3rd) was 5 mins 22 secs longer C F Unwin was second at 101 m.p.h., and Capt A H Broad fourth All these finished within 7½ minutes of each other.

The airship Italia, after flying across the North Pole, crashed, and many of the crew were lost, though the leader, General Nobile, and a number of the crew were subsequently saved.

Capt Hinkler, alone in an aeroplane, flew in 15½ days from London to Port Darwin, a total of 10,340 miles The machine was an Avro Avian with a Cirrus engine of 30/80 h p., and the running expenses were estimated at about £50 The previous record of the brothers Smith was 29 days with a 750 h p engine

A westward flight from Ireland to Greenland was made by two Germans and an Irishman, Capt H Kohl, Baron von Hunefeld and Commandant J Fitzmaurice. This is the first time the westward Atlantic flight has been accomplished direct

The Australian explorer, Capt George, and his pilot, Lieut Carl B Elson, crossed in an aeroplane from Alaska, the North Pole to Spitzbergen

An aeroplane flight across the Pacific, from America to Australia in three hops, 7,000 miles, was made by Kingsworth and Ulms.

Lady Heath flew from the Cape to Croydon single-handed in a Moth aeroplane. She was once shot down by a native, but was unhurt.

Sir A. Cobham, accompanied by Lady Cobham, made a survey of African ports and lakes as landing places for sea-planes.

The well known explorer Amundsen, was lost in the neighbourhood of the North Pole in an aeroplane while searching for the lost men of the *Italia*. Neither his remains nor his aeroplane were found.

BILLIARDS IN 1928.

Joseph Davis, of Chesterfield, won the Professional Billiards Championship of England by defeating the holder, Thomas Newman by 16,000 to 14,874 in the final of 1928 at Thurston's Davis also holds the title of Snooker's Pool Champion W Smith once again refrained from challenging, but now that the rules are again to be changed, he is expected to enter this year's competition

The changes outlined are, (1) the use of composition balls instead of ivory, (2) the holder to play right through the competition each year The Billiards Association and Control Councils have fixed the date for April 1, 1929, at Thurston's Hall, London. Entries close on Jan, 1, 1929 The Professional Snooker Championship will be played at Birmingham, commencing on March 18, 1929. The Amateur Championship in heats of 2,000 up (final, 3,000), will be played at Thurston's, beginning on Friday, Jan 11 The British Empire Championship will be played in Johannesburg, commencing on or about April 15, 1929

The new Amateur Billiards Champion is A Wardle, of Manchester, who beat in the final A W T Good, of London, by 3,000 to 2,189 He beat the previous record of L Steeples by making 5 breaks of over 100 in the final match

W Newman appears to hold the break record in England with a break of 1,231, made under the new rules, but the rules have been so often changed and amended that previous records are no longer of much use, and therefore it is proposed to start afresh Previous freak records will be found in issues of the "Almanack" for the last 20 years W. Lindrum holds the record in Australia with 1415

In Oceania	3,300,000	8,000,000
Total	13,909,782	450,094,000

GEOGRAPHICAL DISTRIBUTION.—The British Empire occupies over one-quarter of the known surface of the globe, and its population exceeds one quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere. The distribution of the surface over the Northern and Southern Hemispheres causes a complete alternation of the seasons, one half of the Dominions enjoying summer while the other half is under winter conditions.

ETHNOLOGY.—By far the greater portion of the Empire lies within the temperate zones and is suitable for white settlement, the tropical areas being Southern India, West, East and Central Africa, parts of the West Indies, British Guiana and Honduras, Northern and Central Australia, Borneo, and the various settlements in the Malay Peninsula. The estimated white population of the Dominions in 1921 was 60,000,000, mainly British and Irish, but partly French, Dutch, and Spanish. The remaining 370,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 "Red Indians" in Canada.

RELIGIONS.—Of the total population over 210,000,000 are Hindus, 100,000,000 Muhammadans, 80,000,000 Christians (67,000,000 Protestants, 13,000,000 Catholics), 12,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT.—There is no fundamental law upon which the Constitution of the British Empire rests, but there are three main principles underlying its administration, viz., self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the central Government. The third principle is of modern growth, and may be said to be the outcome of the *Imperial Conference*.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Premiers of the various self-governing Dominions, representing their nations at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in London in 1897, 1902, 1907 and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of Great Britain. In 1917 and 1918 the Conference, which was held concurrently with the sessions of the Imperial War Cabinet, was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the *Premiers' Conference*, under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Empire as a whole. The constitution of the Conference, which again met in 1923 and 1926, is as follows:—*President*. The Prime Minister of Great Britain, *Chairman* (*in the absence of the President*), The Secretary of State for Dominion Affairs, *Members*, The other Ministers of Great Britain, the Prime Ministers and other Ministers of Canada, Australia, New Zealand, Union of South Africa, the Irish Free State, and Newfoundland, the Secretary of State for India and other representatives of India. The Secretariat of the Conference is provided by the Governments represented.

SELF-GOVERNMENT.—(1) *Great Britain*.—The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the British Government are the King, the Legislature (House of Lords and House of Commons); the Executive, appointed by the Sovereign and responsible to Parliament; and the Judicature.

(2) *The Indian Empire*.—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible

to, and represents the authority of, Parliament Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council of State of 60 members (of whom not more than 20 are government officials), and the Legislative Assembly of 144 members (26 official and the remainder elected)

(3) *Imperial Dominions* —All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that Dominion is specially mentioned. If the legislature of a Dominion enacts a law which is repugnant to an Imperial law affecting the Dominion, it is to the extent to which it is repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed, by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent; by a suspensory clause and the refusal of the Royal assent Subject to such control the parliament of a self-governing Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—

(*a*) *Those having Dominion Status.* Where "Dominion Status" is enjoyed the executive is entrusted to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature of the Dominion. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, the Irish Free State and Northern Ireland Malta, Southern Rhodesia and Northern Rhodesia have "responsible government," but certain powers are reserved.

(*b*) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritius.

(*c*) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown* Dominions so governed include Ceylon, Falkland Islands. Fiji, Gambia, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(*d*) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(*e*) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown. The protectorates of the British Empire include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(*f*) *Spheres of Influence* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(*g*) *Mandatory Spheres*, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by mandate from the League of Nations Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish governments of Palestine and Mesopotamia.

SELF-SUPPORT —With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure Occasional grants are made by the Central Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development Certain capital expenses are also undertaken from time to time by the Central Authority, *e g*, the Nigerian purchase, the Uganda Railway, &c No taxes are imposed on the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons, this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF-DEFENCE —The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Central Government Questions affecting general strategical defence are considered and determined by the *Imperial Defence Committee*, which co-ordinates the work of the sea, land and air forces. In the Great War of 1914-1918 the Dominions provided Armies or Contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved. The land and air forces of the Dominions are maintained at the expense of the Dominions concerned.

The contribution of the Dominions to *Naval Defence* takes the form of maintenance of their own naval forces and establishments by the governments of Canada, Australia, New Zealand and Union of South Africa, and of contributions to Imperial Defence by the governments of Hong Kong, Straits Settlements, Ceylon and Mauritius. Hong Kong also provided the sum of £120,000 towards the cost of the Singapore base, the site of which was provided by the Straits Settlements The Naval Estimates 1925-26 of Canada provided the sum of $1,400,000; of Australia £3,921,145; of New Zealand £538,325; and of the Union of South Africa £139,893 The naval expenditure of the United Kingdom in 1925-26 was £60,500,000.

THE LEGISLATURE —The Parliament of Great Britain is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs. The Secretary of State for the Dominions and Colonies is a Cabinet Minister, his active participation in the government of the nations of the Empire decreasing with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State.

THE JUDICATURE.—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (*see* p 241) consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. Universities (*see* p 322) and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the British Dominions and Colonies, the United States of America, and the German Empire. The German scholarships were abolished by Act of Parliament in 1916, and re-allocated to various parts of the British Dominions, while the trustees have from time to time created other scholarships as the funds in their hands permitted. *Rhodes Scholarships* are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony), in New Zealand, Newfoundland, Jamaica, Bermuda and Malta. They are of the annual value of £400, and are tenable at any College in Oxford. The normal number of Rhodes scholars in residence together is about 196, of whom 100 come from the British Empire and 96 from America. *Secretary to the Rhodes Trustees*, P. H. Kerr, C.H. 17, Waterloo Place, London, S.W.1. *Oxford Secretary*, F. J. Wylie, M.A., 9, South Parks Road, Oxford.

Statistics issued by the Universities Bureau of the British Empire show that the *total* number of students from overseas attending Universities and Colleges in the United Kingdom at the beginning of the 1926–27 session was 4,596, of whom 1,054 are from Africa, 824 from America, 1,754 from Asia, 643 from Europe, and 321 from Australasia. The principal figures are: India, Burma, and Ceylon, 1,361; South Africa and Rhodesia, 624; United States, 449; Egypt, 338; Australia, 196; Canada and Newfoundland, 156; West Indies and Bermuda, 129; China, 112; Russia, 73; New Zealand, 123; France, 42; Japan, 86; Switzerland, 39; Rumania, 27; Greece, 20; Netherlands, 43; Denmark, 18; Norway, 19; Spain, 30; Poland, 39.

In 1923 the *Davison Scholarships* to enable 3 Undergraduates from Oxford and 3 from Cambridge to attend the Universities of Harvard, Yale and Princeton, U.S.A., were founded by Mrs. Henry P. Davison of New York, U.S.A. *Secretaries of the Selection Committee*, A. C. Jacobs, Oriel College, Oxford; A. L. Goodhart, Corpus Christi College, Cambridge.

Under *The Commonwealth Fund* (1, East 57th Street, New York, U.S.A.), established in 1918 by Mrs. Stephen Harkness, 20 Fellowships, of the annual value of $3,000 each, are tenable for two years at certain American Universities by British graduate students of either sex, unmarried, and not over 30 years of age.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. Until the close of the Great War the tariff of the United Kingdom was imposed without distinction on foreign and Imperial merchandise, but recent legislation foreshadows a general change of fiscal policy. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. Advances so made in 1925–26 included £110,000 to *Nyasaland* in aid of expenses of administration; £19,604 and £380,276 to *Tanganyika* for capital expenditure on revenue-producing undertakings; £100,000 to *Northern Rhodesia* in aid of expenses of administration: in 1926–27 £120,000 to *Nyasaland* (administration), and £42,000 to provide additional capital for the phosphate industry in *Nauru* and *Ocean Islands*; and in 1927–28 £50,000 to *Nyasaland*, £20,000 to *Nauru* and *Ocean Island*, and £30,000 to *Somaliland*.

PRODUCTION.—Canada, India, Australia, and Great Britain are the principal wheat-producing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats, rice and maize, and tea, coffee and rubber are largely cultivated, while more than half the world's output of cocoa was produced in British Dominions. Cane sugar is produced in India (for local consumption), West Indies, Australia, New Zealand, Natal, and Mauritius, and beet sugar in Canada and elsewhere. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the U.S.A.; coal is also abundant in Australia, Canada, India and South Africa. Cotton is extensively grown in India, West Africa, East Africa Sudan, West Indies, and in the tropical parts of Australia, but of the 11,725,521 centals imported in 1921 only 500,000 centals came from British Dominions. In 1921 the imports of chemical and mechanical wood pulp for paper-making amounted to over 590,000 tons, but Canada produced half as much again, her product being largely sent to the United States, while Newfoundland sent 26,838 tons to Great Britain. Iron ore is found in many of the Dominions, and pig iron is largely produced, tin is produced mainly within the Commonwealth (particularly in the Malay peninsula), while 70 per cent. of the world's supply of gold is drawn from South and South-West Africa, Australia, New Zealand and Canada; it is produced also in Borneo, British East Africa, British Guiana, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa. Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India, Trinidad and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

CENSUS POPULATION OF GREAT BRITAIN AND IRELAND

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1570 ..	4,160,221	1670 ..	5,773,646
1600 .	4,811,718	1700 .	.6,045,008
1630	5,600,517	1750	6,517,035

The first general *Census* of Great Britain and Ireland was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

1801 .	..16,345,646	1871..	. 31,845,379

CENTRAL GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), which secured annual parliaments and the equal administration of justice; the *Habeas Corpus Act* (1679), securing the liberty of the person; the *Act of Settlement* (1701), providing for the Protestant succession to the throne; the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), the *Parliament Act* (1911), which enabled the Commons to pass certain Acts without the concurrence of the other chamber, the *Government of Ireland Act* (1920), and the *Irish Free State (Agreement) Act*, 1922.

The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign*.—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right will, however, enable an injured subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.

2. *The Legislature*.—Parliament consists of two Houses, the Lords and the Commons.

(*a*) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (16) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(*b*) *The House of Commons*.—This body consists of 615 members, elected by the registered male and female electors in county, borough, and university constituencies. Practically all persons over 21 years of age are qualified to vote at elections. The maximum duration of Parliament is five years. Members of the House of Commons receive annual salaries of £400 and travelling facilities over the railways to and from their constituencies.

3. *The Executive*.—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The *Cabinet*, under the presidency of the Prime Minister consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (*see* page 167). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure, they may be dismissed at any moment.

4. *The Judicature*.—(*a*) *England and Wales*.—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases arising in the county are tried on circuit by judges of the King's Bench at the Assizes. The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, *e.g.*, the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court, those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in England are: (1) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," *see* p. 246) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) *The Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(*b*) *Scotland*.—Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (*see* p. 250) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(*c*) *Northern Ireland*.—The higher courts in Northern Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions.

LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1919) The subjects which local bodies administer are, *inter alia*, the poor law, the laws relating to public health; the maintenance of the police, the control of the sale of intoxicating liquors; the provision of lunatic asylums Local authorities also have to administer and carry into effect the laws as to elementary and other schools. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each County (under Chairmen), for each City and Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, or Parish Councils with Chairmen.

POLICE

The strength of the Police force was 57,089 in England and Wales (1926), and 6,586 in Scotland (1926) The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office The LONDON POLICE consists of the City Police and of the Metropolitan Police The *City Police* district comprises an area of 675 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (*see* p 246). Although the area is comparatively small, the rateable value is enormous, and there are 13,706 night residents The Force under the Commissioner comprises 1 Assistant Commissioner, 3 Superintendents, 7 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 125 Sergeants, and 983 Constables, also 19 Constables on private service duty

The *Metropolitan Police* district embraces an area of 447,626 statute acres, with a population of about seven and three quarter millions. There are within this area fourteen Police Courts (*see* p. 247). The Force on Sept 15, 1928, consisted of 35 Superintendents, 665 Inspectors, 2,956 Sergeants, and 16,382 Constables, making a total of 20,038, with 264 horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept 15, 1928, was 22,891 The gross expenditure of the Metropolitan Police and Metropolitan Police Courts for the year 1927-28 was £8,100,878 On March 31, 1928, there were 12,949 Police pensioners, and 904 pensioned widows and 415 children.

* Budget Estimate

THE BUDGET, 1928–1929.

The Budget of Great Britain for 1928–1929 was introduced on April 24, 1928, by the Chancellor of the Exchequer (Mr Churchill) The financial year 1927–1928 ended with a realized *surplus* of £4,239,124, in spite of additions to the estimated expenditure, including £3,000,000 for the Shanghai Defence Force, £2,000,000 additional cost of Treasury Bills, £6,000,000 additional interest on Savings Certificates, £3,000,000 loss on Excess Profits Duty, £3,000,000 shortfall on the Betting Tax, £5,000,000 drop in the revenue from Beer, and £2,500,000 of ordinary Supplementary Estimates These additions to expenditure were made good by an excess of £9,500,000 in the yield of Death Duties, £4,500,000 repayments by Kenya and Palestine, together with increases in Miscellaneous Receipts and a saving of £10,500,000 through economies in various Government Departments The balance sheet for the year 1928–1929 also showed a considerable surplus (£14,502,000) when allowance was made for the proposed additions to and remissions of taxation, and a new system of accounting was introduced under which "self-balancing" Revenue and Expenditure are omitted from the totals, thus bringing about an apparent decrease of £78,614,000 in the figures as compared with last year.

Self-Balancing Revenue and Expenditure.

Post Office —Revenue required to meet Post Office expenditure (including £3 328,000 for Pensions), £57,314,000 *Road Fund.* —Motor Vehicle Duties apportioned to Road Fund, £21,300,000.—Total, £78,614,000.

Bank and Currency Notes.

A Bill to be introduced for the amalgamation of the Currency Notes (Treasury Notes of £1 and 10s.) and Bank of England Notes, to take effect in 1928.

Relief to Industry.

Rating Relief.—Mr. Churchill introduced his scheme of rating relief with the observation that the present system, dating from the XVIth century, was wholly unsuitable for modern industrial conditions. The chief features of the scheme, which will cost the Exchequer £39,000,000 a year and will not come into operation till October, 1929, are:

(a) All buildings or other property used for the purposes of production by means of manual labour to be relieved of three-quarters of the local rates.

(b) Agricultural land and buildings which already enjoy relief to the extent of three-quarters of the rates to be completely and permanently relieved of all rates, the farmer continuing to pay rates on his residence in the ordinary way.

(c) Full compensation for the loss of revenue to local authorities to be included in a new scheme of grants from the Exchequer.

(d) A similar remission of rates to be granted in the case of railways, canals, harbours, and docks, conditionally upon their making equivalent reductions in their transport charges wherever practicable The main railway companies concerned have accepted the principle of this arrangement

Buildings such as offices and residences are outside the scheme.

(e) The whole of the relief granted to the railway companies—upwards of £4,000,000—is to be passed on in the form of reduced freights. It is proposed that the whole amount of the relief should be concentrated upon the following heavy traffics: one-fifth to agriculture, and the other four-fifths to be concentrated upon coal, coke and patent fuel, mining timber, ironstone, iron ore, manganese ore, and limestone for blast furnaces and steel works.

The rating relief to railways is estimated at £4,000,000, which would mean an eight per cent. reduction on existing traffic The only advantage which the railways will gain will be the increased traffic.

It is claimed that the scheme could be achieved without any marked increase in the rates of any area, the main features being larger areas and lower rates. The necessary main Local Government Bill to be introduced and passed through all its stages by the end of 1928.

Economy.

Mr Churchill stated that the Exchequer had survived an arduous year, largely owing to the continuous economy campaign carried out by the Government, and announced a five-year scheme for a further reduction of 11,000 posts in the Civil Departments There was also a possibility of reductions in the headquarters and offices of the Defence Departments.

Estimated Surplus.

Mr. Churchill estimated that he would have a surplus of £18,741,000 (£4,239,000 from 1927-28 and £14,502,000 from 1928-29). This is.

(1) Available for contingencies.

(2) To be held as a Suspensory Fund to finance the Rating Relief Scheme when it takes effect in October, 1929.

The first payment of Sur Tax will become due on January 1, 1930

Notes on Income Tax

Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions abatements, and reliefs were replaced by the various reliefs set out below. In introducing the new system, the Act employed two terms not previously used in connection with the Income Tax, viz., "assessable income and "taxable income."

"*Assessable Income*" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount or the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income as computed for Income Tax purposes

"*Taxable Income*" means that part of the "assessable income" upon which Income Tax is actually charged, that is, the "assessable income" less the various deductions referred to below.

Deduction in arriving at Assessable Income Earned Income Allowance—The differentiation in favour of "earned" income is made, not as before 1920 by reducing the rate of tax chargeable upon such income as compared with investment income, but by deducting one-sixth of the "earned" income in order to arrive at the assessable income The deduction is given irrespective of the amount of the total income, but must not exceed £250 for any one individual. The "assessable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income

The Finance Act 1925 provided for a special allowance of one-sixth of the total income (from whatever source) of persons of the age of 65 years and upwards whose total income does not exceed £500 This allowance is granted, in the case of a married couple, where *either* the husband *or* his wife, living with him, has attained the age of 65 years at the commencement of the year of assessment, but the *joint total income* must in such a case fall within the prescribed limits Provision is also made for marginal relief, in order to avoid the hardship which would be involved when the total income falls just over the prescribed limit of £500.

Total Exemption—Exemption from tax may be claimed where the total assessable income does not exceed £135, or in the case of an individual whose wife is living with him, £225 Where the income is wholly earned, these limits are equivalent to £162 and £270 respectively *See* above

Deduction from Assessable Income in order to arrive at Taxable Income.—Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income *The deductions may be claimed irrespective of the amount of the taxpayer's total income.*

Personal allowance may be claimed of £135, or, in the case of an individual whose wife is living with him, £225

Wife's Earned Income—When a taxpayer's total income includes any earned income of his wife, the personal allowance of £225 is increased by a sum equal to five-sixths of the amount of such earned income, subject to a maximum additional allowance of £45

Deduction for a Widower's (or Widow's) Housekeeper taking Charge of Children—A deduction of £60 may be claimed under certain conditions, by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (*see* below) is given or in the capacity of a housekeeper or by a widow who has a female relative resident with her for the like purpose If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person employed for that purpose

Deduction in respect of Widowed Mother, &c., taking Charge of Children—A deduction of £60 may be claimed, under certain conditions, by an *Unmarried Person* who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (*see* below) is given.

Deduction for Children—A deduction may be claimed in respect of each child, step-child, or adopted child under the age of 16 years or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. The deduction allowable is £60 in respect of one child, and £50 in respect of each additional child for whom the relief is due. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £60 a year

Deduction in respect of Dependent Relatives.—A deduction of £25 may be claimed in respect of (*a*) any person whom the taxpayer maintains at

his own expense, and who is a relative of his or of his wife and incapacitated by old age or infirmity from maintaining himself or herself, or (*b*) his or his wife's widowed mother, whether incapacitated or not, or (*c*) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity The deduction under (*a*) or (*b*) is conditional, however, upon the income of the dependent relative not exceeding £50 a year The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above

Rates of Tax chargeable on the "Taxable Income"—The following provisions as to the rates of tax chargeable on the taxable income (*i e*, that part of the income on which tax is actually charged) apply, *whatever the total amount of the income*. The first £225 of the taxable income is chargeable at half the standard rate of tax, *i e*, for the year ending April 5 1929 at 2s 0d in the £ The remainder of the taxable income is chargeable at the standard rate of tax, *i e*, at 4s 0d in the £

Relief in respect of Life Assurance Premiums —Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates —one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916, irrespective of the claimant's total income, and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2 000, and at the standard rate in the £ where his income exceeds £2,000

GAME AND GUN LICENCES

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes, proprietors, or tenants, on enclosed land, killing rabbits, persons hunting deer, or hares, with hounds by owners or occupiers, or their servants, killing deer on their own enclosed land, beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game" a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, territorial soldiers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorise any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows :—

STATE EXPENDITURE, 1928-29.

INCREASES OF EXPENDITURE

The increase in our national expenditure per head of the population when compared with the year preceding the Great War, is revealed in a written answer given by the Financial Secretary to the Treasury in the House of Commons (July 1927). The population for the year 1913-14 included the whole of Ireland and totalled 45,713,000, while for 1926-27 only Northern Ireland was included, the number being 45,227,000. The expenditure under the various heads was:

Service	Per Head 1913-14	1926-27
Consolidated Fund	£0 15 4	£9 5 2
Fighting Services—		
Navy	1 1 4	1 5 6
Army	0 12 5	0 19 3
Air Force	—	0 6 11
Total fighting services	1 13 9	2 11 8
Civil Services	1 3 7	5 6 4
Revenue Departments	0 12 9	1 9 4
Total	£3 6 5	£18 12 6

Under Consolidated Fund services the National Debt rose from 20s 8d to £8 7s 5d, and the Road Fund from 7½d to 7s 8d. With regard to the Civil Service, Education increased from 8s 6½d to £1 2s 11½d; Old Age Pensions and Widows' Pensions from 5s 7½d to 23s 2d; Ministry of Pensions from nothing to £1 8s; and Ministry of Labour and Unemployment Grants and Insurance from 3½d to 7s 11d.

TAXATION PER HEAD

The amount of taxation per head of population in various countries is shown in the following table:—

Country.	Year 1913 or 1913-1914	1925 or 1925-1926
	£ s. d.	£ s. d.
Australia	3 8 1	9 1 6
Canada	3 8 3	6 19 4
France	3 7 0	8 5 10
Germany	1 10 8	5 6 5
Italy	2 2 8	3 8 9
New Zealand	6 3 0	14 0 9
South Africa	6 15 4	11 17 2
United Kingdom	3 11 4	15 2 8
U.S.A.	1 7 11	6 1 11

The figures for the Union of South Africa are calculated on the basis of the population of European origin only.

The expenditure of the various departments of the State is met from two main sources, (1) supply grants, (2) receipts appropriated in aid. Together these form the *gross* expenditure for the year, the *net* expenditure being the amount raised by taxation for the particular purpose. The actual total expenditure of public departments comprises the supply grants and appropriations in aid combined, as these figures represent the total cash sums placed by Parliament at the disposal of departments. The Estimated Expenditure given below accounts only for the *net* expenditure, after taking credit for receipts appropriated in aid of expenditure.

THE NATIONAL DEBT.

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,263 until the "Glorious Revolution" of 1688, which added nearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II about £87,000,000 were added. In the first twelve years of George III nearly £20,000,000 of this paid off. The American War added £121,000,000, making the total nearly £350,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £602,500,345 were added to the debt for the purposes of the war.

The amount of the Debt in January, 1816, was £900,436,000 (funded, £816,312,000; unfunded, £44,727,000; Annuities £39,397,000), the annual charge being nearly £33,000,000.

At the accession of Queen Victoria the amount stood at nearly £788,000,000, with an annual charge of £29,000,000. Small sums were paid off annually from 1837–1854, when the Russian War added £33,000,000 to the Debt. Repayments were made from 1858 onwards, with slight increases in 1868, 1875, 1878, 1879 and 1886.

On March 31, 1899, the "Dead Weight" total was £635,070,625, being a decrease since 1837 of £152,000,000. For the South African and Chinese wars £142,752,190 was raised, but from April 1, 1903, to March 31, 1914, the sum of £115,518,571 was paid off, and the total Debt on March 31, 1914, was £662,473,765.

In the financial year 1914–15, and in the five subsequent years the Great War caused enormous increases, the aggregate of the National Debt standing at its highest point (£7,878,607,166) on March 31, 1920; while the cost of Interest and Management increased from £21,500,000 in 1914–15 to £349,538,616 in 1920–21.

The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at $4,604,128,085, of which $4,128,085 was to be repaid at once in cash and the balance funded at 3 per cent. for 10 years and 3½ per cent. thereafter, until redeemed by the operation of an accumulative sinking fund of ½ per cent. in 62 years. Interest is payable on June 15 and Dec. 15 in each year at the rate of 3½ per cent. for the first 10 years, and 4 per cent. thereafter, to include the sinking fund.

OTHER CAPITAL LIABILITIES

These sums are not included in the capital on which interest is arranged for in the permanent charge They consist of various loans contracted for Telegraph and Telephone extension, for the purchase of land for Government offices, &c On March 31, 1928, these liabilities stood at £103,155,792, an increase of £5,085,535 upon the total for the previous year an amount of £6,850,576 having been created and £1,765 044 having been redeemed during the year

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to creditors of bankrupt estates

Loans Guaranteed by British Government — The Nominal Net Liability of the State in respect of loans guaranteed by the British Government was stated on March 31 1928, to be as follows — Turkish Loan, £3,815,200 · Egyptian Loan £4,665,100, Greek Loan, £3,077,600, Mauritius Loan, £113,581, Transvaal Loan, £21,587,443, Sudan Loan, £11,643.400; Welsh Church Loan £2,209,442, Local Loans, £358,429.532, Irish Land Purchase Stock, £114,245,959; Ulster Savings Certificates, £1,750,613, 2½ per cent of the Austrian Guaranteed Loan, secured on the gross receipts of Austrian Customs and Tobacco monopoly; and Palestine Loan £4 475,000

The Sinking Fund.

In the Budget of 1928-1929 the Chancellor of the Exchequer (Mr Churchill) announced a new fixed Debt Charge of £355,000,000 a year, which comprised all the assets and covers all the liabilities and provides the amount of £51,000,000 required to meet specific sinking funds on certain Government stocks and £20,000,000 a year for the service of Savings Certificates The interest saved by annual repayments of debt and by economies in administration are added each year to the sinking fund, and if the payment of £355,000,000 a year is steadily maintained the entire debt, internal and external, including our debt to the United States of America, will be extinguished in exactly 50 years, without any addition to present taxation. The amounts available for this Sinking Fund and for the interest on Savings Certificates for the six years 1928-1933 are —

1928	£78,500,000	1931	£72,000,000
1929	66,500,000	1932	73,500,000
1930	69 000 000	1933	71,000,000

Reductions in the Debt by means of a sinking fund were first made in 1875 by Sir Stafford Northcote, who set up the *New Sinking Fund*, consisting of the balance of the Annual Charge after providing for interest and cost of management That term was afterwards applied to the fund set up by Mr Stanley Baldwin in 1923; the *Old Sinking Fund*, was the application of the surplus revenue of any year for the redemption of debt when so determined by Parliament. Debt reduction is also made by means of *Terminable Annuities*, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable, *Victory Bonds Sinking Fund*, by means of which Victory Bonds drawn for repayment on Sept 1 of each year are discharged (£2 390,573 in 1928); *Funding Loan Sinking Fund*, £2,952.896 applied in cancellation of Debt in 1927-28, *Conversion Loan Sinking Fund*, £14,701 273 applied in purchase and cancellation of £19,340,663 in 1927-28, *4 per cent. War Debts

In the House of Commons on Nov 10, 1927, the Chancellor of the Exchequer said that an agreement for the settlement of the War Debt of Yugoslavia to Great Britain was signed on Aug 9 The relief debts of the Yugoslav Government to this and other countries were to be repaid in full, with interest at 6 per cent. up to Jan 1, 1927 and at 5 per cent thereafter, within a period of fifteen years, from Jan 1, 1927 Funding agreements have now been signed in respect of all the Allied war debts to Great Britain except that of Russia, and arrangements have been made for the repayment in full, with interest, of all the relief debts except that of Austria, which was postponed for twenty years on the flotation of the League of Nations Loan in 1923, and that of Armenia, which was now part of the Soviet Union A debt settlement had also been arrived at with France, but France had not yet ratified the settlement, although so far the payments had been made France had paid in full the amounts which had so far fallen due under the scheme agreed, and the Chancellor of the Exchequer had no doubt she would continue to do so There was an *echelle* by which the payments increased in the earlier years from £6,000 000 until they reached £12,500,000 per annum. We had now completed the year in which £6,000,000 were due, and were entering upon the year in which £8,000 000 were due

Debt of France to U.S.A.

Negotiations between the two Governments have resulted in an offer by France to pay an average sum of about £18,000,000 per annum (£8,000,000 for 5 years, £12,000,000 for 7 years £20,000,000 for 50 years)

Defaulting Debtors.

The Council of Foreign Bondholders reported in 1923 that a total of £1,782,544,291 of principal is owing by States which do not pay their debts, in addition to over £486,000 000 for interest due. The Fifth Annuity

On Sept 1, 1928, Germany entered on the fifth annuity year fixed by the Committee of Experts which sat under the presidency of General Charles G. Dawes, in the early part of 1924, to regularise the payment of Reparations The sum to be paid by Germany in 1928-9 is 2,500,000,000 *GM*, or £125,000,000, in contrast with 1,750,000,000 *GM*, or £87,500,000 for the year ended on Aug. 31, 1928 The annuity reached the "Standard" figure on Sept 1, 1928, and is liable to an addition, after the close of the year 1928-9, computed on an index of prosperity, based on the statistics of imports and exports, Budget receipts and expenditure, railway traffic, consumption of sugar, tobacco, beer and alcohol, coal consumption, and growth of population This provision indicated the view of the Dawes Committee that the "Standard" rate of annuity did not exhaust Germany's capacity to pay, but was calculated to leave a sufficient margin to secure Budgetary equilibrium and currency stability in Germany. This view has been fully justified by the experience of the first four years 1924-5 to 1927-8, as the annuities have been paid regularly and with apparent ease, and all the available data indicate that they have been compatible with a continuous development and strengthening of Germany's economic resources. In the third year 1926-7. when the annuity was originally fixed at 1 200,000,000 *GM* (£60,000,000) a supplementary contribution of 300,000,000 *GM* (£15,000,000) was forthcoming from Budget revenue.

Sources of the Payments.

It is from tax revenue that the additional 750,000,000 *GM* (£37,500,000) to be paid in 1928-9, as compared with 1927-8, should be supplied. making the total of the Budget contributions under Schedule *B* 1 250 000.000 *GM* (£62.500,000) Otherwise the sources are to be the same as in 1927-28, namely, 660,000,000 *GM* (£33,000,000) from railway earnings, 290,000,000 *GM* (£14,500,000) from the transport tax, and 300,000,000 *GM* (£15,000,000) from industrial Debentures So far, all the sources have proved equal to the requirements of the Dawes scheme, the remittance of the money, possibly also the actual payments themselves, having been facilitated by the freedom with which Germany has borrowed abroad Between the beginning of 1925 and the end of May, 1928. the Agent-General for Reparation Payments estimated that Germany had borrowed from abroad no less than 5,140,000,000 *GM* (£257,000,000), while the reparation payments during the same period had aggregated 4 250,000,000 *GM* (£226,000,000). This total of foreign borrowings does not include the loan of 800,000,000 *GM* (£40,000,000) at 7 per cent authorised by the Dawes Committee, and floated in October, 1924, for the double purpose of ensuring currency stability and financing deliveries in kind during the period of economic rehabilitations

GREAT WAR PENSIONS.

THE rates of disability retired pay and pensions in respect of disablement due to service in the Great War are contained in the Royal Warrant of July 2, 1920, (*Officers and Nurses*), the Royal Warrant of December 6, 1919, (*N C O's and Men*) and the corresponding Orders in Council and Orders applicable to the *Royal Navy* and *Royal Marines* and the *Royal Air Force*.

Fresh applications for compensation in respect of disablement claimed to be due to service in the Great War can no longer be entertained under these authorities, since the period of seven years from the date on which the claimant's active service terminated, or the date fixed (August 31, 1921) as the end of the Great War, whichever is the earlier has now expired in all cases.

This limit on the making of fresh claims was accepted unanimously by Parliament after full explanation, and is embodied in Section 5 of the *War Pensions Act*, 1921.

DISABLEMENT PENSION

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of injury or disease attributable to or aggravated by war service. Such temporary award usually runs for a period of 12 months and is from time to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act 1921 and the Regulations made thereunder. Under that authority a system of final awards has been brought into operation, the effect of which is to stabilise pensions, gradually to eliminate recurring medical examinations, and to bring about finality as to the amount of pension to be awarded. A man, on receiving notification that a final award has been made to him has a right of appeal, subject to certain conditions to an independent Assessment Appeal Tribunal, whose decision is final and binding on both the Ministry of Pensions and the appellant.

At March 31, 1928, out of some 507,000 pensions in payment to disabled officers and men, about 350 000 were final awards.

Disablement, for the purpose of pension, is assessed on a percentage scale. Total disablement is reckoned at 100 per cent, and the lowest degree entitling to pension is 20 per cent. Where the disablement is assessed at less than 100 per cent. the disablement pension and any allowances attached thereto are proportionately reduced. For instance, a private 50 per cent disabled would receive 50 per cent of the full rate of pension and 50 per cent of the full rate of allowances for wife and children (if eligible).

Disablement assessed at less than 20 per cent is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks.

The Great War Pensions expenditure during the year ended March 31, 1928, amounted to about £59,750,000, and for the current year ending March 31, 1929, is estimated to amount to about £57,000,000. This will bring the aggregate expenditure of the Ministry of Pensions since 1917, and of the Service Departments from 1914 to 1917, together, to £860,000,000.

RATES OF PENSION.

The following are some of the principal rates of weekly pension for a private soldier 100 per cent. disabled, and of pensions or allowances for dependants of a private soldier:—

Private—40*s*., wife's allowance 10*s*., children's allowances—7*s*. 6*d*. for first child and 6*s*. for each other child, (if there is no wife, 10*s*. for the first 7*s*. 6*d*. for the second, and 6*s*. for each other child).

Widow—over 40 or with children 26*s*. 8*d*.; under 40 and without children 20*s*., allowances for children 10*s*., 7*s*. 6*d*., 6*s*.

Parents—need-pensions not exceeding 20*s*. Provision is also made for other dependants.

A totally disabled man who is certified to require constant attendance may receive an additional allowance not exceeding 20*s*. a week.

Treatment

The Ministry of Pensions provide courses of treatment for disabilities accepted as attributable to or still aggravated by service, and if in consequence of and during a course of treatment a man is unable to provide for his own support and that of his family, treatment allowances may be granted in lieu of pension and allowances.

In the course of its eleven years of work the Ministry of Pensions has spent on medical treatment and its accessories about £55,000,000, and another £34,500,000 in special allowances to the patients and their families, during the treatment, in addition to their ordinary pensions.

THE WAR BONUS.

In order to counteract the increase in the *Cost of Living* the Government introduced a *Bonus Scheme*, under which salaried Civil Servants and wage earning Government employees receive temporary additions to their salary or wages. The scheme was applied, irrespective of age or sex, as from March 1, 1920 the limit of the addition in any case being £750 per annum. The Government Bonus Scheme has been adopted generally by Public Authorities, certain modifications being made in particular instances. The scheme formulated a basic rate of increase, producing a basic addition to salaries or wages, and this basic rate rises or falls 1 *twenty-sixth* in response to every *two points* rise or fall in the Index figure average of prices over a six months' period. The standard cost of living in March 1920, was 130 per cent. in excess of that of July, 1914, and the scheme of increase agreed by the *Whitley Council* is as follows :—

Where the ordinary rate of remuneration does not exceed 30s per week—130 per cent increase.

Where the ordinary rate of remuneration exceeds 30s a week, but does not exceed £200 per annum—130 per cent on the first 30s a week (£91 5s per annum) and 60 per cent on the excess over £91 5s.

Where the ordinary rate of remuneration exceeds £200 per annum—130 per cent on the first £91 5s, 60 per cent on the next £108 15s and 45 per cent. on the amount in excess of £200 up to £500.

In addition to the reduction caused by the anticipative decline of the cost of living figure the following decreases have been introduced :—

10 per cent on salaries from £500 to £700, 15 per cent on salaries from £700 to £800, 20 per cent on salaries from £800 to £900, and so on until 60 per cent is reached in the case of salaries of £1,600 a year.

Details of the Bonus addition to Salaries and Wages, under the scale in force for 6 months from Sept 1928, are shown below —

The Sutton Judgment —On Nov 5, 1924, the House of Lords decided that a Post Office employé, who had enlisted in Sept 1915, and was demobilised in May 1919 after foreign service, was entitled to receive the War Bonus that would have been payable to him if he had remained at home in the service of the Post Office. This decision was based on the words of a circular which referred to "full civil pay in addition to military pay and allowances." In consequence of this judgment, Government employes who enlisted under that, or similar circulars received varying amounts to a total of about £3,000,000, and many municipalities and other public bodies paid similar claims in full or upon a compromise scale.

Home Consumption.

In a normal year about 200,000.000 tons of coal are available for home consumption, of which about half is absorbed in domestic use and in factories. Railway locomotives require about 14,000.000 tons, gas works 16,000,000 tons; coke production 17,000,000 tons, of which about half (with 1,500 000 tons of coal) is consumed by blast furnaces; colliery engines require about 17,000,000 tons, and coal miners receive about 6,000,000 tons; electrical generating stations require about 7,000,000 tons, and coasting ships require over 1,000,000 tons.

EXTERNAL TRADE (GREAT BRITAIN AND NORTHERN IRELAND).

IN statistics of Trade, the term GENERAL TRADE refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term SPECIAL TRADE includes only *Imports for consumption* by the country receiving them, and *Exports of home produce or manufacture*. Imports are taken at their C.I.F. value (which includes the *Cost* of the merchandise and the charges for *Insurance* and *Freight*), whereas Exports are taken at their F.O.B. (free on board) value, which includes only the *Cost* of the merchandise delivered to the exporting ship. Exports have an added value by the time they reach their destination, having become loaded *en route* with Insurance and Freight. They leave the country of origin with an F.O.B. value and arrive with an accrued C.I.F. value.

Postal Traffic

Average Daily Receipts, 1925-8.

The following table (*Board of Trade Journal*) gives the average receipts of the Post Office in Great Britain from postal traffic, per working day, for each month from January, 1925. Telegraph and Telephone receipts, Savings Bank and Money and Postal Order business are excluded. The value of postage stamps used for receipt stamp and other revenue duties is included. The figures are an approximately correct index of the movement from month to month of the amount of postal traffic handled, expressed in terms of postage, and may be regarded as a reflection of the state of the country's trade.

COMMUNICATIONS.

Roads

The total mileage of public roads in Great Britain is approximately 179,000 miles, of which 154 000 are in *England and Wales* and 25,000 in *Scotland* The cost of maintenance and improvement in 1914-15 was £18,800,000 and in 1925-26 about £55,000,000 The roads of Great Britain have been classified by the Ministry of Transport, and out of the total mileage of 179 000, 25 139 have been included in Class I and 15,685 miles in Class II

The maintenance and repair of bridges and main roads is within the jurisdiction of the County authorities, other roads being maintained by Borough, Urban and Rural Councils The motor licence duties (referred to below) are paid into a special *Road Fund* which is administered by the Minister of Transport Grants are made from the Road Fund to highway authorities towards the cost of maintenance and improvement of roads and bridges During the year 1927-28 the grants from the Road Fund amounted to £18,830,278 The bulk of this money was directed to assisting highway authorities in the maintenance and improvement of Class I. and Class II. roads and bridges.

Road Taxes.

The total gross receipts from the taxation of road vehicles between Dec 1, 1926, and Nov. 30, 1927, amounted to £23,456,378 The approximate number of motor vehicles licensed during this period was 1,898 500, while licences in respect of private and hackney horse-drawn carriages numbered 103,857 The average receipt in respect of a whole year licence was £14 7s 6d for cars taxed on horse-power, £2 14s. od for motor bicycles, £28 11s 6d for internal combustion and steam-driven goods vehicles, £20 7s od for electric goods vehicles and £46 19s od for motor hackneys

Railways.

On Jan 1, 1923. the Railways of Great Britain were amalgamated into four groups, as under —

	miles
Southern	2,129
Great Western	3 765
London Midland & Scottish	7 464
London & North Eastern	6 464
Total	19,822

Street Accidents.

In addition to the accidents on the various railways of Great Britain, there were 4,030 fatal and 112,741 non-fatal accidents caused by vehicles in the streets of Great Britain and Northern Ireland.

Division	1925 Fatal	1925 Non-fatal	1926 Fatal	1926 Non-fatal

Northern Ireland	59	1,239	73	1.321
Totals	4,030	112,741	4,876	120,805

In 1923 there were 109,425 street accidents in *Paris*, of which 150 were fatal.

Canals.

There are 4,673 miles of canals and canalised rivers in Great Britain and Ireland (England and Wales, 3,641 miles, Ireland, 848 miles, Scotland, 184 miles), no additions to the mileage having been made for several years. In 1925 the inland waterways carried tonnage (so far as returns are available) as under —

	Mileage of Canals	Tonnage carried
Independent	1,538	13,540,000
Railway owned	1,145	2,031,000
Thames	116	31,000
Caledonian and Crinan	70	82,000
Total	2,879	15,684,000

Of the total mileage 1,363 miles were (1905) owned or controlled by railway companies (the longest systems being the Shropshire Union, 202 miles; Grand Junction, 189 miles; Birmingham, 159 miles and Leeds and Liverpool, 145 miles). The total paid-up capital of all the canals was (1905) £47,550,768 The existing system is at its greatest development in the midland counties of England, and in Lancashire and Yorkshire. A Royal Commission, appointed in 1906, reported, in 1909, in favour of a development scheme under an *Inland Waterway Board*, to improve the existing system Their principal proposal was the formation of four main routes (from a centre in South Staffordshire) to the Thames (London), the Mersey (Liverpool), the Humber (Hull), and the Severn (Gloucester), the proposed routes to accommodate barges up to 100 tons. The *Manchester Ship Canal*, opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool; in 1913 the tonnage carried through the canal was 5,780,161 tons, and in 1923 the tonnage of toll-paying traffic was 5,363,940 tons, and the tolls, dues, &c., £1,384,743.

Tramways.

The total mileage of tramways and light railways open in Great Britain on Dec 31, 1926, was 2,602 The total receipts in 1926 were £28,211,000, the working expenses £22,598,000 and the net receipts £5,613,000, the total paid-up capital being £98,121,000 (*gross*) and £57,241,000 (*net*). 4,668,812,000 passengers were carried. In addition there were 21 miles of "trackless trolley" routes.

Posts, Telegraphs and Telephones.

The carriage and custody of the mails has been maintained by the state "from time immemorial." The telegraphs were transferred to the State on Jan 28, 1870, the telephone service became exclusively owned and operated by the Government (with one or two minor exceptions) on the transfer of the National Telephone Company's undertaking to the Post Office on Jan 1 1912. Some of the submarine telegraph cables connecting the British Isles with the various Dominions and Foreign Countries are maintained and operated by the State and some by private companies. The submarine telephone cables from the British Isles to the Continent are either owned entirely by the State or jointly with the Foreign Administration in whose territory the other end of the cable terminates.

Savings Banks.

Post Office Savings Banks.—On Dec. 31, 1927, there were approximately 10 000 000 active deposit accounts in the *Post Office Savings Banks*, with the sum of £284,649,940 due to depositors. On Dec 31, 1927, Government Stock to the amount of £188,648,600 stood to the credit of holders in the books of the Post Office Savings Banks.

Trustee Savings Bank.—On Nov 20 1927, there were 2,412 067 accounts open in the *Trustee Savings Banks*, with £113,905 050 to the credit of depositors. In addition Stocks and Bonds to the amount of £32,930,626 were held for Depositors. There were 443 offices (principal or subordinate).

Savings Certificates.

Three different issues of National Savings Certificates have been made —

First Issue Certificates (cost price 15s 6d and ten-year maturity value 20s.) issued from Feb 1916, to March 31, 1922.

Second Issue Certificates (cost price 16s. and ten-year maturity value 20s.), on sale from April 1, 1922. to Sept. 30, 1923.

Third Issue Certificates (cost price 16s and ten-year maturity value 24s.) on sale from Oct. 1, 1923. Holders of First Issue Certificates, instead of encashing the Certificates at the end of ten years, can adopt any of the following courses:—

1. Retain Certificates until March 31, 1932, with interest after the tenth year at one penny per month per Certificate.
2. Exchange them for Third Issue
3. Transfer into 4 % National Savings Bonds
4. Transfer into 4½% Conversion Loan (1940-44)

EXPRESS DELIVERY SERVICE BY SPECIAL MESSENGER — There are five services of which (4) and (5) alone are available on Sundays —(1) All the way, from most offices which deliver telegrams Inclusive charge, *which must be prepaid*, in cash or by stamps, 8*d* per mile, or part of a mile, with 1*d* on each *separate* packet after the first, up to ten, the maximum; also a special charge of 3*d* on each packet over 1 lb. in weight. Packets must be handed over the counter with "Express" clearly marked in left-hand top corner. Live animals, liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram *gratis*. (2) After transmission by post, at senders request (*a*) from the ordinary delivery office, if open for telegraph business (maximum charge in London 6*d*), or *if so marked*, (*b*) "Express Delivery from Head Office" in large provincial towns, and (*c*) in London "from Head District Office" or "from G P O" Packets must be marked "Express" with a broad vertical line back and front Charges as for (1) (without weight fee) in addition to postage. (3) Before ordinary deliveries, at addressee's request (6*d* per mile for one packet, and 1*d*. for every ten or less additional packets) (4) *see* p. 549 (5) Of a message telephoned to an express delivery office (30 words for each express fee, besides telephone charges) ——Waiting fees: 10 minutes free; each additional 15 minutes or part thereof, 2*d* —For Sundays and Holidays, *see* pp 549-550, and next paragraph.

RAILWAY LETTER.—On payment of 3*d* extra (4*d* between Gt Britain and N. Ireland except Belfast Lane, Derry, Newry) at a Parcel or Booking Office of most railways while the station is open, *week days or Sundays*, an unregistered letter up to 2 oz will be forwarded by the next train or steamer, and passed on from Company to Company It may be called for at station of address, or posted there in the nearest

letter-box, or (*except on Sundays*) delivered as an Express Letter under Service 2*a* (or from the first Express Delivery office it reaches), or (3) by telegraphing for a messenger to meet it under Service 1.

DISPOSAL OF UNDELIVERED POSTAL PACKETS.—*Inland packets chargeable with postage of 1½d. or more*, undelivered are returned unopened if bearing sender's name and address outside; others are opened by the Returned Letter Office and returned to senders without charge. Packets containing neither sender's address nor any enclosure of importance are destroyed, except parcels which, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 1½d.* are redelivered to sender on payment of a second postage if his name and address, with a request for return in case of non-delivery, appear on the outside; those without such request are disposed of. *Foreign letters, &c., undelivered in Britain* are returned unopened, after a short detention, to the countries whence received; *parcels* are disposed of after a reasonable time for inquiry. If containing sender's address, he is advised, and parcel will be returned on payment of fresh postage. *British packets undelivered abroad* are returned to sender here on payment of charges due, but for *parcels* see p. 544.

POSTE RESTANTE (solely for the accommodation of strangers and travellers and for three months only).—Correspondence of any kind may be addressed as above to all Post Offices except Town Sub-Offices. It should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is not taken in, but treated as undelivered. All applicants for "Poste Restante" letters must furnish sufficient particulars to ensure delivery to the proper owner. Poste Restante letters, parcels, &c., from abroad, or letters at a seaport for an expected ship, are kept 2 months, others, 2 weeks, after which they are treated as undelivered (see above), unless bearing a request to return at end of the interval, or some specified *shorter* period.

Letter Post.

The Normal Post of the Country. Most things may be sent by it (except explosive, offensive or obscene matter, eggs, fish, game, rabbits, meat, fruit, and vegetables) (*see* p. 541).

Post Cards.

Postage (*see* p. 541). The left-hand half of the address side may be used for correspondence [the same holds for abroad]. Plain cards (minimum size 4 × 2¾ in.), like but not thinner than official cards, may also be used both inland and abroad (maximum size 5⅞ × 4⅛).

Printed Papers Post (*see* p. 541).

For printed or written matter not in the nature of a letter, and not exceeding 2 lb.

By this post may be sent books and other works of a literary character, with or without written dedications, and any other *written or printed matter not being in the nature of a letter*, drawings, paintings, photographic prints, engravings, maps, &c., together with their binding (provided that the materials are those ordinarily used for the purpose and are not brittle or very fragile), together with anything necessary for the safe transmission of the packet. Commercial printed forms, legal documents, printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted. (For full conditions see the official Guide.) Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, *i.e.*, without breaking, tearing, ungumming, or cutting.

Newspaper Post (*see* p. 541).

For newspapers registered at the G.P.O.

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page. Newspapers not registered at G.P.O. or supplements apart from their ordinary publications, may be charged at printed paper, letter, or (with 1d. fine) parcel rate.

Parcel Post.

For bulky and heavy matter (*see* p. 541). The parcel should be marked "Parcel Post" and handed across the counter or given to a rural postman, and the postage must be prepaid by stamps, affixed by the sender (if underpaid, deficiency plus 1*d.* fine is collected from addressee). Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be inside or (not too prominent) on the outside of every parcel.

A rural postman must accept any inland packets he can conveniently carry, but if on foot or cycle not more than 11 lb. from one person, without notice.

Parcels to or from Irish Free State, Channel Is. or I. of Man are liable to customs duty; except in last case, the sender must declare contents when posting, and addressee must pay fees as for Parcels from Abroad (p. 544) if any duty be payable. Addressees in I.F.S. pay 6*d.* anyhow.

By the *Cash on Delivery Service* (not available with I.F.S.) a sum (Trade Charge) up to £40 can under certain conditions be collected from addressee and remitted to sender of a parcel posted at a Money Order Office or consigned by railway. Fees: For Trade Charge up to 10s., 4*d.*; up to £1, 6*d.*; £2, 8*d.*; £5, 10*d.*; and for each further £5 or less, 2*d.*; by rail, 3*d.* extra.

Abroad.

In the following list the names of countries or places are followed by the ordinary or FULL RATE per word (minimum charge, 1*s.* 3*d.*) from any part of the United Kingdom, whether transmitted by cable or by radio-telegraphy (wireless). OTHER RATES are indicated by signs referred to in footnotes. Certified copy, 5*d.* per 50 words or less (minimum 1*s.* 3*d.*)

Rules for counting of words are more or less as for inland (*see* above), *in address*, name of terminal office counts under class (8) counts as one word. In plain-language telegrams which must be in roman characters) 15 letters, in code 10, in cipher 5, is the maximum number counting as one word. *Prepaid Replies* (minimum 1*s.* 3*d.*) are allowed from most places. The indication for this "RP," counting as one word, must be paid for ("RPD" if Urgent *q* v.)

URGENT TELEGRAMS or replies, at three times Full Rates, are allowed to or from all places or regions in the list *except* those followed by the sign *xx*, and *except* by Empire-wide and some other routes. Minimum charge, 3*s* 9*d*, the word "Urgent" must be paid for.

* REDUCED RATES for telegrams (not radio-telegrams), each class is liable to be deferred in favour of higher-rate traffic. (*a*) *Deferred Telegrams*, in plain English (indication LCO, charged one word), French (LCF) or sometimes language or country of destination (LCD), cost (usually) *half* the Full Rate. This service applies to all regions, places, or rates in the list *except* in Europe, (in those marked thus §. When the deferred rate is other than half the full rate it is given next after the sign *d*. (*b*) *Letter Telegrams* in English or French (occasionally other tongues). *Week end Letter Telegrams* (WLT) normally delivered on Monday mornings, must reach Central Telegraph Office, London, by Saturday night. *Night Letter Telegrams* (NLT) may be handed in at any time of any day, for delivery next morning (unless it be Sunday). *Daily Letter Telegrams* (DLT) are for delivery after 36 or 48 hours from acceptance. *Post Letter Telegrams* (PLT), prepaid by stamps and posted under cover marked "Urgent" to Scott on Duty Central Radio Office, C T O, London, E C 4, or telephoned *by telephone subscribers*, are wired to Montreal and posted thence. The "indication" (shown above) must be paid for, one word according to the kind of letter telegram sent. The signs *wlt*, *nlt*, *dlt*, *plt* in the list below show the countries to which the respective services extend, *dlp*, *wlp* indicating where delivery outside other towns is effected by post only. The two prices following the sign are those of the first 25 words or less in each cable, and usually omitted in excess of first 25 (*see*).

Wireless Telegraphy.

Post Office as Licensing Authority —By the Wireless Telegraphy Acts, 1904–26, it was made illegal to install or work wireless telegraphy in the United Kingdom or on board British ships in territorial waters except with the Postmaster General's licence. By the Wireless Telegraphy Order 1908, the provisions of the Wireless Telegraphy Act 1904 apply to British Ships whilst on the high seas The Merchant Shipping (Wireless Telegraphy) Act, 1919, made it compulsory for all British sea-going ships over 1,600 tons to carry wireless apparatus The Post Office conducts the inspection of such apparatus under the Acts, and also the examination of Wireless Operators for the Postmaster General's Certificate.

Ship and Shore Service —The ship and shore stations of the Marconi Company and Lloyds, 10 in number, were bought by the Postmaster General in 1909 The service has since been reorganised and now comprises 13 stations, viz. —Cullercoats, Fishguard, Humber, Land's End, Malin Head, Niton, North Foreland, Portishead, Portpatrick, Rugby, Seaforth, Valentia and Wick. Portishead Radio affords (*a*) world-wide communication with ships equipped with short-wave sending and receiving apparatus, and (*b*) communication up to a range of about 2,000 miles with ships equipped with long continuous wave-sending and receiving apparatus Rugby Radio can transmit radiotelegrams to ships equipped with long-wave receiving apparatus The range is world-wide, but ships are not in a position to reply to this station

Anglo-Continental Wireless Services. —Post Office wireless services have been instituted side by side with the cable services to the following Continental countries —Italy, Poland, Estonia, Hungary, Czechoslovakia, the Free State of Danzig, and Rumania

The services with Poland (in part), Danzig and Estonia are carried on *via* the Stonehaven Station (near Aberdeen), which is also available for communication with Scandinavia and Iceland during cable interruptions; while the services with Italy, Hungary, Czechoslovakia (in part), and Rumania are carried on *via* the Northolt Station (near London). The latter station is also used for the transmission of news and commercial intelligence intended for simultaneous reception in several European countries A medium-power transmitter at the Rugby Station is also used for the services to Czechoslovakia and Poland

Super-power Transmitter at the Rugby Station —This transmitter has a power of 1,000 kilowatts and is capable of communication with any part of the globe. It is used for the broadcasting of the British Official news messages and for transmitting radio telegrams and news messages to ships at sea.

Marconi Company's Beam and Omni-Directional Wireless Station —The privately owned wireless stations in this country at present carrying on commercial services with other countries are the Marconi Company's Short Wave Wireless Beam stations at Dorchester and Somerton, the high-power omni-directional station at Carnarvon, and the medium-power omni-directional stations at Ongar and Brentwood in Essex The Dorchester Beam transmitting station consists of seven Marconi short-wave Beam transmitters, and is the largest beam wireless station in the world. It communicates with the United States of America, Brazil, the Argentine and Egypt, and is also equipped for transmission to the Far East. The Somerton station is the receiving station of this short-wave Beam group, and has eight receivers employed on the same services

The Ongar and Brentwood group of omni-directional, medium and short-wave stations exchange direct communication with France, Spain, Switzerland, Austria, Yugoslavia, Russia, and also *via* Vienna, with Bulgaria and Greece

The Carnarvon high-power omni-directional long-wave station communicates directly with Portugal, Turkey, United States of America and Syria

All these stations are operated and controlled directly from Radio House, London, the Marconi Main Telegraph Office.

Government Beam Stations —Two groups of stations on the "beam" system, each consisting of two units have been erected for the Post Office by the Marconi Company under contract * (1) for communication with Canada and South Africa, and (2) for communication with Australia and India. The transmitting unit of the group of stations for communication with Canada and South Africa is situated near Bodmin, and the receiving unit near Bridgwater. The transmitting unit of the group for communication with Australia and India is situated near Grimsby, and the receiving unit near Skegness

All the stations are controlled from London, which is thus placed in direct communication with Montreal, Cape Town, Melbourne and Bombay.

* Radiotelegrams.

The *Address* of a radiotelegram should contain name of addressee, of ship, and of coast station to be used. Messages for *H.M Navy* must have in the address "Warship" followed by the name of the vessel, or "Submarine" (which with identifying letters and figures counts in address as one word) Next must come (*a*) if ship be *abroad*, the name of the coast station (if this is not known, sender should enquire of the Secretary, Admiralty, London, by reply paid telegram or letter, stating when it is proposed to send the message); if it be *at sea* in the Mediterranean, the only coast station allowed is Rinella (Malta) (*c* –/2), if on the China Station, Seletar (Str Settlements) and Stonecutters Island (Hong Kong) (*c* –/2), if on the East Indies Station Matara (Ceylon) (*c*–/2) (*b*) If the ship be *in home waters*, the word "Wireless" (*see* Note 1) Radios to H M Ships cannot be sent through Portishead or Rugby Radio In the case of the *Mercantile Marine*, "Steamship" should precede the name if confusion with name of some telegraph office is otherwise possible; if name of nearest coast station is uncertain the message may yet be got through by other means (*see* Notes 1, 2), while if the name of the ship is not known, sufficient particulars of the voyage (names of ports, &c.) may be substituted, at sender's risk, under services *A* 1, *B* 1, and *B* 2 only. *Prepayment of Replies* is admissible except for messages through Athens or St Pierre and Miquelon *Counting of words*, etc., is subject to the rules for ordinary Telegrams Abroad, the name of ship and (if written in standard form) name of coast station count as one word each

The *Cost of Transmission (per word)* from any telegraph office is the sum of three rates rate for cable or other message to the coast station (denoted by *t* below), coast station charge (*c*), and ship charge (*s*) The charges and services may be classified as follows —

A. ORDINARY DISTANCE, to all ships · 1. *Through Post-Office coast stations†* (range up to 250 miles) (*c*) + (*c*) = 1*d.* Ship charges (*s*) are as follows :— (i) H M Navy, *nil*; (ii) ships of most nationalities, including British, 4*d*., (iii)

* "Radiotelegram," as used in the official Postal Guide, denotes only a message to or from a ship at sea, and includes no other kind of radiotelegraphic message.

Spanish and Swedish ships, 3*d*, (iv) Finnish ships and Lettonian ships, $1\frac{1}{2}d$ 2 *Through coast stations abroad* (*t*) = rate for *full-rate* telegram to the country in which coast station is situated (see list under heading Telegrams Abroad, p 547), (*c*) which varies from 0 to 9*d*., is given in the same list, after the name of a country or place with a coast station, preceded by the sign *c*, is same as given under .11 (s)

B LONG DISTANCE COMMUNICATION with certain ships beyond range of ordinary stations 1 *Via P.O station "Portishead Radio"* (Phone Highbridge 531 continuous wave, range about 2,000 m) to any one ships List A, at present about 420) having long range *reading* apparatus, rates same as under .11 2 *Via P.O station "Rugby Radio"* (which must appear in address at 9 a m G M T and once during G M T day under world-wide rate to British ships in the three mentioned List A as well as others List B, about 2,650 with long-wave receiving apparatus, ships are unable to send or acknowledge receipt to this station Rates (*t*) + (*c* = 1s 2*d* (*s*) = same as under .11 (s) 3 *Via P.O station Post Office (Phone* Highbridge 53, range world-wide) for ships (List C, about 55 equipped with short wave sending and receiving apparatus Rate (*t*) + (*c*) = 7*d* (*s*) = same as under .11 4 *Via the following coast-stations abroad* to the 420 List A ships rates as under .11 2—Louisburg (Nova Scotia), Reykjavik (Iceland), de la Mer (France), Nordden (Germany), Malta, Leiden, Durban, Perth (Australia), Sydney, Townsville, Casablanca, Cape Town, Walvis Bay (S W Africa), ranges 2,000 1,500 m

C REDUCED RATES FOR CROSS CHANNEL AND SHORT-VOYAGE SHIPS 1 *Through certain home stations* the *inclusive* (*t* + *c* + *s*) rates per word are as follows—to to 380 such ships $2\frac{1}{2}d$, (*b*) to 113 ships $5\frac{1}{2}d$ 2 *Through foreign coast stations* for the same groups of vessels respectively (*b*) Charges calculated as under .11 2, but ship charge is reduced to *b*d [Exceptions in group are (a) To the 8 Dover-Ostend Packets, through Antwerp or Ostend *t* = $2\frac{1}{2}d$, *c* + *s* = 2*d* (*b*) To 27 cross Channel boats through Boulogne, Cherbourg or Havre, *t* = 2 *d*, *c* = $1\frac{1}{2}d$ (*s*) = $1\frac{1}{2}d$ (*b*) Charges calculated as under .11 2, but ship charge is $1\frac{1}{2}d$ only

NOTE 1—The word "Wireless" must be substituted for name of coast radio P O coast station in services .11, .B1 and .B3, but *not* in .B2, and *may* be so substituted in messages for one of H M ships known by the sender to be within 250 miles of the British Isles service .11 3—in this case the P O assumes proper coast station

NOTE 2—*Open address*.—Messages intended to pass through ordinary distributive coast stations in Newfoundland on *east* coast of Canada (not Louisburg) *may* have "Montreal" in place of the name of any particular station similarly those for coast stations on east coast of Canada (except Cape Race) or either coast of U S A may bear "Newyork" In both cases (*c* + *s*) = 1*s* Again, messages intended to pass through stations on coasts of the union of S Africa *may* have "Cape town radio" instead of the name of any particular coast station (*c* + *s*) = 10*d*

The tonnage of all trading vessels recorded as employed on the selected dates fell by 33·7 per cent. in the ten years.

At the Imperial Conference of Oct 1926, the Secretary for Air, Sir Samuel Hoare, laid down two broad propositions —

(1) That the Empire is in urgent need of better communications.

(2) That their improvement will require a sustained and united effort

By aeroplane or airship London could be brought within a fortnight of the furthest cities and territories of the Empire Journeys could be reduced to the following periods —

	Days
Canada	2½
India	5
Cape Town	6
Australia	11
New Zealand	13

The Secretary for Air referred to the opening at the end of 1926 of a regular civil air line between Cairo and Karachi enabling seven or eight days to be saved on the journey from England to India He showed how this might become, given the necessary co-operation, the first section of an Empire air route to the Far East stretching to Australia and New Zealand There must also, he said, be an Empire air route from London to the Cape, with branches diverging to the West African Dependencies Here again a small beginning was being made during the next few months, as "an enterprising pioneer" had organised an experimental service covering 1 400 miles between Khartoum and Kisumu For the creation of these two long-distance air routes the co-operation of the overseas Governments was essential for the provision of suitable landing grounds. Empire airship routes were also dealt with in the statement The two airships building for the British Government are of 5,000,000 cubic feet capacity, or about 150 tons gross lift

In April, 1929, a stage of development in the air journey between London and India will be marked by the introduction of large passenger aeroplanes for the London—Paris—Marseilles section, transhipping into air boats for the passage over the Mediterranean, and so from Cairo—Baghdad—Basra to Karachi *Airships*—R 100, building at the works of the Airship Guarantee Company, Howden, Yorks, and R 101, building at the Royal Aircraft Factory, Cardington, Beds, are expected to be ready for the air early in 1929. The trial trip of R 100 to Canada and U S will be made by a working crew and no passengers will be carried. The dimensions of R 101 are, *length* 740 feet, *girth* 130 feet, approximate *weight* (unladen) 90 tons.

SHIPBUILDING.

DURING 1927-28 the committee of Lloyd's Register passed plans for 476 new vessels of 1,454,050 tons gross, of this total projected tonnage 69 3 per cent (1,007,340 tons) is to be built in Great Britain and Ireland, and 30 7 per cent (446,710 tons) abroad. During the same period 578 vessels of 1,885,533 gross tons were assigned the Society's classification, the countries contributing to the total including —

THE KINGDOM OF ENGLAND.

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between 55° 46′ and 49° 57′ 30″ N. latitude (from the mouth of the Tweed to the Lizard), and between 1° 46′ E and 5° 43′ W (from Lowestoft to Land's End) England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland, on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea, and on the west by the Atlantic Ocean (which washes the Cornish coast), the Principality of Wales and the Irish Sea. The total area of the kingdom is 50,851 square miles. At the *Census* of 1921 the population numbered 35,678 530 (an increase of 1,633,240 in the decennial period).

Relief.—There is a natural orographic division of England into the hilly districts of the north west and south-west, and the undulating downs and low lying plains of the east and south east In the extreme north the *Cheviot Hills* run from east to west and divide England from Scotland, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the *Pennine Chain*, running N by W to S by E., with their highest point in Cross Fell, 2,930 feet above mean sea level West of the Pennines are the *Cumbrian Mountains*, which contain in *Scafell Pike* (3,210 feet) the highest land in England, and east of the Pennines are the *Yorkshire Moors*, their highest point being Urra Moor (1,489 feet) South of the Pennines there are heights above 2,000 feet in the *Peak of Derbyshire* (highest point 2,088 feet), and in *Dartmoor* (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Long Mynd (1,674 feet), and Brown Clee (1,805 feet), in Herefordshire the Black Mountain reaches 2,310 feet, in Worcestershire the Malvern Hills reach 1,395 feet, in western Monmouthshire are the Sugar Loaf (1,955 feet) and Coity (1,905 feet), and the Cotteswold (or Cotswold) Hills of Gloucestershire contain Cleeve Cloud (1,134 feet)

Hydrography.—The *Thames* is the longest and most important river of England, with a total length of 210 miles from its source in the Cotteswold Hills to its outflow into the North Sea. The lower river is navigable by ocean-going steamers to London Bridge, and small craft reach Lechlade, 160 miles from the mouth The Thames is tidal to Teddington (60 miles from its mouth), and its upper stream is connected with the Severn by a canal at Lechlade; the Wilts and Bucks canal enters at Abingdon, and the Wye canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire, Windsor Castle, the home of the Sovereign, Eton College, the first of the public schools, and Oxford, the oldest university in the kingdom The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester) The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout Navigation is assisted by the Gloucester and Berkeley Ship Canal (16¾ miles), which admits vessels of 350 tons to Gloucester, other canals connecting with the Thames, Trent, Dee and Mersey The *Severn Tunnel*, which carries the Great Western Railway under the river, 14 miles below the Shrupness Bridge, was begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, &c The tunnel is 4 miles 624 yards in length (of which 2¼ miles are under the river) Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills: and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The *English Lakes* are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ullswater and Derwentwater

Islands.—The *Scilly Islands* form part of the county of Cornwall, and are distant 25 miles from Land's End. The group consists of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited, the total population in 1921 being 1,749 The capital is Hugh Town, in St Mary's The climate of the Scilly Islands is unusually mild, and vegetation is luxuriant, semi-tropical plants flourishing in the open. The *Isle of Wight* forms an administrative county and is separated from Hampshire by the Solent and Spithead The total area is 147 sq miles, with a population in 1921 of 94,697. The climate is mild and healthy, and many watering places have grown up during the last century. The capital is Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay and Bembridge.

Climate.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahrenheit, varying from 52° in the Scilly Islands to 48° at the mouth of the Tweed, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the Lake district of Cumberland and the driest in the Thames estuary and the Lincolnshire Wash.

EARLY INHABITANTS

Prehistoric Man.—A skeleton found at *Galley Hill*, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (presented by Sir C. H. E. Chubb to the Nation in 1908, and now preserved as a national monument) Stonehenge (10 miles N. of Salisbury, Wiltshire) consists of two circles of megaliths (the largest monolith being 22½ feet in height) only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion.—In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age another Celtic race of *Brythons* invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48–51 A.D. was *Caractacus* (strictly Caratâcus), who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly Boudicca), Queen of the Iceni (Norfolk), being crushed in 61 A.D. In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first uncovered in the 18th century at *Silchester* (Calleva Atrebatum), 10 miles south of Reading, and since 1890 the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium (St Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. *Christianity* reached the Roman Province of Britain from Gaul in the 3rd century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash to Spithead, while about 350 A.D. incursions in the north of Irish (Scoti) and Picts became most formidable, and towards the end of the century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome; officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants, whose language and customs re-emerged.

Anglo-Saxons and Normans.—The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the *English* (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall), the name of *Welch* (old English *Wealisc* = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms, of which the chief were Northumbria (Bernicia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Tî, Woden, Thunor and Frigg are commemorated in 'Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Hadraada of Norway) at Stamford Bridge in Yorkshire (Sept 25), he was himself defeated at the *Battle of Hastings* (or Santlache) on Oct 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the *Norman Conquest* all attempts to invade England have been defeated.

ENGLISH COUNTIES.

For Administrative purposes England is divided into 50 *Administrative Counties* (under the Local Government Act of 1888). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Counties, while the areas of the 72 *County Boroughs* created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

WHERE the figures for the Administrative County are smaller than those for the Geographical County or Shire the difference is accounted for by the exclusion of County Boroughs

The Government of London.

LONDON the capital of England and of the British Empire and the greatest city in the world, is situated on both banks of the River Thames, 50 miles from its outflow into the North Sea

The City of London represents London within its ancient boundaries The City is the financial and business centre of London, and includes the head offices of the principal banks, insurance companies and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall the Norman Tower and the 14th century Guildhall, to the massive splendour of St Paul's, and the architectural beauty of Wren's spires (Bow Church, St. Bride's St Dunstan's in the East, &c).

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St Marylebone and Holborn on the north and by the Thames and Chelsea on the south was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct 19, 1900, the Council consisting of a Mayor, 10 Aldermen and 60 Councillors Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford-street to the Thames it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts Buckingham Palace and St James's and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia. Westminster is the richest of the London areas.

Metropolitan Boroughs.—Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs, of which one became afterwards the City of Westminster The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith

London County Council —For County purposes the affairs of London are administered by the London County Council, which was created by the Local Government Act of 1888.

Miscellaneous Authorities —The Poor Law is administered in the Metropolitan area by the *Metropolitan Asylums Board*, and by 32 *Boards of Guardians*, for Police purposes the administration is invested in the City Corporation as to the *City Police* and in the Home Office as to the *Metropolitan Police* The authority for the supply of water is the *Metropolitan Water Board*, while the River Thames is administered as to its tidal portion by the *Port of London Authority* and above Teddington by the *Thames Conservancy*, the lighthouse and pilotage authority being *Trinity House* The bridges are maintained in the City of London by the *Bridge House Estates* Committee of the Corporation of the City, and in the remaining area by the London County Council The lighting of London is carried out by private enterprise, and in some cases by the Borough Councils, while locomotion is provided by the London County Council as the Tramway authority, and by private enterprise as to underground or other railways and motor vehicles.

THE CORPORATION OF THE CITY OF LONDON.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era From the Romans, it is said, it received municipal institutions which have endured in their main features to the present day In Saxon times it was, in reality, a small independent State, and its burgesses maintained their independence even after the Battle of Hastings William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (*i e*, possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor, the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done; though in early times the same individual often held the office more than once A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times A D 1397, 1398, 1406, 1419), and many modern cases have occurred. The title of *Lord Mayor* was not in general use in the outer world until about 1545 The Lord Mayor is elected at Michaelmas, he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant being popularly known as the *Lord Mayor's Show*

Aldermen were first appointed by a charter of Henry III in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II directed them to be chosen for life. The *Common Council* elected annually on St. Thomas's Day (Dec 21), was, at an early date, substituted for a popular assembly called the Folkmote At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. *Sheriffs* (as well as aldermen) were Saxon officers who usually had charge of a large district The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D 1130 At first they were only the officers of the Crown, and were named by the Barons of the Exchequer, but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue, as heretofore to choose the Sheriffs of the City of London They are appointed on Midsummer Day, and enter on office at Michaelmas

Officers.—The Recorder was first appointed in 1298 The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall The former appears to have fallen into abeyance *circ* 1319 The first contemporary record of the office of City Chamberlain is 1376. The Town Clerk and Common Serjeant are mentioned as officers in the charter of Edward II., A D 1319, but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1928–1929.

Col Sir John Edward Kynaston Studd, Kt, O B E, M A, *born* July 26, 1858, *Sheriff* 1922: *Alderman of Farringdon Ward Without*, 1923, *Lord Mayor*, 1928, The Mansion House, E.C 2 . . £10,000

* The above is abstracted from the 295th "City's Cash Account" of the series extant—A D 1633 to 1927-28 [The Accounts earlier than A D 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, *temp* Queen Elizabeth, have been discovered among the Corporation Archives, as exceptions to that belief.) The Volumes are in full detail, signed by the Auditors, and in perfect preservation The above extract is from the 144th Annual Printed Account of the Corporation, A D 1784 to 1927-28 The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, the 14th December, 1905, and 25th January, 1917, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 82nd Standing Order of the Court of Common Council. The Accounts are made up to the end of March and are issued in the form prescribed by those Orders and show the Income and Expenditure applicable to the year on the various Funds.

THE CITY GUILDS (LIVERY COMPANIES).

In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Lormers (bridle, bit, and spur makers), Poulters (poulterers) Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade The order of precedence is given in parentheses after the name of each Company

9,443 Liverymen of the Guilds are entitled to vote at elections in *Common Hall* (*see* p 562) The actual net number is, however, smaller, as many belong to more than one Guild, and only those who have residential or other qualification in the City have the *Parliamentary* vote in that district

There are 77 Guilds in existence. The Liveries of the Stationers (377), Lormers' (360), and Haberdashers' (350), are the most numerous, the Fletchers' (17) the smallest

THE LONDON FIRE BRIGADE. *Headquarters* 94 Southwark Bridge Road, S.E. 1

PREVIOUS to the formation of the Metropolitan Fire Brigade in 1866 the churchwardens and overseers of every parish had been compelled, under an Act passed in 1774, to maintain an engine for putting out all fires occurring within their own boundaries, and from about 1830 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On January 1, 1866, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took over these responsibilities. On January 1, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of Life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade."

On Dec. 31, 1927, the complement of the Brigade consisted of:—1 chief officer; 2 divisional officers; 2 assistant divisional officers; and 1,919 officers, firemen, and pilots; a technical and clerical staff of 179, and an ambulance service staff of 155. There were 62 land fire-stations, 13 ambulance stations, 3 river stations and 1 river repairing depot. The appliances included 87 motor fire engines, 74 motor escape vans, 6 petrol-electric motor ladders, 3 petrol motor ladders (in addition to tenders, &c.), 8 hose carts and 114 fire escapes, 1 long fire ladder, 62 miles of hose, 1 steam and 3 motor fire floats, 55 smoke helmets, 399 hook ladders and 293 hook belts. There were 1 662 street fire-alarm posts, 108 telephone lines from station to station and 354 telephone lines to public and other buildings. The number of calls to which the Brigade responded during the year ended Dec. 31, 1927, totalled 7,696, and the fires numbered 5,125, of which 30 were classed as "serious."

THE London County Council was constituted under the Local Government Act of 1888 London is an *administrative* county, covering an area of 117 square miles

The City of London is an electoral division of the county The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c , and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 20 aldermen, and 124 councillors, together 145, or, if the chairman be also an elected member or alderman, 144. The term of office for aldermen is 6 years, and ten retire every 3 years The councillors are elected for 3 years The councillors are elected directly by the ratepayers, and the councillors elect the aldermen The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken

The *Finance Committee* have important statutory powers No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £70,284,000 (of which £35,676,000 represents debt incurred for revenue-producing undertakings), and an annual expenditure of about twenty-nine millions, of which thirteen millions are expended on education. The *Mental Hospitals Committee* administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has mental hospitals and other institutions for the care of mental defectives, with accommodation for over 20,000 patients The *Housing Committee* perform the duties cast upon the Council by the various Housing Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital expenditure incurred up to March 31, 1928, in respect of all schemes was £28,518,000 Over 32,000 houses and tenements have been completed and occupied since the war, and very large works are still in progress

The *Improvements Committee* are responsible for the carrying out of street improvements and the construction of bridges (outside the City of London) and tunnels across the river Thames. The Council has given general approval to the scheme of the Ministry of Transport for the construction of a road bridge at Charing Cross, involving the removal of Charing Cross station to the other side of the river, subject to the Council's liability in respect of its share of the cost of the scheme and of the scheme for reconditioning Waterloo Bridge as recommended by the Royal Commission on Cross River Traffic in London being restricted to an amount not exceeding £3,219,000 The Council has also decided to reconstruct Lambeth Bridge and to carry out street improvements in connection therewith, and works are in progress on the approaches.

The *Metropolitan Main Drainage* system covers about 153 square miles, including certain districts outside the county, and comprises about 400 miles of main, storm-relief, intercepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and five sludge vessels The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, and the sludge is taken out to sea The Council is carrying out experimental work in connexion with other systems of sewage treatment The total capital outlay on main drainage is nearly £16,000,000, and further expenditure is in progress for a scheme to relieve certain districts from flooding after heavy falls of rain.

The Council is the *Tramway Authority* for London The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 165 street miles, all of which are electric lines (123 miles on the underground conduit system and 42 miles on the overhead system) The whole of this great system is worked by the Council, and through-running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on March 31, 1928, to £17,178,000, and the net debt outstanding to £8,693,000 The results of working for the year 1927-28 were: gross receipts £4,333,783, surplus on working £522,957, deficiency, after payment of interest on capital outlay and providing for repayment of debt, £226,210, which was charged on the rates.

The *Education Committee* comprises thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women The Council has approved a further programme of educational work extending over a period of three years from April, 1927, providing for developments in all branches of education at a total capital cost of about £3,500,000, and involving ultimately additional annual expenditure of about £1,000,000.

Amongst the *Other Powers and Duties* of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs; maintenance of fire brigade and ambulance services; acquisition and maintenance of parks and open spaces; the sanctioning of local sewers, town planning, controlling the building line, and the naming of streets and numbering of houses; supervising buildings and district surveyors; dangerous structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter and electricity-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of music and dancing licences; public health, including treatment of tuberculosis and diagnosis and treatment of venereal diseases; historic build-

ings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the Shops Act, the Children Act, and the Midwives Acts; licensing and inspection of employment agencies; registration of massage establishments, licensing of premises under the Cinematograph Act; registration of motor cars, collection of duties on motor cars, dog and establishment and certain other local taxation licences; registration of War charities; and welfare of blind persons.

The *Expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total Stock outstanding at September 30, 1928, was £94,441,660. These figures are exclusive of the issues of Bonds, the amounts outstanding at September 30, 1928, being £2,705,300 London County 5½ per cent Bonds, and £5,670 850 Local Bonds for Housing.

The *Rating* for the year 1928–29, as originally fixed and shown by the statement below (which relates to rate and debt accounts only), amounted to 3s. 6¾d. in the pound over the whole county, including the City and a further rate over the county outside the City of 3½d. in the pound, together 3s. 10d. Of the total rate, 2s. 2¾d. is for education. For the second half of the year the general county rate was reduced by ½d., and the special county rate increased by ½d., the total rate remaining at 3s. 10d. LIVERPOOL

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and 194 miles N W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 24,102 acres (which includes 2,883 acres in the bed of the river Mersey) (about 33 square miles, excluding the bed of the river), with a population at the census of 1921 of 803,118. The net tonnage of British and Foreign ships engaged in ocean trade arriving in the port during 1924 was 13,185,360, and of those departing 12,572,997; these figures exclude 2,317,626 tons for arrivals and 3,063,983 for departures in the coasting trade, while the value of the sea-borne trade of the port was stated at £582,580,575 for 1924. The docks, on both sides of the river, have a linear quayage of about 37 miles, and the Gladstone dock will accommodate the largest vessels afloat. The dock authority is the Mersey Docks and Harbour Board. The chief import is cotton, those next in importance being grain, provisions, sugar, fruit, oil, timber and tobacco.

The principal buildings are the Cathedral, erected from the designs of Sir Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; St. George's Hall, erected 1838-1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Walker Fine Art Gallery, the University, the Royal Infirmary; the Municipal Offices; and the Custom House

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 38 Aldermen and 113 Councillors. The City returns 11 members to Parliament. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

Principal City Officers.

The Lord Mayor (1928-1930), H M. Miller
Recorder, Edward G Hemmerde, K.C. (1909)
Police Magistrate, Stuart Deacon (1910)
President, Court of Passage, Sir Wm F. Kyffin Taylor, K B E, K.C.

MANCHESTER.

MANCHESTER (Lancashire), the centre of the world's cotton trade, is 189 miles N.W. of London. The municipal area is 21,690 acres (about 34 square miles), the population at the census of 1921 being 730,307.

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, india-rubber goods, chemicals, &c. The city is connected with the sea by the *Manchester Ship Canal* (opened in 1894), which has a total length of 35½ miles, a depth of 28 feet, and a minimum width at the bottom of 120 feet The net tonnage of ships engaged in the Foreign Trade was 3,554,667 for arrivals and 3,241,062 for departures in 1926, the value of the sea-borne trade of the port being £96,448,534 in 1926. The net tonnage of arrivals in the Coasting Trade was 486,453, and of departures 807,800 net tons in 1926. In 1926 the weight of sea-borne merchandise which passed over the Waterway amounted to 6,533,780 tons, as compared with 5,622,405 tons in 1925.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R A.; the Royal Exchange, built in 1869, enlarged at cost of £800,000 and reopened by the King, 1921; the Free Trade Hall, erected from the designs of Walters, in 1856, on the site of the "Peterloo Massacres" (Aug. 16, 1819) in St. Peter's Fields; the Art Gallery; the Whitworth Institute; the 17th century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University (Owens College); and the 15th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Manchester Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The Lord Mayor presides over a Corporation of 35

Aldermen and 105 Councillors. Manchester returns 10 members to Parliament. The Latin name of the city was *Mancunium*.

Principal City Officers.

The Lord Mayor (1928-1929), George Westcott
Recorder, Sir Walter Greaves-Lord, K.C., M.P (1925).
Stipendiary Magistrate, J Wellesley Orr (1927).
Town Clerk, F. E Walbreck Howell (1929)
Clerk of the Peace, E. M Redhead.

LEEDS.

LEEDS (Yorkshire, West Riding) is favourably situated in the coal and iron districts of England, 185 miles N.N W of London, and is the centre of the woollen industry and the wholesale clothing trade The city has also the largest share of the leather trade of the United Kingdom, in addition to large rope works printing works, and factories of thread, linen, glass and earthenware, with metal casting, machinery and machine tools, steam engines, railway wagons, and other engineering works Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal, with the Humber in the east by the Aire and Calder Navigation, and is an important railway centre

The municipal area is 30,137 acres (over 47 square miles), the population at the census of 1921 being 458,232

The principal buildings are the Town Hall (1858), the Royal Exchange (1872), the Philosophical Hall, the Municipal Buildings and Art Gallery, the University and the Leeds Institute of Science, Art and Literature (1865) The Parish Church (St. Peter's) was rebuilt in 1840, the 17th century St John's Church has a fine interior with a famous Renaissance screen, the 17th century Mill Hill Chapel was rebuilt in 1849 Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Laci in 1152, is one of the most complete examples of Cistercian houses now remaining. *Temple Newsam*, birthplace of Lord Darnley, was acquired by the Corporation in 1922. The present mansion, a stately edifice in red brick, was built by Sir Arthur Ingram in 1620 Adel Church, about 3½ miles from the city, is a fine Norman structure.

Leeds was first incorporated by Charles I. in 1626, made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a corporation of 17 Aldermen and 51 Councillors The city returns 6 members to Parliament. The earliest forms of the name are *Loidis* or *Ledes*, the origin of which is obscure.

Principal City Officers

The Lord Mayor (1928-1929), D. B Foster.
Recorder, E A. Mitchell-Innes, C.B.E., K C. (1928).
Stipendiary Magistrate, Horace Marshall (1910).

STRATFORD-ON-AVON.

Shakespeare's Birthplace (April 23. 1564). at Stratford on-Avon, has been for over 200 years the goal of pilgrims It was bought for £3 100 in 1847 and given to the nation. (Restored in 1857.) Managed by 26 Trustees (16 *ex-officio*). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clopton Bridge, built of stone, on 19 arches, about 1490 by Sir Hugh Clopton, Stratford native, and Lord Mayor of London

Guild Chapel and Guildhall.—Built A.D. 1296. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash, 1804, mural allegorical paintings, done by mediæval priests

Hall's Croft.—Unaltered old-timbered residence of Susanna, poet's daughter wife of Dr. John Hall, churchwarden and poet's executor

Harvard House.—Built 1596 by Alderman Thomas Rogers, whose descendant (John Harvard) founded Harvard University, U.S.A

Hathaway Cottage.—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poet's wife, who bore him three children, Susanna, Hamnet, and Judith Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

King Edward VI. School.—Founded by Thomas Jollyffe, priest, in Henry VI. reign; incorporated by Edward VI Here Shakespeare acquired his "little Latin, less Greek," and matchless English.

The Shakespeare Memorial.—Mainly due to munificence of C. E. Flower (1830-92) and his wife. Group comprises *Library*, with 10,000 volumes of Shakespeare editions and ana including rare Wm Jaggard collection. *Gallery* of pictures (including unique "Droeshout" portrait) *Museum* of antiques and relics (including Irving collection) *Lecture rooms* Tower, affording views of 50 miles. *Gardens*, and *Statuary* (Lord Ronald Gower's gift). *Theatre*, burnt down in 1926, is to be rebuilt by public subscription organized by *The Daily Telegraph*. Special celebrations and performances, with floral procession to tomb, mark the birthday, April 23, each year.

New Place.—Site of the poet's retirement. Shakespeare bought this estate in 1597; retired to it about 1610; died there April 23, 1616. House was rebuilt about 1700, and demolished by Francis Gastrell, the iconoclast, 1759

The Cage.—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintner.

Town Hall.—Erected 1633; rebuilt 1768 Contains details of the unbroken sequence of Bailiffs and Mayors since A D 1292 (including the poet's father, John Shakespeare). Exhibits: Gainsborough portrait of Garrick; four Corporation Maces, gilt silver of 15-16th Century, and ancient Corporate Sword

THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent.—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7 467 sq. miles. and a population (1921) of 2,206.712. It is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, Hereford and Monmouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breadth from W. to E. (St. David's Head to the English border) is 92 miles. Separated from the mainland by the Menai Straits is the Welsh island-county of *Anglesey* or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826 and by the tubular railway bridge (1,100 ft. long) of the L. & N.W. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles)

Population.—The population at the *Census* of 1921 was 2,206,712 (or, inclusive of Monmouthshire, 2,657,412)

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,571 ft., Carnedd Llywelyn 3,484 ft, Carnedd Dafydd 3,426 ft), Berwyn (Aran-fawddy 2,970 ft.), Powys (Plinlimmon 2,462 ft , Drygan Fawr 2,115 ft., Radnor 2,163 ft), and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft , Brecon Beacon 2.862 ft., Pen-y-gaver fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn (see* England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Taf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welch rivers

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* followed in the ensuing Iron Age. The *Roman* conquest of South Britain and Wales was for some time successfully opposed by *Caradog* (Caratâcus), King of the Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth In A D 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). *Christianity* was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales. and into Strathclyde (Cumberland and S W Scotland) and Cornwall, giving them the name of *Waelise*, or Welsh. (=Foreign). The West Saxons' victory of Deorham (577) isolated the Waelise of Wales from those of Cornwall, while the battle of Chester (613) similarly cut off communication with the Waelise of Strathclyde In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dyke). In the 9th century *Rhodri Mawr* united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid) and *Deheubarth* (S.) were divided among his three sons—Anarawd, Merivyn and Cadell—the son of the last-named being Howel Dda, who codified the laws of the country, while Llewelyn ap Seissyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015–1022.

The Norman Conquest.—After the Norman conquest of England William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welch rose under the leadership of *Griffith ap Rhys* and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendency over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1282 during hostilities between the Welsh and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince, in an age many centuries before the Christian era.

SWANSEA.

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tinplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal (the largest anthracite port), patent fuel, ores, and the import and export of oil (National Oil Refineries). There is also a large ship-repairing industry. The trade is principally with France, Italy and Belgium. The municipal area is 24,193 acres, with a population at the census of 1921 of 159,600. Included in the borough is the health resort of Mumbles.

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton, and the 17th century Grammar School, founded by Hugh Gore. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns 2 members to Parliament.

City Officers.

Mayor (1928–29), T. J. Richards
Recorder, R. E. L. Vaughan-Williams, K.C.
Town Clerk, H. L. Lang-Coath.

THE KINGDOM OF SCOTLAND.

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between 60° 51′ 30″ and 54° 38′ N. latitude and between 1° 45′ 32″ and 6° 14′ W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 31,510 square miles (land and water). The population (at the census of 1921) was 4,882,288, an increase of 121,394 since the census of 1911, or 2·5 per cent.

Relief.—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinns of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfries; and Whitecoomb (2,695 feet), in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and Ben Muich Dhui (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (20 feet), and Stonebyres Linn (80 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth Bridge*, constructed 1882–9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,295 feet).

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Ericht in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (20 miles) and Maree in the northern Highlands.

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1921) of 25,896. Kirkwall, in *Pomona* (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between Pomona and Hoy, was the war station of the Grand Fleet from 1914–9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Shetland.—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Shetland, a group of about 100 islands and islets, of which 29 are inhabited. The total area of the group is 551 square miles, with a population (1921) of 27,921. Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51′ 30″ N. lat.).

*Western Islands.**—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Invernessshire, in 1746), which contains the *Cuillins* (Sgurr-na-Banachdich, 3,243 feet), *Red Hills* (Ben Caillich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles),

* *Land's End to John o' Groats.*—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 597 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends further N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488–1513).

* *The Hebrides.*—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodorenses*, a name that survives in the Anglican bishopric of "Sodor and Man."

containing *Ben More* (3,185 feet), *Ben Buy* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura*, Beinn-an-Oir (2,571 feet), and Beinn Chaolais (2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis-with-Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callernish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

Climate.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift*, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour, the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast being greater than on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 58° Fahrenheit.

EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Celtic immigrants. Celtic *Gaidels* and *Brythons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about A.D. 450.

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic Brythons, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catrail*, or Picts' Work Dyke, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern Caledonia about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic Waelisc (Welch) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of Malcolm I. (943–954) the Brythons of Waelisc (Welch) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005–1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sheriffmuir, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops under Sir John Cope at Preston Pans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32 531 sq miles and its geographical position between 51° 26′ and 55° 21′ N latitude and from 5° 25′ to 10° 30′ W longitude. The greatest length of the island, from N.E. to S W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Armagh Head), is 174 miles. The island is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone in the North, the *Mountains of Mourne* (Slieve Donard 2,796 ft) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft) in the North-East, the *Derryveagh Mountains* (Errigal 2,466 ft) of County Donegal in the North-West; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway in the West; *Macgillicuddy's Reeks* (Carrantuohill 3 414 ft., the highest point in Ireland) in the South-West; and the *Galtee Mountains* (3,018 ft) of County Tipperary, and the *Knockmealdown* (2,609 ft) and *Comeragh Mountains* (2,470 ft.) of County Waterford, in the South The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles) rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Suir*, *Nore*, and *Barrow* to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough *Neagh* (150 sq miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower Erne*, and *Erne*, in the central plain; *Melvin*, *Gill*, *Gara* and *Conn* in the north; and *Corrib* and *Mask* (joined by a hidden channel) in the south In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney* The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about 3° Fahrenheit, the summer extremes being 59° in the N and 62° in the S.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B C In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

Legendary History. — According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Christianity.—Christianity did not become general until the advent of St. Patrick. *St. Patrick* was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22 In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

Later History.—The Roman conquest of Britain was not extended to Ireland, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Finngaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the Provinces of Ulster, Leinster and Munster being survivals of the Norse *Ulaid-stadr*, *Largin-stadr* and *Muman-stadr*. The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuaran; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diarmait Mac-Murchada), the deposed king of Leinster, sought assistance in his struggle with Ruadri O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug 23, 1170) with 200 knights and 1 000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII. English rule was greatly extended, and the administration of Irish affairs was anglicised by *Robert Poyning*, Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec 1494), at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law*, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland.

Herring fishing and pickling is an important industry during the summer months.

Minerals.—About 2,350 persons were engaged in the various mines and quarries over 20 feet deep in 1927, the principal output being igneous rock, 320,000 tons; chalk, 229,000 tons.

Manufactures.—Belfast is the principal industrial centre. Linen manufactures provided employment for over 110,000 persons in 1927, the number of looms being 4,000, and of spindles 1,000,000; the value of the Exports in 1927 exceeded £17,000,000. The shipyards employed over 25,000 persons in 1927, the output exceeding 107,000 tons.

COMMUNICATIONS

Seaports.—The principal seaports are Belfast, Londonderry, Newry, Larne and Coleraine. There are regular week-day shipping services from Belfast to Liverpool, Heysham, Ardrossan and Glasgow, and from Larne to Stranraer. Other services are maintained at regular intervals and there are also indirect routes *viâ* Greenore and Holyhead and Kingstown and Holyhead.

Railways.—The principal railways are the Great Northern, L.M. & S. (Northern Counties Committee), Belfast and County Down, Londonderry and Lough Swilly, and the Clogher Valley. The total railway mileage in 1927 was 766 miles.

TOURIST ASSOCIATION.—Tourists are supplied with information by *The Ulster Tourist Development Association*, 5, Donegall Square South, Belfast.

Saorstat Eireann—The Irish Free State.

THE GOVERNOR GENERAL.

His Excellency James McNeill, *born* March 27, 1869, *appointed Governor General* Dec. 15, 1927 ..... £10,000

CONSTITUTION AND GOVERNMENT

UNDER the *Irish Free State (Agreement) Act*, 1922, the Irish Free State (*Saorstat Eireann*) is a coequal member of the Community of Nations forming the British Commonwealth of Nations The Constitution, as issued by the Crown, June 16, 1922, contains five Sections, of which Section I is declaratory of Fundamental Rights (1) The coequality of the Irish Free State (2) Power of government derived from the people, in accordance with the Constitution. (3) Irish domicile for seven years, or Irish parentage on either side, conferring Irish nationality, and men and women having equal rights as citizens (4) Irish the national language, English being recognised as an official language. (5) No titles or honours may be conferred on any citizen, except with the approval or advice of the Executive Council (6) Liberty of the person inviolable (7) Dwelling of each citizen inviolable. (8) Freedom of conscience and profession and practice of religion, and no law establishing or prohibiting religion may be passed (9) Free speech and right of lawful assembly. (10) Free education for all citizens (11) Natural resources of the State inalienable

Section II provides for a legislature (*Oireachtas*) of the King and two houses, the Chamber of Deputies (*Dail Eireann*) and the Senate (*Seanad Eireann*), the former elected by secret ballot and by direct vote of all citizens above the age of 21 years who comply with the existing electoral laws and consisting of not less than one member for each 30,000 of the population and not more than one member for each 20,000 of the population. The latter, consisting of 56 Senators and of 2 Senators from each University, elected by all citizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of 21 years is eligible for the Chamber of Deputies; the Senate is composed of citizens who have reached the age of 35 years and have done honour to the nation by reason of useful public service, or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year. Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register; and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people. In this Section also Article 45 declares that the Parliament (*Oireachtas*) has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State, and every such force shall be subject to the control of the Parliament. Save in the case of national invasion, the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament.

Section III vests the Executive Authority in the King and provides for its exercise as in the Dominion of Canada, by the representative of the Crown. The Executive Council (*Aireacht*) is responsible to the Chamber, and consists of not more than twelve Ministers (*Airi*) appointed by the representative of the Crown, of whom four ministers shall be members of the Chamber, and a number not exceeding eight chosen from all citizens eligible for election to the Chamber, who shall not be members of Parliament during their term of office, and who, if at the time of their appointment they are members of Parliament, shall by virtue of such appointment vacate their seats, provided that the Chamber may from time to time, on the motion of the President of the Executive Council determine that a particular Minister or Ministers, not exceeding three, may be members of Parliament, in addition to the four members of the Chamber above mentioned.

Section IV establishes a Judiciary, consisting of Courts of First Instance, and a Court of Final Appeal to be called the Supreme Court (*Cuirt Oachtarach*) The Courts of First instance include a High Court (*Ard Chuirt*), invested with full original jurisdiction in and power to determine all matters and questions whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court shall in all cases be final and conclusive, and shall not be reviewed or capable of being reviewed by any other Court, Tribunal or Authority whatsoever Provided that nothing in the Constitution shall impair the right of any person to petition his Majesty for special leave to appeal from the Supreme Court to his Majesty in Council or the right of his Majesty to grant such leave.

Section V contains certain Transitory Provisions to meet the special circumstances incidental to the establishment of the Legislature, &c.

LONDON: PRINTED BY WILLIAM CLOWES AND SONS, LIMITED, DUKE STREET, STAMFORD STREET, S.E.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries.—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povalo Schveikovski on the Taghdumbash Pamir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,805,000 square miles, with a population of nearly 319 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 78 per cent. of the population. The details are as follows:—

* Districts and Administered Territories

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Terai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains,

is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat: further inland are hills and rolling downs: while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

Population.—The fifth general census of India was taken on the 18th March, 1921. The final census returns gave a population of 318,942,480, as compared with 315,156,396 in 1911 (for details *see* p. 593), an increase in the ten years of about 1·2 per cent. The census total of 1921 is divisible into 247,003,203 (or over 77 per cent.) for British India, and 71,939,187 (or over 22 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1921 33 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

Caste.—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet. The chief castes are:—Sheikh (33,388,000), Brahman (14,255,000), Chamar (11,225,000), Ahir (9,032,000), Rajput (8,773,000), Burmese (7,827,000), Jat (7,375,000), Maratha (6,566,000).

Religions.—The population by religions in 1921 includes 216,734,586 Hindus (68 per cent. of the total), 68,735,233 Muhammadans (21 per cent.), 11,571,268 Buddhists (3·6 per cent.), nearly all in Burma, leaving nearly 7 per cent. for all other religions, including 4,754,064 Christians (seven-twelfths of whom are in Madras, Travancore, and Cochin), 3,238,803 Sikhs, 1,178,596 Jains (a decline), 101,778 Parsis, and 9,774,611 described as Primitive or Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1921 dependent on pasture and agriculture. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services support over 4,825,000 persons.

Sex.—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945.

Languages.—India has 222 vernacular languages, of extraordinary variety. The languages spoken by 316,056,000 persons in 1921 are grouped in seven families. The principal languages are Western Hindi (spoken by 96,714,000 persons), Bengali (49,295,000), Telugu (23,601,000), Marathi (18,798,000), Tamil (18,780,000), Punjabi (16,231,000), Rajasthani (12,681,000), after which come Oriya, Kanarese, Gujarati, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The writers of these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads;* their epics, the *Mahabharata* and *Ramayana*, extol their mythical heroes; while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriya as is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 350 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Me-

gasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to litigation, and notes the absence of slavery. Asoka (272–232 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 695 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606–648) after many years of fighting, made himself master of Northern India, and ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions, but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years: but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutb-ud-din, whose memory is perpetuated by the Kutb Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 *Babar*, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, *Humayun* (1530–56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540–1545. *Akbar the Great*, Humayun's son (1556–1605), spent a long reign in firmly establishing the empire, at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms. He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance minister, Abul Fazl, the historian of his reign; and Faiz, the poet. *Jahangir* (1605–27) received in 1616 Sir Thomas Roe, the ambassador of James I. Under *Shah Jahan* (1627–1658) the Mogul Empire reached the zenith of its glory. Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658–1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and *Bahadur Shah* (1707–12) secured the crown. After four short-lived emperors *Muhammad Shah* (1719–48), grandson of Bahadur came to the throne. His viceroys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam). In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, *Ahmad Shah* (1748–1754) and *Alamgir II* (1754–1759), occupied the throne and were succeeded by *Shah Alam* (1759–1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Sivaji* (1627–1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishwanath* (1712–1720) Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family. Sivaji's descendants thenceforth holding a merely nominal position. Under the Peishwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gujarat, Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul

empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the one God purity of life and abolition of caste. He had ten successors named *gurus* or apostles, ending with *Govind Singh* (1708). The sect, though cruelly persecuted survived, and gradually adopted a political organisation. It became a power under *Runjit Singh* (1780-1839) who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the trading nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the *Portuguese* enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505-1509), established numerous factories and fortresses, while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire realisation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under Philip II., the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to other parts of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the *Dutch* were driven to trade directly with the East. In 1602, by amalgamating existing trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were gradually captured. By 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. *French* and *Danish* East India Companies were established in 1601 and 1616 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in 1612. In 1615 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George; in 1653 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay, in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company." After a brief period of conflict and trade losses, the rival companies came to terms in 1702, and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant; and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing

to Clive's efforts, the Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their government Thus were laid the foundations of England's territorial dominion in India

After an interval of minister *Warren Hastings* (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General on the creation of that office under the Regulating Act of 1773 He vigorously reformed the revenue system and judicial procedure Hastings was the first great administrative organiser of the British possessions He greatly increased the power and territory of the Company, notwithstanding the opposition of his Council Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of *Lord Cornwallis* (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore War, in which he defeated Tippoo, the son and successor of Hyder Ali The rule of *Sir John Shore* (1793-98) was uneventful.

The administration of the *Marquess Wellesley* (1798-1805) was distinguished by many important events. Tippoo, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta confederacy, but led to the Second and Third Mahratta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India During the brief second administration of *Lord Cornwallis* (1805), and that of *Sir G. Barlow* (1805-7), Wellesley's policy of subsidiary alliances was reversed

Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the *Marquess of Hastings* (1814-23) a severe struggle with Nepaul ended with the Treaty of Segouli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa created Bombay Presidency to its present dimensions Lord Hastings in the same year crushed the marauding Pindaris of Central India, who had devastated the country in all directions Reviving Lord Wellesley's policy of alliance he secured on their existing basis the relations of the Supreme Power with the feudatory states of Rajputana and Central India He encouraged commerce *Lord Amherst* (1823-8) succeeded Lord Hastings Encroachments on British territory by the King of Ava and his insolent refusal of all redress led to the first Burmese War which cost 20,000 lives and nearly £14,000,000 but gave to India the provinces of Arakan and Tenasserim and, practically, Assam.

While *Lord William Bentinck* was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education the liberty of the Press finance and justice The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of *Lord Auckland* (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the total retreat from Cabul The administration of *Lord Ellenborough* (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely contested battles, ending with Sobraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events The second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *viâ* the Red Sea, and opened the Ganges Canal His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 this "doctrine of lapse" was applied to Satara, and in 1853 Jhansi similarly became British territory; while on the death of the last of the Mahratta Princes of Nagpur his territory was annexed, and became the Central Provinces in 1853 In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India A mutiny of sepoys broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt The siege of Delhi, the

massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN —The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company" Legislative Councils were established *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War In 1877 the Queen assumed the title of EMPRESS OF INDIA

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms

His successor was the *Marquess of Dufferin* (1884-88) In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions Lord Curzon's term of office was a period of reform and reconstruction He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders The famine codes were amended A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901) The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated Educational policy was reviewed and reforms introduced A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 *Lord Ampthill* occupied the post of Viceroy *Lord Curzon* was reappointed in Dec., 1904 In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905-6 For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907 In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1912, and a new Seditious

Meetings Act was passed A great Durbar was held at Delhi on 12 December, 1911, by H.M. King George, to announce his Coronation On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz, the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam Delhi was chosen as the capital on geographical, historical, and political grounds The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. In Dec, 1912, the Viceroy took formal possession of the new headquarters at Delhi The State entry was marred by an attempt on the life of the Viceroy The outbreak of *The Great War* in August, 1914, was the signal for an outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Several tribal risings on the North-West Frontier were promptly and rigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms

Lord Chelmsford succeeded in April, 1916. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Public Services Commission, appointed during Lord Hardinge's administration, reported. Three leading Indians attended the Imperial War Cabinet. Action was taken against the Mahsuds and Mohmands on the North-West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced.

Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress The year 1918 was marked by some symptoms of unrest; the Rowlatt Committee, appointed in 1917, reported, and revealed evidence of the association of the Bengal seditionists with German plots; anti-Moslem riots broke out in Bengal, and Muhammadans organised agitation leading to disturbances in Madras and Calcutta The operations against the Mahsuds were closed. The Bombay Government took the first steps towards obligatory primary education, a policy of more complete local self-government was decided on by the Government of India. The influenza epidemic spread to India, and it is estimated that over 12 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916 issued a report. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmsford Joint Report, and eventually passed During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were undertaken. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a 'passive resistance' movement, inaugurated by Mr Ghandi against the 'Rowlatt" Bills, introduced by the Government of India on the recommendation of the "Rowlatt" Committee, for renewing some of the powers which the Government had provided themselves during the War to deal with sedition. The movement spread to Bombay, and the local government was forced to deport Mr Horniman, the Editor of the *Bombay Chronicle*. The murder of the Amir and the subsequent events in Afghanistan were followed by an inroad of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. Noteworthy features in the progress of India during the year were the appointment of an Indian, Lord Sinha, as Under-Secretary of State for India in the Home Government, and the representation of India at the Peace Conference by two Indians, H.H the Maharajah of Bikanir and Lord Sinha The policy underlying the Government of India Act, 1919, mainly based on the recommendations of the "Montagu-Chelmsford" Report, viz, the increasing association of Indians in every branch of the Administration, with a view to the progressive realisation of responsible government, was carried forward a further stage in 1920 by the Home Parliament, which, by rules, laid down the details of the constitution of the new Central and Provincial Governments (*see* pp 606 and 609). One section of the India Home Rule for India party, dissatisfied with the Act, threatened non-co-operation with the Government in the future working of the reforms, and with the assistance of some Muhammadans, Mr. Gandhi, a Hindu, commenced a movement to carry out the threat, but the support of the "Moderate" wing of the party, including that of Mrs. Besant, was given to the Government A prominent and distinguished Indian, Lord Sinha, was designated as the first Governor of Bihar and Orissa The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which the Viceroy announced

Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, i.e., an exchange rate of Rs 10 to the £, was adopted. A *High Commissioner for India* in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed The Army in India and the Medical Services Committees respectively reported The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

In January, 1921, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught

Lord Reading succeeded in April, 1921 The battle between constitutionalism and revolution continued A conflict between Sikhs at Nankana resulted in many deaths Mr Gandhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrests. The Moplahs (Muhammadan fanatics of Malabar) resisted the ordinary processes of law, and a widespread outbreak of violence ensued and forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. The deficit in the Budget, due mainly to war commitments, compelled Government to impose additional taxation Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England The Jails Committee reported, and Government announced its intention to abolish the Andamans penal settlement

In November the Prince of Wales visited India. In 1922 the Government arrested Mr Gandhi, who was sentenced to six years' imprisonment The Budget showed a deficit necessitating additional taxation. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press

The Fiscal Commission (appointed in 1921) reported and advised the adoption of a policy of protection.

The Hon. V. Srinivasa Sastri visited the Dominions, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Dominions. There was peace on the tribal frontier except in Waziristan. Some of the Wazir and Mahsud tribal sections entered into satisfactory engagements. Twenty-three Acts and Regulations supplementing the criminal law were repealed. The Assembly agreed to the proposal to devote 150 crores of rupees (£100,000,000) to the rehabilitation of railways during the next five years A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province The "Inchcape" Retrenchment Committee, appointed in 1922, reported and recommended a total reduction in the Budget of Rs 19¼ crores (£12,833,000 at 15 rupees to the £) The Government proposed to raise the salt tax Its proposals were defeated in the Assembly, whereupon Lord Reading certified the Bill under the provisions of section 67B of the Government of India Act as essential for the interests of British India. The Government accepted the principle of Protection, but declared that it should be applied with discrimination; hitherto the Indian tariff had been a revenue tariff. A trade Convention was concluded with Afghanistan A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians The new frontier policy was further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border: Jandola and Razmak were held by regular troops pending the completion of this road programme The question of the status of Indians in Kenya evoked much interest and controversy. The Secretary of State (Viscount Peel), the Maharajah of Alwar and Sir Tej Bahadur Sapru represented India at the Imperial Conference, at which a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1921 that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, had been given effect to and to what extent it could be further applied. Demands for the expansion of the Indian Constitution were made in the Indian Legislature, but the Secretary of State declined to submit the question to Parliament, on the ground that the experience of the working of the new Constitution had not yet been adequately tested. In 1923-24 the elections for the Legislative Assembly and the Provincial Councils were held. The total electorate was 990,979 for the Legislative Assembly and 5,820,345 for eight Provincial Councils. The Swarajists obtained a majority in the Central Provinces and increased their numbers in nearly all the other Provincial Councils and in the Legislative Assembly. When the new Councils met Government proposals were blocked and the Governor-General was again forced to "certify" the Budget after it had been rejected in the Legislative Assembly. In the Central Provinces and Bengal the Governors were compelled, in consequence of the opposition, to take over all the "transferred" subjects from the Indian Ministers. Conspiracies and methods of violence to further political aims were revived during the year, and the Bengal Government was given special powers to deal with violent crime. The Punjab was greatly disturbed by the Sikh invasion of the Nabha State The Royal Commission on the Superior Civil Services, appointed in 1923, reported and recommended financial improvements for the Indian Civil

and other Services Further Indianisation of the Services was recommended, viz, 60 per cent. of Indians in the Indian Civil Service as compared with 39 per cent, in the Police 50 per cent, and in the Forests Services 75 per cent During the year a Legislative Council was set up in Coorg

Early in 1925, the Swarajist leader, Mr. Das, repudiated the policy of violence, but asked in return for the cessation of "repressive" measures A committee was appointed to enquire into the difficulties arising from or inherent in the working of the Constitution, and recommended many alterations, particularly that the control of the Secretary of State should be relaxed in purely Indian matters. The terms of reference did not, however, extend to the larger question of a complete revision of the Constitution, contemplated in Montagu-Chelmsford scheme of 1918 The Viceroy came home to confer with the Home Government, and on his return to India announced the decision that the moment for such an enquiry had not arrived The political situation was somewhat confused by the sudden death of the Swarajist leader, Mr. Das, who was succeeded by Mr. J M. Sen Gupta Das The first railway electrification scheme in India was inaugurated in Bombay, and in Madras the Mettur-Cauvery irrigation project, by which 300,000 acres will be brought under irrigation, was commenced. The Government extended the policy of protection by granting a bounty on steel manufactured in India In Bombay the mill-hands struck against a reduction of wages, and Government was asked by the mill owners to repeal the cotton excise duty. The Khyber Pass Railway, 27 miles in length from Jamrud—some three miles from the entrance of the Pass—to Landi Kotal, on the Afghan border, was opened

In 1926 the Finance Member announced, for the fourth year in succession, a balanced budget, and that, consequently, more expenditure on medical research, education, sanitation, &c, was contemplated. The Cotton Excise duty was abolished.

H.E H. the Nizam of Hyderabad asked for the restoration of the Province of Berar, which had been leased in perpetuity to the British Government in 1902. The Government of India were unable to agree to the grounds on which the claim was based.

It was decided to reconstruct the Royal Indian Marine as a combatant force so that India may ultimately undertake her own naval defence.

The Government of India decided to prohibit the export of opium for medical purposes, thus taking the lead in initiating the measures for which the Geneva Protocol provides

Lord Irwin succeeded Lord Reading as Viceroy in April, 1926

In the United Provinces a Bill was passed to improve the lot of tenants in Agra Province by facilitating occupancy tenure and for the prevention of unauthorised imposts by landlords.

The Royal Commission on Indian Currency and Finance recommended that the gold value of the rupee should be fixed at 1*s.* 6*d.*, that the currency authority should be put under a statutory obligation to buy and sell gold or gold exchange at appropriate prices to maintain the ratio, that a central bank should be created apart from the Imperial Bank and that measures should be taken to establish a gold standard for India Government announced their intention to adopt the ratio of 1*s* 6*d* and to pass the necessary legislation to put the matter on a statutory basis

Following the success of the Government mission for the suppression of slave trading in the Hukawng valley an expedition was sent to the Kachin tribal chiefs in Burma with the object of endeavouring to persuade the chiefs to agree to the abolition of the system of tribal slavery in the area lying between the head waters of the Irrawaddy In Nepal the slave liberation scheme formulated by the Prime Minister of that State was completed at a cost of £275,000

Important changes in the administration of the State of Hyderabad were made by H H. the Nizam following representations by the Supreme Government.

The Secretary of State for India, H.H. the Maharajah of Burdwan and Mr. D T Chadwick represented India at the Imperial Conference.

During the year there was a recrudescence of communal and religious strife between Moslems and Hindus, and serious riots, with great loss of lives, occurred in most parts of India particularly in Kohat, Calcutta and Delhi The Government of Bengal was obliged to proclaim a state of emergency

The elections for the Indian Assembly and Provincial Councils were held towards the close of the year, and were contested on a communal platform.

The Swarajists obtained a majority of seats over any other group in the Legislative Assembly, and in the Legislative Councils of Madras, Bengal, Bihar and Orissa, and the Central Provinces

In 1927 a continuance of the measures for the protection of the Indian Steel Industry, in a modified form, was recommended by the Indian Tariff Board, whose main proposals were accepted by the Government of India. It was also decided to protect the cotton textile industry against competition in cotton yarn produced under conditions which enable such yarn to be produced at a cost below that at which it can be produced in India, by an alteration in the import duty on cotton yarn, and to abolish the duty on imported mill stores, etc. An Act for the registration of trade unions came into force The rupee was stabilised by legislation, at 1*s.* 6*d.*, and a bill for the establishment of an Indian Reserve Bank was introduced.

The Bombay Back Bay Reclamation Committee recommended the carrying on of a certain portion of the work, but that it should in future, as far as possible, be undertaken by contract agency.

A substantial and progressive Indianisation of the Indian Army was recommended by the Sandhurst (Skeen) Committee in order that, by 1952, 50 per cent of the cadre of officers should be Indians

A settlement was reached with the Government of South Africa on the question of the position of Indians in the Union, and Mr. Srinivasa Sastri was appointed the first Agent-General for India in South Africa. A Public Services Commission was formally constituted. The new Council House at New Delhi was opened The Indian Princes met in conference to consider their future status. His Highness, the Maharajah of

Patiala, sanctioned a scheme of compulsory education in his State. Slavery was abolished in the State of Kalat (Baluchistan).

In the Home Parliament the Indian Navy Bill and the Indian Church Bill were introduced. The latter provides that the Church in India shall be an autonomous body.

In November the Home Government announced its intention to set up a Statutory Commission, with the Rt Hon Sir John Simon as Chairman to report to what extent it is desirable to establish the principles of responsible government in India or to extend, modify or restrict the degree of responsible government

In 1928 the Commission visited India, but was unfavourably received by many who were dissatisfied with the terms of its reference. Boycotts and sympathetic strikes were organised Towards the end of the year the Commission succeeded in securing the offer of the co-operation of most of the political parties and groups previously hostile

The Royal Commission on Agriculture in India (appointed in 1926) issued its Report and the first step to carry out its recommendations was taken by the opening of a Conference in India to draw up schemes for co-ordinated action

A Committee, with Sir Harcourt Butler, was appointed to consider the relations between the Paramount Power and the Indian States, with special reference to the financial and economic relations between British India and the States. The Indian Princes demanded that their position should be taken into consideration if and when any further step towards self-government is made

The Government of India decided to accept some of the initial recommendations of the Skeen Committee, appointed in 1927 to report as to the desirability of further measures for the Indianization of the Indian Army It was announced that in future, direct vacancies open to Indian candidates at Sandhurst will be doubled, that a certain number of vacancies will be reserved to Indian officers holding the Viceroy's commission, and that Woolwich and Cranwell will be open to Indian aspirants for King's Commissions.

IMPERIAL LEGISLATION.—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act* (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed, in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act as amended by Acts of 1889, 1907, 1915 and 1919, at least one-half of the members of Council must have served in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 12 and must not be less than 8, and is at present 11 Their term of office is now 5 years, with power of extension. There are now 3 Indian members In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. The Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915. The Government of India Act, 1919, confers on provinces a larger measure of independence of the Government of India, it distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature, it provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the major provinces shall be governed, in relation to reserved subjects, by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor-General and a Public Services Commission on India.

INDIAN LAW.—The law administered in the Indian courts consists mainly of: (1) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

The Government of India.

EMPEROR OF INDIA—H.I.M. GEORGE V.

Secretary of State—The Right Hon. Viscount Peel, G.B.E.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (*e.g.*, foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (*see* page 211).

The King-Emperor appoints the Governor-General, the Governors of the 9 major Provinces (Bengal, Madras, Bombay the United Provinces, Bihar and Orissa, the Punjab, the Central Provinces, Assam and Burma), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 7 members, including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the *Indian Legislature* consists of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (*see* p. 606 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council, of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi, the summer headquarters being still at Simla.

Business is conducted by 9 Departments—Finance; Foreign and Political; Home; Legislative, Commerce, Industries and Labour, Education, Health and Lands; Army; and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Feudatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat look after the commercial and political interests of India in those quarters. The *Home Department* deals with the internal politics, civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the *Legislative Department*. The department of *Commerce* deals with trade and shipping, ports, &c. The department of *Industries and Labour* deals with industries, stores, labour, public works, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education, Health and Lands Department* has the control of education, local government, sanitation, land revenue and surveys, agriculture, famine, meteorology, forests, foodstuffs, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce Member of Council.

British India is divided into 15 *Local Governments and Administrations*, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, and Burma, under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Ajmer-Merwara, Coorg, and the Andaman and Nicobar Islands.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government,

he has control in every department of administration, and is the responsible head of his jurisdiction. There are 273 Districts in British India

There are separate *High Courts* for both civil and criminal cases in Madras, Bombay, Bengal, Bihar and Orissa, and in the United Provinces of Agra and Oudh, the Punjab and Burma, and a Chief Court in Oudh Appeals may be carried to the English Privy Council The Central Provinces, Berar, Coorg, Sind, and the North-West Frontier Province have each a *Judicial Commissioner's Court.*

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

Under the Government of India Act, 1919, and rules made thereunder, the local governments are given a large measure of independence of the Supreme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as 'Central," such as defence, political relations, railways, tariffs, &c. Other administrative heads, classified as "Provincial"—viz, local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, &c., are wholly or partly handed over to Provincial Governments with responsibility, subject to certain limitations, within their own areas, for administering them. In the nine major or "Governors'" Provinces—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjab, Assam and Burma—provincial subjects are further divided into "reserved" and "transferred subjects," the administration of, and responsibility for, which rests with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of the Legislative Council by, and hold office during the pleasure of, the Governor. They are directly responsible to the Legislative Council for the administration of the 'transferred' subjects, but can be overruled by the Governor if he considers their policy inconsistent with the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control.

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor. The previous sanction of the Governor-General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor-General for the signification of His Majesty's pleasure, but in emergencies the Governor-General may assent to them, subject to disallowance by His Majesty in Council. Governor has powers of assenting to or withholding assent to, or of returning for reconsideration, other Bills but must in certain circumstances send them for consideration to the Governor General, who may reserve them for His Majesty's pleasure

Provincial Budgets are voted on by the Legislative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal of a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote: a deadlock is thus avoided in case of irresponsible action by the Legislative Council in the matter of supply

Of the members nominated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests Males over 21 (18 in the case of Burma) years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tax or municipal rates) are eligible for the franchise Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and gives the vote to small cultivators and some wage earners. The electorate of 1926 comprised over 8,258,000 persons, of which over 346,000 were women in the six provinces where women are enfranchised (excluding Assam where no separate record was kept of male or female voters).

(1) MADRAS (area, 142,260 sq miles; pop 42,318,985) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801 With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c, are cultivated Manganese ore is mined and exported Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 89 per cent of the people are Hindus There are 1,361,000 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil, Telugu and Malayalam Madura (138,894) and Trichinopoly (120,422) famous for their Hindu temples, are the chief cities after the capital

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State Sind was conquered in 1843. The province (including *Sind*, but not *Aden* and *Perim*, which are also attached to it) contains 122,979 square miles (about equal in size to the British Isles), with a population of 19,291,719. Eastern Sind is desert The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 76 per cent. of the people of the Presidency are Hindus, and 20 per cent Muhammadans. The Parsis (83,000), who are very prominent in trade, are mainly found in Bombay Marathi, Gujarati, Sindhi, Kanarese and Western Hindi, are the principal languages Millet and other food-grains and oil seeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards, south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. Ahmedabad (274,007), Poona (214,796), Sholapur (119,582),

Surat (127,434), and Karachi (216,883), the capital and chief port of Sind, are the most important cities For Aden and Perim, *see* p 615.

(3) BENGAL (area of newly-constituted province, 76,843 sq miles, with population of 46,695,536) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 54 per cent. of the population are Muhammadans and 43 per cent. Hindus. The principal languages are Bengali and Western Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal The East Indian Railway is the great artery of the Ganges Valley The Eastern Bengal Railway, running north and the Bengal-Nagpur, south, from Calcutta are also important. Important cities are Dacca (129,450), now the second capital, and Howrah (195,301), a great jute-manufacturing centre adjoining Calcutta

(4) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 106,295 sq. miles; pop. 45,375,787), forms the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the

central plateau Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14 per cent Muhammadans. Western Hindi is the chief language The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. Among the important cities may be named the ancient city of Agra (185,532), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (198,447), the great manufacturing centre, Cawnpore (216,436), Lucknow (240,566), Bareilly (129,459), and Allahabad (157,220)

(5) The PUNJAB (area, 99,846 sq. miles; pop. 20,685,024) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849 Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton The Punjab possesses rich deposits of rock-salt, which with wheat and other grains and cotton, form the principal exports. Timber is scarce. 55% of the population are Muhammadans, and 32% are Hindus The Sikhs number about 3,107,000 in the Punjab and Punjab States, to which they are mainly confined. Panjabi, Western Punjabi and Western Hindi are the chief languages The various branches of the North-Western and Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 160,218 people.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west It is the largest province, having a total area of 233,707 sq miles, about equal to Spain and Portugal, with a population of 13,212,192. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885 The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled; but, owing to remarkable prosperity, the population has increased 9 per cent in 10 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Shangale are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country Rice, the main product of the delta region, is largely milled at Rangoon and exported The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China The Burma Railways have reached Myitkyina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin.

This province, which came into existence on April 1, 1912, comprises Bihar, Orissa and Chota-Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures The population is exceedingly dense Orissa and Chota-Nagpur are ill-watered and liable to drought. Orissa has a variety of races and a considerable seaboard The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1916. Bihar and Orissa yields the greater part of India's output of coal and mica Rice, wheat, oilseeds, sugar and tobacco are cultivated 82% of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. (8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,109 sq. miles, pop. 10,837,444). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Western Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal-Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,767 sq. miles, pop. 3,075,316), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. Seat of Government, Shillong.

The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

INDIAN APPOINTMENTS.

THE highest civil administration of British India is recruited from four sources—1. Open competitive examination in England and India 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in London July–August Candidates must be over 21 and under 24 on Aug. 1 in the year of examination Application for permission to compete must be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. 1. Examination fee, £8 Selected candidates are on probation in England for one or two years, and receive an allowance of £300 if of European domicile, or £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for their guidance A final examination is held in Indian law, language, &c. A first-class passage to India will be engaged for selected candidates In case of failure to pass the final examination, or to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences usually at Rs. 7,200 a year. The Regulations for competitive examinations to be held in India can be obtained from the India Office, London.

The Indian Army.—Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 18 and 19 years of age (in

the case of Indian candidates the age limits are 18 and 20 years) Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India, the remainder being offered to candidates in the order of their passing the entrance examination A few direct appointments to the Unattached List for the Indian Army are made by the War Office from candidates nominated by the principal Universities in the United Kingdom A few direct appointments are also offered to officers of the Territorial Army and Supernumerary Reserve between the ages of 21 and 25 who undertake the final examination of the Royal Military College, Sandhurst, under arrangements made by the War Office. At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's initial pay is at the present moment Rs. 480 (£36) per month. Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W C

Indian Police Force (Higher Grade)—A competitive examination is usually held in London and other centres in June of each year in conjunction with the Army and Air Force Examination. A fee of £4 is required from candidates examined in London, and a fee of £5 from those examined in other centres. Save as provided in the regulations a candidate must be a European British subject. Indian and Burmese candidates are eligible if they have been resident in the United Kingdom for not less than five years. Candidates must be above 19 and under 21 years of age on Aug. 1, must be unmarried, and if they marry before reaching India must forfeit their appointments Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London. Successful candidates are required to undergo a strict medical examination; are examined as to their ability to ride Free passage to India is granted to probationers. The initial pay is Rs 350 per month, plus an overseas allowance of Rs 100 per month, rising to Rs. 450 in the case of probationers with non-Indian domicile. The pay proceeds by increments to Rs. 700, and thence to Rs. 1,350 per month, subject to efficiency bars, with prospects of promotion to higher posts.

The patronage of the *Secretary of State for India* is small. Appointments of *Chaplains* of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplaincies Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age On appointment chaplains receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,500 per month.

Indian Railway Service of Engineers.—The Secretary of State in Council from time to time makes a number of appointments of Asst Executive Engineers on Indian State Railways. In making these appointments he acts with the advice of a Selection Committee Application forms can be obtained from the Secretary, Services and General Dept, India Office, Whitehall, London. Every candidate must have attained the age of 21, and not attained the age of 25 Candidates must produce evidence that they have obtained one of the University degrees or passed one of the examinations specified in the Regulations, and must have had at least one full year's practical experience of civil engineering under a qualified civil engineer. Those whose qualifying diploma has been obtained without a college course must have had a full three years of such practical experience Every European candidate must be a British subject of non-Asiatic domicile. All selected candidates are on probation in the first instance on an initial pay (including overseas pay) of Rs. 525 a month and are required to execute agreements for three years, at the end of which period, if they have given satisfaction, their services are retained The pay rises by increments to Rs. 1,025 in the 9th year and to Rs. 1,675 in the 24th year of service, with possibilities of promotion to higher posts. From time to time a number of appointments of Asst. Executive Engineers in the Public Works Dept in India are made under regulations, which are generally the same as for the Indian State Railways.

Indian Forest Service.—In making appointments, the Secretary of State for India in Council acts with the advice of a Selection Committee. Applications for appointment must be made on a printed form to be obtained from the India Office, Whitehall, London, S.W. 1. The normal age limits are over 21 and under 24 on the 1st January of the year of candidature. No person will be deemed qualified who shall not satisfy the Secretary of State that he is a British subject. Selected candidates must be prepared to give an undertaking that they will not marry before reaching India Any breach of this undertaking will entail forfeiture of appointment. Every candidate must be of good physique and good character. Candidates must have obtained a degree or diploma in Forestry at a University of Great Britain or Ireland, and must possess such practical knowledge of Forestry as will enable them to take up duty as an Assistant Conservator of Forests without undergoing further training in Europe Candidates are required to produce evidence that they have a fair knowledge of either German or French. Preference is given to candidates who possess an Honours degree in Natural Science in addition to the above-mentioned qualifications Applications are accepted from candidates who, on the 1st July of the year of candidature, have already sat at an examination for a degree or diploma in Forestry, but who have not learned the result of the examination subject to the condition that their applications will not be proceeded with if they are found to have failed at the examination when the result is announced On appointment to the Indian Forest Service the salary commences at Rs 475 and rises by increments to Rs. 1,800, with prospects of promotion.

Further information regarding these and other Indian appointments can be obtained on application, from the Under-Secretary of State, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, which can be consulted at the India Office

THE FINANCES OF INDIA (CENTRAL GOVERNMENT AND PROVINCIAL GOVERNMENTS) FOR THE YEAR ENDED MARCH 31, 1927.

(In lakhs of rupees.)*

Separation of Central and Provincial Finances.

The Government of India Act, 1919, was designed *inter alia* to secure a greater measure of independence for Provincial Governments, and to this end provision was made, in the Act and in Rules subsequently published under authority of the Act, for the delimitation of the functions of Government as between the Government of India and the chief Provincial Governments, and for the definite assignments to each of these Provincial Governments of specific revenues of their own. Effect has been given to these measures of devolution in the nine "Governor's Provinces," viz.: Bengal, Madras, Bombay, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam and Burma and in the Province of Coorg. As regards these provinces the functions of Government have been classified as either "central subjects" or "provincial subjects" A general authority to control all matters coming under the latter head, subject to certain expressed provisos, is devolved upon the Local Governments concerned.

The sources of revenue available to Local Governments for the purpose of defraying their administrative charges consist, in the main, of the receipts from those provincial subjects which are revenue-producing, the principal heads being Land Revenue Irrigation, Stamp Duties and Excise. In addition, a local Government is given a small share in any expansion of Income Tax (otherwise a 'central" source of revenue) that may be due to an increase of the total assessed incomes within the Province over that of 1920-21.

When the division of the sources of revenue was made between the Central and Provincial Governments, it was realized that the Central Government would be left insufficiently provided. It was therefore arranged that an annual contribution should be made by eight of the local Governments to the Central Government. The annual contributions fixed at the outset aggregated 983 lakhs of rupees. They were not, except in case of emergency and with the sanction of the Secretary of State, to be subject to increase, and should reduction of the aggregate be found possible, reductions were to be made in fixed proportions from the quotas of the several Provinces. The general policy pursued has involved a progressive reduction of the provincial contributions with a view to their ultimate cessation. The Budget for 1928-29 provided for the remission of those portions of the contributions which had not been permanently remitted at the close of the previous year.

The revised financial arrangements outlined above came into force from April 1, 1921, as from that date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government. In the case of Coorg the separation was made on April 1, 1924.

* A lakh = Rs. 100,000. (*See* p. 624 for the Indian system of notation.)

° Including Contributions to the Central Government

Net Revenue and Expenditure of the Central Government.

The figures of Gross Revenue given above include the net receipts of railways and other commercial undertakings without any deduction on account of interest charges, the total receipts from the sale of opium, and the receipts of certain spending departments: while the figures of Gross Expenditure include the interest charges of commercial undertakings, and the cost of cultivation and manufacture of opium. This method of compiling the figures causes the revenue available for administrative purposes and the expenditure on such purposes to appear greater than they really are. A statement of the net revenue and expenditure of the Central Government for 1926-27 is therefore given in the table below, which shows the *net* revenue derived from commercial undertakings after deducting all expenditure including interest charges, similar adjustments being made under other heads of revenue and expenditure by deducting (1) the cost of cultivation and manufacture of opium from sale receipts, and (2) the receipts of the spending departments from the gross expenditure incurred by them. The cost of the establishments maintained for the collection of revenue is not shown as a deduction from revenue, but as a separate head of expenditure.

Burden of Taxation.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden in 1926-27 was estimated at Rs 4·1 per head, or, if land revenue (which is akin to rent) be added, Rs. 5·5 per head.

Debt and Assets.—On March 31, 1928, the public debt of the Central and Provincial Governments amounted to Rs 8 87 36.45 000 (£665,523,000). Miscellaneous obligations (Savings Bank balances, &c.) amounted to about

Rs 119 crores Its advances to Indian States, corporations, agriculturists, &c., stood at Rs 140 crores. Other assets were the Gold Standard Reserve of £40,000,000, and the cash balances in England and India, £5 627,000 and Rs. 9·2 crores respectively

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed, elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years) The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *raiyatwari* tenure prevails, and each raiyat, or peasant proprietor, holds direct from the State In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent of the rental paid to the landlord by the cultivating tenant, while in temporarily settled raiyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment The gross land revenue paid to the State (Central and Provincial Governments) in 1926–27 amounted to Rs. 3,488 lakhs (£26,162,000 at 1/6 the rupee).

THE OPIUM REVENUE.—Poppy may now be grown only in parts of the United Provinces and in the Central Indian (Malwa) States. Except in these States the manufacture is a Government monopoly. In 1926–27, 8,012 chests of Bengal opium were sold direct to the Governments of Borneo, Netherlands, Indies, Hong Kong, Straits Settlements, &c.; 4,922 chests were issued to the Excise Department for local consumption, and 20 chests were supplied to the Medical Department for medical purposes, and by export to the United Kingdom for sale to chemists. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £3,249,000. The expenses of production, &c., were £753,000. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited. In 1926 the Government of India announced its intention to restrict the export of opium except for medicinal purposes.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs The revenue amounted to Rs. 1,982 lakhs (£14,870,000) gross in 1926–27 (Central and Provincial Governments).

CUSTOMS.—The net revenue was 4,738 lakhs (£35,535,000) in 1926–27. (For tariff *see* p. 623) The export duty on rice yielded 113 lakhs (£846,000). The export duty on jute produced 390 lakhs (£2,922,000) The duty on motor spirit and Kerosene amounted to 201 lakhs (£1,504,000).

INCOME TAX is levied on non-agricultural incomes at the following rates:—

Annual Income	*Rate of Tax per Rupee* *
Rs. 2,000 and over	5 pies
,, 5,000 ,,	6 ,,
,, 10,000 ,,	9 ,,
,, 20,000 ,,	12 ,,
,, 30,000 ,,	15 ,,
,, 40,000 ,,	18 ,,

In the case of companies and registered firms, whatever the total income, the rate is 18 pies in the rupee.

Super-tax is leviable in addition to ordinary income tax on incomes of Hindu undivided families at 1 to 6 annas in the rupee on incomes over Rs. 75,000, and on the taxable incomes of companies above Rs. 50,000 at a flat rate of 1 anna in the rupee Rs. 1,598 lakhs (£11,987,000) were received from taxes on income in 1926–27.

STAMPS.—Stamps yielded 1,320 lakhs gross (£9,897,000) in 1926–27. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SALT.—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (82 lb.) in 1903, to Rs. 1½ in 1905, and to R. 1 in 1907. It was increased to Rs. 1¼ on March 1, 1916, to Rs 2½ from March 1, 1923, and reduced to Rs. 1¼ from March 1, 1924. Rs. 670 lakhs (£5,023,000) were received from salt in 1926–27.

FORESTS.—About 99,000 square miles of forests are reserved and scientifically worked by the State, while about 150,000 square miles besides are under State control. The revenue from forests amounted to Rs. 619 lakhs (£4,641,000) in 1926–27. A third of the revenue comes from Burma

POSTS AND TELEGRAPHS.—The Post Office in 1926–27 conveyed 1,293 million of letters, postcards, newspapers, &c, and issued 37 million of money orders. Inland letter rates are the lowest in the world. The length of telegraph wires in India on March 31, 1927, was 512,000 miles, and the number of paid messages sent in 1926–27 was 19 million. The capital outlay amounted to 1,214 lakhs (£9,105,000) at the end of 1926–27 (excluding expired capital in respect of assets existing on April 1, 1925, and assets lost or abandoned amounting to lakhs 1,100 (£8,250,000)) The Indian Postal and Telegraph services were amalgamated on April 1, 1914 The combined services showed for the year 1926-27 a surplus of 62 lakhs before charging interest on debt. The net receipts of the Indo-European Telegraph Department amounted to 8·3 lakhs in 1926–27. Its capital expenditure to the end of 1926-27 was £925,000 (depreciated value)

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for traffic on March 31, 1927, was 39,049. Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and

* 12 pies = 1 anna, 16 annas = 1 rupee; 13⅓ rupees = £1 (statutory rate)

about 4½ per cent on the metre gauge. On March 31, 1927, the total capital at charge was Rs. 788 crores (£591,500,000). The net earnings of the railways in 1926-27 amounted to 4,265 lakhs (£31,990,000), showing a percentage of 5·4 on total capital at charge The number of passengers "originating" was 604 million, and the goods traffic amounted to 85·8 million tons. Rates are very low, third-class passengers travelling on the average over four miles for a penny The net gain to the Central Government from "Budget Lines" administered from funds under its direct control was 7½ crores in 1926-27, of which 6 crores (£4,500,000) were appropriated by General Revenue, while the balance was transferred to the Railway Reserve Fund The total capital expenditure on State and other railways in 1926-27 was 2,920 lakhs (£21,900,000).

IRRIGATION —The total capital outlay on State irrigation works up to March 31, 1927, was £81,046,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,337,000 The area irrigated by Government irrigation works, excluding the Indian States, in 1925-26 amounted to 28 1 million acres, while the annual value of the crops raised amounted to over 1½ times the total capital expended on the works Two-fifths of the irrigation revenue comes from the Punjab

HOME CHARGES —The net expenditure in England, chargeable to Revenue, amounted in 1926-27 to £23,301,000. The main items were —Interest on Railway Debt and Annuities, £8 537,000; Interest on Ordinary Debt, £4,182,000, interest assumed in respect of British 5 per cent War Loan, £916,000, Stores, £2 060,000, of which £1,726,000 was for Marine and Military Stores; payments for British forces, troop service, &c., £3,550,000; Army non-effective charges, £3,462,000; Civil annuities, pensions, &c., £1,800,000; Furlough payments, civil and military, £1,742,000; home administration, £350,000 (less £116,000 contributed by H.M. Treasury) The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling

CURRENCY. —The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy. Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1916, was practically stable at 1s 4d. The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 10 rupees in 1920. In 1907 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways; the other half of the profit, and the whole of the interest, being added to the gold standard reserve. In June, 1912, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to £25,000,000. From April 1, 1921, the interest on investments in the Gold Standard Reserve, when that Reserve reaches £40,000 000, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 31, 1928, amounted to £53,795,000. Of this sum £1 123,655 has been used for capital expenditure on railways; the remainder, out of which £2,886,217 has been transferred to the Paper Currency Reserve in reduction of created rupee securities and £8 306,000 has been transferred to Revenue, has been credited to Reserve On March 31, 1928, the investments of this fund in sterling securities amounted to £37,844,000 (estimated value), while £4,028 was held in cash in England, and £2,152,000 deposited in gold at the Bank of England India has a paper currency The 1, 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue In 1918 a branch of the Royal Mint was established at Bombay for the minting of gold coins

ARMY —The sanctioned strength of the Army in India is: British troops and officers 68,300, Indian troops and officers, 162,300: Army in India Reserve of Officers, 1,850; Indian Army Reserve, 42,900; Auxiliary Force, 35,700; Indian State Forces, 44,700, and Indian Territorial Force, 19,000 For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902–9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912–13 to about 5,597 lakhs (£41,977,000) in 1926-27. The estimated net expenditure for 1928–29 is 5,510 lakhs (£41,325,000). During the Great War of 1914–18 the Government of India recruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about 1·3 million men. 1,215,000 officers and men were sent on service overseas from India; the total Indian casualties were 101,000. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved India has an Auxiliary Force on a volunteer basis Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of 10 sea-going vessels, and numerous smaller steamers and launches.

Director R I M, *Bombay*, Rear-Admiral H. T. Walwyn, C.B., D.S.O ..... .Rs. 2,800

In 1926 it was decided that the Royal Indian Marine shall be abolished, and that the vessels shall be transferred to the Royal Indian Navy, which will be constructed as a combatant force to enable India to enter upon the final stage of her development, and ultimately to undertake her own naval defence. The fleet will consist, in its first stage of development, of four sloops, two patrol-craft vessels, four trawlers and two survey ships, together with one depôt ship. Indians will be eligible for commissioned rank.

EDUCATION.—Elementary education is based, so far as possible on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. It has appealed to the natural intellectuality of the people and has succeeded only partially in stimulating practical application. There are 15 Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Dacca, Aligarh (Muhammadan), Lahore, Hyderabad, Mysore, Lucknow, Rangoon, Nagpur and Delhi. In State institutions education is secular. The institutions in 1925–26 numbered 238,000, and the scholars 10,514,000, including 1,117,000 females, excluding scholars in night schools in some Province. Of the institutions, about 75 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1925–26, £17,084,000, £3,695,000 came from fees, and £10,612,000 from Government revenues or local and municipal funds. The census of 1921 showed that only 139 males and 21 females per thousand are literate, in the sense of being able to write a letter and read the reply thereto.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1925–26 numbered 767, controlling a total population of nearly 19 million, and receiving an income of £8,573,000 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £3,446,000 from other sources (excluding loans). Out of 12,468 members of municipal bodies 932 were officials and 11,536 non-official. In almost all districts in British India there are local district boards, mainly representative. Over 31 per cent. of their total expenditure of about £10,243,089 in 1925–26 was devoted to civil works, 37 per cent. to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are over 9,470 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1925, 2,421,000 civil suits were instituted; 2,367,000 persons were tried, and 1,094,000 convicted, in criminal cases of whom 636 were sentenced to death and 539 executed, 1,711 to transportation, and 174,861 to imprisonment. The strength of the police in 1925 was 14,515 officers and 179,995 men. There were 769 prisons, with a daily average of 127,916 prisoners. At the convict settlement of Port Blair (Andamans) there were 7,799 prisoners on March 31, 1926.

VITAL STATISTICS.—The reporting of vital occurrences is still defective. The recorded death rate for British India in the decennium ended 1913 ranged between 38·21 per 1,000 in 1908 and 28·72 in 1913; it was 35·9 per 1,000 in 1919 and 24·72 in 1925. There were over 12 million deaths from influenza during 1918–19. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhœa, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1925 were about 11,721,000 in India as a whole. 19,258 people were killed by snakes and 1,962 by wild animals in 1925. In 3,972 hospitals and dispensaries, maintained mostly from public funds, 41,481,000 patients were treated in 1925. The number of persons vaccinated in 1925–26 was 11,988,000. According to the census of 1921 there were 102,400 lepers.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical and archæological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA.—Among the countries constituting the British Empire India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The table (p 622) exhibits the leading figures for the last five years in thousands of pounds sterling Rupees being converted at the rate of 13⅓ to the £)

During the year 1927–28 as compared with 1926–27 the value of the imports increased by Rs. 2,910 lakhs (£21,828,000), and the exports increased by Rs 2,020 lakhs (£15,077,000). In imports the principal articles showing increases were —Metals and ores (£3 428,000), machinery (£1,727,000), raw cotton (£1 262 000); railway plant (£1,130,000), grain (£1,042,000), motor cars, &c. (£970,000), artificial silk (£953,000) There were decreases in sugar (£2,988,000). apparel, earthenware, glass, brass and spices.

In the export trade (Indian merchandise) seeds increased by £5.703,000; raw jute by £2.911,000. grain by £2,738,000; tea by £2,585,000, metals by £1,321,000, leather by £1,270,000, hides by £1,222,000; lac by £1,137,000 There were also increases in coffee, coir, dyes, spices There were decreases in raw cotton (£8,161,000); cotton yarn (£1 557,000); and in oils, mica and raw hemp.

The bulk of the imports consists of manufactured articles while two-thirds of the exports consist of food, tobacco, and raw materials

SHIPPING.—In 1926–27 the number of vessels engaged in the foreign trade which entered and cleared with cargoes and in ballast at ports in British India was 7,450, with a tonnage of 17,040,000 Of this tonnage, nearly 72 per cent was under the British flag

PORTS.—The chief ports are Bombay, Calcutta, Rangoon, Karachi, and Madras

FOREIGN LAND TRADE OF INDIA.—The most important countries in the land trade are Nepal and the Shan States Complete statistics of the volume of the trade are not available, but the imports are estimated to amount to at least £16,000,000, and the exports to £14,000,000.

AGRICULTURE is by far the most important occupation of the people of India In British territory in 1925–26, 257,000,000 acres were sown Of the total area under crops nearly 9 per cent. was under wheat, 30 per cent under rice, and 39 per cent under other food-grains and pulses, 5½ per cent. under oilseeds, and 8½ per cent under cotton, jute, and other fibres Sugar, tea, and tobacco are other important crops The total area under irrigation was 50¾ million acres

BANKS.—In addition to the Imperial Bank of India, which is closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks In 1925 there were 28 Indian joint-stock banks, whose head offices are located in India, in addition to 18 exchange banks with head offices outside India, and 10 Indian co-operative banks, with capital and reserve of Rs 5 lakhs and over The capital of the Imperial Bank of India was Rs. 562 lakhs; reserve, Rs. 493 lakhs; deposits Rs. 8,329 lakhs, and cash balance, Rs 1,746 lakhs The corresponding figures for the Indian joint-stock banks were: capital Rs 673 lakhs, reserve, Rs. 387 lakhs; deposits, Rs 5,449 lakhs, cash balance, Rs. 1,009 lakhs The 18 exchange banks with head offices not located in India had.—capital, £74 million; reserve, £64 million; deposits, £924 million outside India, and Rs 7,055 lakhs in India, cash balances £122 million outside, and Rs. 941 lakhs in India The 10 Indian co-operative banks had a capital of Rs 60 lakhs; a reserve of Rs. 30 2 lakhs, deposits, Rs. 538 lakhs; loans outstanding, Rs. 446 lakhs; and cash balances amounting to Rs 37 lakhs The proportion per cent. of cash to liabilities on deposit was:—21% in the case of the Imperial Bank, 13% for exchange banks doing a considerable portion of their business in India; 15% for other exchange banks; and 19 to 20% in the case of Indian joint-stock banks.

CO-OPERATIVE CREDIT SOCIETIES.—In 1926–27 there were in British India and Indian States 1,998 central 78,940 agricultural and 8,133 non-agricultural societies, with a total membership of 3,422,000 and a capital of £50,950,000. The Central Banks shewed a profit of £313,000, and agricultural and non-agricultural societies £710,500.

MINERALS.—The output of coal in India in 1927 was 22,082,000 tons. The production has much increased in recent years Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 281 million in 1927 The production of salt is about 1,430,000 tons The production of manganese ore was about 1,129,000 tons, and of saltpetre 6,150 tons The yield of gold (nearly all from Mysore) was about 384,000 oz Monazite and tungsten ore have now taken an important place in the list of minerals of economic value produced in India The output of the former in 1927 was 280 tons, and of the latter 1,160 tons.

MANUFACTURES.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods Cotton-weaving is by far the most important hand industry There were 7,251 factories in 1926 subject to the Indian Factories Act, employing 1,518,000 persons, including 250,000 women and 60,100 children; the percentage of factories maintaining a week of 48 hours or less for men is 27, the corresponding percentage for women was 32 The maximum weekly hours for children are 36. The 303 cotton mills at work in British India and Indian States in 1925–26, mostly in Bombay and Ahmedabad, contained 8,403,000 spindles and 154,600 looms In 1925–26 the production was 686 million lb. of yarn (mostly of low counts) and 465 million lb. of woven goods. The 90 jute mills, mostly situated in or near Calcutta, contained 1,064,000 spindles and 50,500 looms. There were, in 1925, 16 woollen and 9 paper mills, 13 breweries, and various other factories.

JOINT STOCK COMPANIES.—In 1925–26 there were 5,311 joint-stock companies registered in British India and in the Indian States, with a paid-up capital of Rs 27,730 lakhs (£207,974,000). The companies were classified as follows:—Trading and manufacturing, 2,091, banking and loan, 981; tea and other planting, 515; mining, 344; cotton mills 301, jute mills, 53; other mills and presses, 198, estate, &c, 110; insurance, 81; railways, transport, &c., 191; navigation, 27; sugar, 40; others, 379

In addition there were 819 companies registered elsewhere than, but working in, British India and Indian States, with a capital of £554,050,000.

They were clasified as follows:—Trading and manufacturing, 311; banking and loan, 30: tea and other planting, 205; mining, 38; cotton mills, 10; jute mills, 7; other mills and presses, 2; insurances, 137; railways and other transport, 35; navigation, 18; sugar, 2; others, 24.

INDIAN SYSTEM OF NOTATION.—The Indian numerical notation system differs from the European Large numbers are punctuated as crores and lakhs and not in hundreds, thousands and millions A *lakh* is one hundred thousand (written out as 1,00,000), and a *crore* is one hundred lakhs or ten millions (1,00,00,000). Thus, 1,68,00,000 is read as 1 crore 68 lakhs. A lakh of rupees (Rs. 1,00,000), may be read as equal to £7,500 at 13⅓ rupees—the statutory rate adopted for conversion in this article. The rupee is divided into 16 annas and at 13⅓ rupees to £1 the anna is equivalent to 1⅛*d*. The anna is subdivided into 12 pies ($\frac{1}{12}$*d*. approximate value).

STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

The States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction, and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £626,400 (£242,500 from Mysore) were paid to the Government of India in 1926-27. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial Legislative Councils cannot legislate, and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 711,032 square miles, and a population of 71,939,187. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Indian State forces. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great

Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 662, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1920, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 625-626 are the names of 73 ruling chiefs who have salutes of eleven guns or more with some particulars of their States. Some well-known Indians of title, such as H.H. the Agha Khan, G.C.S.I., G.C.I.E., the Maharaja of Darbhanga, G.C.I.E., and the Maharajah of Burdwan, K.C.S.I., K.C.I.E., are not ruling chiefs.

The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, and Gwalior.

The Indian States may be thus classified:—1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 404,187—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore*. This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec. 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. The reigning Gaekwar was the adopted heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital Srinagar, pop. 141,735) was granted to Ghulab Singh by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. 5. *Sikkim*, a frontier State situated on the borders of Tibet between Nepal and Bhutan acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. The Sikh States, in the Sutlej plain, south of the Sutlej. The most important of these is *Patiala*. 7. Rajputana, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 9,844,384) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The States of *Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India. 9. The Malayalm States of *Travancore* and *Cochin*, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur. 11. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 12. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 13. The Southern Mahratta States. 14. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 15. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

Nepal (area, about 54,000 sq miles, pop 5,600,000) lies between British India and Tibet on the S slopes of the Himalayas, and includes Mt Everest (29,141 ft) Amid the sterile mountains lie many fertile valleys The lower hills are covered with jungle, in which wild animals abound Rice, wheat, &c, are grown Nepal is divided into four provinces Its exports to British India are estimated to amount to about £4,000,000, and its imports to £2,000,000 a year The chief trade route is that between Kathmandu and the Bihar and Orissa frontier (76 miles) Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, &c, and imports cotton goods and yarn, sugar, salt, spices, metals, &c The revenue, realised chiefly from land rent, forests, customs, &c, is over £1,000,000. The aborigines are Mongolian in type, and their religions are Buddhism and Hinduism The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6 Relations have now long been friendly. The policy of seclusion is however, consistently followed by the Nepal rulers The real political power rests with the Prime Minister. This office is always held by a member of his family, the succession being determined by special rules. The present Prime Minister, Sir Chandra Shamsher Jung, paid a most successful visit to England in 1908 The army numbers about 45,000 By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments During the Great War, and in the subsequent Afghan war, the Nepal Government rendered unstinted and unconditional assistance to the British Government in men, money and material A new Treaty was concluded in December, 1923, between the British and Nepalese Governments, by which *inter alia* the internal and external independence of the State was recognised

BHUTAN.

Bhutan (area, about 20,000 sq miles, pop. about 250,000, mainly Buddhists) also lies on the S E of the Himalayas, and its products resemble those of Nepal In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation By a treaty in 1910 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, the late Sir Ugyen Wangchuk, K.C.S.I., G.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory The estimated annual revenue is £13,000 Bhutan's total trade with India is estimated at over £65,000 a year There is no British Resident

MESOPOTAMIA AND THE PERSIAN GULF.—For three centuries England has taken the lead in the Gulf trade She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepot* The Arabian shores are low-lying deserts, the Persian coasts mountainous, at the head of the Gulf are great alluvial plains The heat is intense in summer Natural harbours are few The British Government have been entrusted with the mandate for Mesopotamia. Municipal Councils, representative divisional councils, and a Council of State have been set up Emir Feisal was elected King in 1921. The port of Basra has been greatly developed and a large capital expenditure has been incurred on railways during the British occupation *High Comm*, *Mesopotamia*, Sir Gilbert F Clayton, K C M G, K.B E, C B (*See also* pp 782 783)

Bahrein (capital, Manama), governed by Sheikh Sir Hamad Isa bin Ali al Khalifah, K C I.E., C S.I., and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Hasa) It is the headquarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland Pearls are the only notable export, rice, cotton goods, dates, sugar, and spices the chief imports The annual value of the exports is about £1,115,000 and of the imports £1,898 000 The people (about 115,000) are Muhammadans The Sheikh has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrein In 1880 he engaged not to make treaties with any other State

The Sultan of *Oman* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court

The independent tribes on the *Persian* (Arab) *Coast* from Ras-el-Khema to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *viâ* Lingah and Bahrein.

Important caravan routes converge at *Koweit*, which has an excellent harbour The Sheikh is under treaty obligations with the Indian Government.

PERSIA (*q. v.*) borders on Baluchistan and Afghanistan The demarcation of the Perso-Baluch frontier partially carried out in 1872 and 1895, was completed in 1905

ASIATIC RUSSIA —A portion of what was once the Russian Empire is contermmous with Persia and Afghanistan. The Trans-Caspian Railway runs *viâ* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers

CHINA —India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun There are three difficult passes into Russian Turkestan and two still more difficult ones into India The boundary between Kashmir and Chinese Turkestan has not been officially defined There is a British consul-general at Kashgar Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) *viâ* Ladakh, in Kashmir

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung, but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet, for three trade marts, with British and Tibetan agents, for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway mining, or other concessions, but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited India The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910 The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas or monks who resented the loss of their authority In Feb. 1910 the Dalai Lama again fled to India pursued by Chinese troops He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention but allowed him to remain at Darjiling He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans the former being worsted In August, 1912, the British Minister at Peking presented a Note to the Chinese Government urging that China should not actively intervene in internal administration in Tibet To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries A convention the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have so far refused to ratify it

Yunnan is a Chinese province to the N E of Burma By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade extradition, &c. Part of the boundary is still undefined By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma Burma imports from Yunnan hides, raw silk, &c, and exports cotton goods, &c Teng-yueh and Sumao, near the Burma frontier, are treaty 'ports.' There are British consuls at Teng-yueh and Yunnan-fu

SIAM (*q. v.*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier mainly with Chiengmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. The boundary of Burma and N.W. Siam was demarcated in 1892–3 France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence

FRONTIER TRADE.

A new system of registration of the land frontier trade of India came into force in April, 1925. Only the traffic in selected articles at certain railway stations adjacent to the more important trade routes across the frontier is registered. The principal imports registered in 1926–27 were grains and pulses, raw jute (from Nepal) 222,000 maunds, linseed (from Nepal) 580,000 maunds, and mustard and rape (from Nepal) 390,000 maunds. The principal imports were cotton, piece goods, grains, salt and sugar.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Pelee Island in Lake Erie, at 41° 40′ (approximately the latitude of Rome, Italy).

Relief.—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects.—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 13,068 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,850 feet, and Mount St. Elias, 18,008 feet, both in the Yukon.

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

Agriculture and Live Stock.—The total area is 234,163,200 acres, and in 1926 the area of cleared land was about 15,000,000 acres, of which 10,434,401 acres were under field crops. The estimated total value of the agricultural production in 1926 was $482,481,000. Cheese factories produced 119,293,671 lb. of cheese in 1926 valued at $20,228,551, and creameries made 62,301,681 lb. of butter valued at $22,673,039. In 1926 there were 629,659 horses, 2,757,799 cattle, 886,483 sheep, 1,735,355 pigs, and 17,693,000 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

Lumbering.—The value of production including primary forest production and the value added by manufacture in pulp-mills and sawmills in 1925, was $90,911,882, or about 30 per cent. of the total for the whole Dominion.

Manufactures.—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1925 was $1,527,154,660. There were, in 1925, 262,483 employees, an invested capital of $1,925,593,482, and an annual wage bill of $307,304,067. The chief manufacturing centres in 1922 were Toronto ($447,098,824), Hamilton ($122,305,950), Ottawa ($31,303,494), Oshawa ($47,529,284), London ($32,201,399), and Ford ($41,389,677).

Minerals.—Ontario is the leading mineral Province in the Dominion, the output in 1926 being $84,702,296. The principal metals are gold, $30,950,180; silver, $5,760,402; nickel $14,374,163; and copper, $4,828,964.

Hydro-Electric Power.—One of the greatest Government-owned public utility organisations in the world is the Ontario Hydro-Electric Commission supplying light and power from Niagara and elsewhere. These works are now supplying over 480,000 horse-power, and further developments are under construction.

Principal Cities.—CAPITAL, TORONTO, population (1921) 521,893, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (114,151); Ottawa, the Federal capital (107,843), with a large lumber trade and woodenware manufactories; London (60,959), Brantford (29,440), Kingston (21,753), Peterborough (20,994), Windsor (38,591); Fort William (20,541), Kitchener (21,763), Guelph (18,128), St. Catharine's (19,881), Sault Ste. Marie (21,092).

QUEBEC.

Area and Population.—The Province of Quebec contains an area estimated at 594,434 square miles, with a population (1921) of 2,361,199, an increase since the last Census of 355,423. In 1927 the Province was diminished by 112,400 square miles by the award of the Imperial Privy Council in the controversy between the Dominion of Canada and Newfoundland with regard to their boundary in the Labrador Peninsula.

Government.—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 85 members elected for five years to represent the 86 electoral districts of the Province (Chaleveix and Saguenay counting as one).

PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37'-51° 37' N. latitude and 52° 44'-59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

GOVERNMENT

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497, the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown aided by an Executive Council, with a Legislature of two houses.

LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits on the north The boundary between Quebec and Labrador came up for settlement before the Judicial Committee of the Privy Council in Oct., 1926 By the judgment given in March, 1927, the boundary was defined as a line drawn due *N* from the eastern boundary of Blanc Sablon as far as 52° N. lat, and from thence W along that parallel to the Romaine River, and thence N along the east bank of that river and its headwaters to then source, and thence due N to the crest of the watershed or height of land there, and thence W and N along the crest of the watershed of the rivers flowing into the Atlantic Ocean until it reaches Cape Chidley. The territory thus confirmed as under the jurisdiction of Newfoundland has an area estimated at 110,000 square miles. Labrador possesses valuable cod, herring, trout, and salmon fisheries One of the grandest spectacles in the world is provided by the Grand Falls on the Hamilton River The inhabitants are mainly Eskimos, engaged in fishing and hunting There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean, and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between 10° 41′-39° 8′ South latitude and 113° 9′-153° 39′ East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S., and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island; on the east coast the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin, on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise gold, silver, copper, zinc, iron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium, opal, sapphires, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto (there are at present two honorary Ministers). The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

DEFENCE.

Navy.

The Australian fleet consists of the Cruisers *Melbourne, Sydney, Brisbane, Adelaide*, the Submarines *Oxley* and *Otway*, 4 sloops, 11 destroyers, and several auxiliaries; 2 cruisers and 1 seaplane carrier are under construction. The personnel of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The seagoing forces of the Royal Australian Navy on January 15, 1928, consisted of approximately 454 officers and 4,639 petty officers and men. There is also a R A N Brigade composed of members of the Citizen Naval forces, a section of the Commonwealth Compulsory Military Training System.

Army.

By a Federal Law of 1910 military training is compulsory on all male citizens between the ages of 12 and 26—in *Cadet Corps* 12-13, and *Citizen Soldiers* 20-26, with short periods of training in the field The Universal Training Law was continued in 1922, but its operation is restricted to the more populous centres and confined to youths of 17-21 years On August 1, 1927, 44,635 were undergoing training.

Air.

The permanent strength of the Australian Air Force as at January 1, 1927, was 110 officers and 860 airmen. The sum of £344,442 was provided on June 30, 1927, for Air Force and Civil Aviation purposes.

On the subsidized aerial mail routes 290,746 letters were carried Western Australia, 252,526, Queensland, 26,765, and 11,455 on Adelaide (S.A.) and Cootamundra (N S.W.) and branch services Four companies are now operating machines over approved routes (approximately 4,000 air miles), and tenders have been let and machines ordered for a subsidized service from Perth to Adelaide (about 1,500 air miles). A flight around Australia was completed in June, 1927. The total distance of 7,500 miles was covered in some hours over 10 days

CAPITAL —CANBERRA, in the Federal Capital Territory, transferred to the Commonwealth by the State of New South Wales on Jan. 1, 1911. is being laid out as the capital of the Commonwealth. A session of Parliament was held at Canberra on May 9, 1927, which is from that date the seat of government in place of MELBOURNE.

NORTH AUSTRALIA AND CENTRAL AUSTRALIA.

(Previously "Northern Territory")

The Northern Territory has been divided into 2 Territories known respectively as *North Australia* and *Central Australia*. Both Territories lie between 129°–138° East longitude as far as 26° South latitude, North Australia being that part N., and Central Australia that part S of 20° S Lat. The administration was taken over by the Commonwealth on Jan. 1, 1911, and since Feb. 1, 1927, have been separated, with headquarters respectively at Darwin and Alice Springs. The area of North Australia (Capital, Darwin) is estimated at 287,227 square miles, and that of Central Australia (Capital, Alice Springs), at 236,393 square miles, the population of the two Territories as at June 30, 1928, was (exclusive of full-blood aboriginals) 2,579.

Limited portions of the country are considered to be quite suitable for tropical and semi-tropical agriculture, and the Federal Government grants suitable areas rent free for the original settler's lifetime or for 21 years (whichever shall be longer). The staple industry is pastoral, cattle and horses do well south of the 15th parallel. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable, from 40 to 100 miles from their entrance, for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead, tin and mica being indicated, and when communications are opened up the industry will become important. The only railway is from Darwin to Katherine (200 miles). A further extension to Daly Waters (160 miles) is being proceeded with.

Darwin, North Australia, occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin. Alice Springs, Central Australia, is situated in the MacDonnell Ranges, and boasts a splendid climate.

Government Resident of North Australia, Col R. H. Weddell £975
Chief Clerk and Accountant, L. H. A. Giles 650
Judge Supreme Court, R. J. D. Mallam £1,000

PAPUA.

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises a part of the New Guinea mainland situated between the meridians of 141° and 150° 50′ E longitude, and between the 5th and 12th parallels of South latitude; also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louisiades, the Conflict Group and the Laughlan Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Executive Council of nine members who, with five non-official members form the Legislative Council. The white population in 1925 was 1,371. The official estimate of the native population is 275,000. In 1927–8, 61,370 acres were under crops (43,244 coco-nuts, 8,212 rubber and 3,000 sisal hemp). Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best known rivers are the Fly (650 miles long and navigable by steam launch for 500 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

CAPITAL, Port Moresby.

TERRITORY OF NEW GUINEA.

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 156° E. It consists of the N.E. portion of New Guinea to 141° E. (70,000 sq. miles), Bismarck Archipelago including New Britain, New Ireland, and islands adjacent to both (20,840 sq. miles), and the two northernmost Solomon Islands (3,400 sq. miles) (Bougainville and Buka). The principal river in N.E. New Guinea is the Sepik, which is navigable for 250 miles.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1926–27 there were 186,006 acres under crops (coco-nuts, 177,621). The white population in 1927 was 2,098, the native population in 1927 was 327,071, including 27,002 working under indentures. (Natives living in areas not under complete Government influence are not included in the above total, as no reliable estimate can be made.).

NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in July, 1927, was 900.

Administrator, Hon. Mr. Justice Charles Edward Herbert, C.B., C.M.G.
President Executive Council, E. C. Robinson.

States of the Commonwealth.

I. NEW SOUTH WALES.

The State of New South Wales is situated almost entirely between the 29th and 37th parallels of S lat and 141st and 154th meridians of E. long., and comprises an area of 310,372 square miles (inclusive of 940 square miles of Federal Capital area)—*i.e.*, more than five times that of England and Wales, and over three times the size of Great Britain and Northern Ireland.

POPULATION.—The estimated population at 31st March, 1928, was Males, 1,232,135, Females, 1,183,376. Total, 2,415,511.

Religions.

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1921, number 1,027,410; Roman Catholic 502,815. Presbyterian 219,932, Methodist 181,977. Congregational (Independent) 22,235, Baptist 24,722, Salvation Army 9,490, and Hebrew 10,150.

PHYSIOGRAPHY.

The Eastern or coastal district is traversed by the Great Dividing Range, the various portions of the Range in N.S.W. being (from N. to S.) Macpherson, New England, Liverpool, Main or Blue Mountain, Cullarin, Goulburn, Monaro and Mumong Ranges—the highest points being Mount Kosciusko, 7,328 feet, and Townsend, 7,256 feet. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Bellinger, Nambucca, Macleay, Hastings, Camden Haven, Manning, Wollomba, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western portion of the country is not so well watered, but immense reservoirs are being constructed for irrigation purposes, and there are many artesian bores. The Darling, 1,609 miles, and the Murrumbidgee, 981 miles, are both tributaries of the Murray, which has a total length of 1,609 miles, 1,203 miles forming part of the boundary between the States of New South Wales and Victoria. Other inland rivers are Lachlan, Bogan, Macquarie, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63·2°. The mean temperature in the shade for the north coast is 66° to 69°, south coast 60° to 63°, northern tableland 56° to 59°, southern tableland 44° to 57°, north-western slopes, the mean annual temperature ranges from 61° to 67°, in the Central-western slopes 63°, south-western slopes 59° to 63°, and in the Western Plains and Riverina Division from 62° to 68. The Seasons are as follows: Spring during September, October and November, Summer during December, January, and February, Autumn during March, April, and May, Winter during June, July, and August.

GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

The assets on December 31, 1925, amounted to £26,539,360, and the liabilities to £32,407,533. These liabilities include the depositors' balances in the hands of the Commonwealth Savings Bank Branch, amounting to £21,909,458 (equal to an average of £53 9*s.* 6*d.* to each depositor).

Production and Industry.

Agriculture and Live Stock.—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 17,508,805 and 88,071 acres granted without payment; under a system of deferred payment, 6,966,230 acres more are in process of alienation, and an additional area including preferential pastoral leases of 191,469,760 acres leased out for sheep and cattle runs, 82,469,364 acres for grazing farms and homesteads, 32,087,000 acres are held under occupation licence, 464,731 acres under gold-mining and mineral lease, 482,773 for special purposes and 3,548,169 acres perpetual lease, and scrub selections 50,812 acres, 17,354 acres sold as perpetual leases, prickly pear leases 1,296,800 acres, leaving 79,835,877 practically unoccupied Wheat, oats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about 22 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, cocoa-nuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1925, 485,585 tons of sugar were produced. The live stock in 1925 included 6,436,645 cattle, 20,663,323 sheep 638,372 horses, and 199,598 pigs. Wool, meat, and butter are the principal products.

Forestry.—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 5,256,365 acres In 1924-25 the wealth produced by the timber industry of Queensland was between three and four million pounds, and there were 4,464 hands employed in the sawmills alone. At the end of 1924 some 7,000 acres of cut-out State forests had been subjected to re-afforestative treatment by the State Forest Service which employs 395 men, and is engaged actively in timber farming and wood-trading operations.

Minerals.—The total mineral output in 1925 was £2,012,677. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1925 was valued at £197,118; silver, £53,003; copper,

£254,074; tin, £161,500, coal, £1,037,956, wolfram, £184; molybdenite £271, lead, £187,681, opals and gems, £35,573, arsenic, £11,150, cobalt, £18,014; zinc, £2,350

Commerce.—The chief articles of export oversea, the produce of the State, in 1924-5 were. Wool, £11,992 952, meat including extract, and bacon hams, and pork, £4,184,242, hides and skins, £837,058; tallow, £598,048, butter, cheese, and milk, £3,135,159.

TOWNS.

CAPITAL, Brisbane, with an area of 385 square miles Population Census, April 4, 1921, 210 032 Estimated Dec 31, 1925, 263,711

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane, Rockhampton (25,000), Maryborough (10,635), Townsville (27,500), Port Douglas, Mackay (7,100), Thursday Island, Cooktown, Cairns (8,500), Bowen and Bundaberg (9,500), Gladstone (2,300) Other places of importance are Ipswich (20,526), Toowoomba (23,394), Charters Towers (9,350), Gympie (8 769), Mt. Morgan (6,750), Warwick (6,800), Roma, and Cloncurry.

V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, about 140 miles wide in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33′—43° 39′ S lat, and 144° 39′—148° 23′ E. long, and contains an area of 26,215 square miles.

POPULATION.—At the Census of 1921 the population numbered 213,877 (107,767 males and 106,110 females).

Year	Birth Rate.	Death Rate	Infant Mortality	Marriage Rate
1923	26 27	9·92	58	7 39
1924	25 07	9 89	55	7·12
1925	24·45	9·35	55	7·05
1926	23 62	9·05	46·5	6·79
1927	23·01	9 68	53·0	6·82

Religion.

All religions are free In 1921 there were 88,158 members of the Church of England, 28,581 Roman Catholics, 24,975 Methodists, 15,735 Presbyterians, 4,880 Congregationalists and Independents, and 4,757 Baptists

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the Island. At Hobart in 1921 the mean annual temperature was 55·5°, the mean temperature for Dec., Jan., and Feb. being 62 5°, and that of June, July, and Aug. 48·6°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825 In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth q.v. The State executive authority is vested in a Governor appointed by the Crown, aided by an Executive Council of responsible Ministers

Banking.—Dec. 31, 1926, the banks of issue had total deposits £6,145,590; the savings bank deposits were £4,768,086.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres there were, in 1926-27, 289,364 acres under crops. The principal crops are apples and potatoes with oats, peas, hay, small fruit, and hops in the second rank. The live stock included 213,112 cattle, 1,807 558 sheep, 38,906 pigs, and 36,830 horses. The wool production was 12,333,000 lb. The butter produced amounted to 6,032,597 lb

Electrical Energy.—The Hydro-Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State. The capacity of the present installation is 63,000 h.p, and is now being increased to 75,000 h.p. The advantage of cheap power is steadily attracting new manufacturing industries.

Forestry.—Timber reserves total 1,698,150 acres. Area held under lease or forest permits for sawmilling, logging, &c., 296,100 acres. The amount of timber milled for 1926-7 was 52,058,000 super feet, valued at £459,948. This is exclusive of timber used for piles, poles, fencing, and for practically all sleepers.

The utilisation of forest waste for the production of wood-pulp has, after long investigation, been brought within the scope of business operations. A small experimental plant is now in operation with every prospect of large scale production to follow.

Minerals.—The chief minerals produced are copper, tin, silver, lead, coal, the value of all minerals produced in 1927 being £1,301,312.

Manufactures.—The chief factories for export are metallurgical, fruit preserving, woollen mills, cement, and confectionery; the value of production in 1926-7 was £3,593,412, the capital invested in the 767 establishments being £8,860,805 in 1926-27.

TOWNS.

VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52′ E. long, and from 13° 30′ to 35° 8′ S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

POPULATION.—At the Census of April 4, 1921, the population was 332,732 (177,278 males, 155,454 females); in 1927 the total was estimated at 392,292 (211,628 males, 180,664 females).

1926 .. .	8,301	3,350	2,844
1927	8,481	3,393	3,107

Religions.

There is no State aid to religions. At the Census of 1921 there were 153,285 persons belonging to the Church of England, 64,488 Roman Catholics, 39,116 Methodists, and 28,377 Presbyterians.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils The climate is one of the most temperate in the world. The total rainfall at Perth during 1927 was 36·59 inches, the average for the past 52 years being 34·37 Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1921; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

GOVERNOR.

Governor of Western Australia, His Excellency Col Sir William Robert Campion, K.C.M.G., D.S.O., *born* 1870 (1924) £4,000
Private Sec., Maj B. Kerr-Pearse, M.V.O.

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

President of the Legislative Council, Hon. J. W Kirwan £1,000
Speaker of the Legislative Assembly, Hon. Thomas Walker 1,000

THE JUDICATURE.

There is a Supreme Court presided over by a Chief Justice and three Puisne Judges, which has complete jurisdiction in all criminal and common law matters There are courts known as local courts which have limited civil jurisdiction There are Courts of Session, dealing with criminal matters outside Perth, and there are Magistrates' courts and Children's courts.

Chief Justice, Hon. Sir R F. Macmillan, K.C.M.G. £2,300
Puisne Judges, Hons R. B. Burnside, J. A. Northmore, and T. P. Draper, C.B.E. each 2,000

EDUCATION

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie (State Secondary Schools in various centres and the capital), and a University. The total amount expended on education during the year ended June 30, 1928, was £668,685; in addition, a grant of £29,002 was made to the University.

FINANCE.

Revenue and Expenditure and gross public Debt for 5 years ended June 30:—

Year	Revenue	Expenditure	Debt
	£	£	£
1924	7,865,594	8,094,753	62,765,281
1925	8,341,446	8,439,854	64,493,161
1926	8,808,166	8,907,308	70,010,920
1927	9,750,833	9,722,588	70,606,175
1928	9,807,949	9,834,415	76,427,764

Banking.—There were, including the Commonwealth Bank of Australia, 10 cheque-paying banks, formerly banks of issue, in the State on June 30, 1928, with total assets £22,138,245 and liabilities £18,223,851 The amount due to depositors in the State Savings Bank at June 30, 1928, was £7,606,116, in the School Savings Bank, £89,820; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1928, was £2,823,504.

PRODUCTION AND INDUSTRY.

Crops and Live Stock.—Of the total area (624,588,800 acres) 3,720,000 acres were under crops in 1927–28, wheat for grain accounting for 2,998 423 acres. In 1927 the live stock included 846,735 cattle, 8,447,480 sheep, 59 810 pigs, 21,798 goats, and 165,021 horses. There were about 5,200 acres of vineyards.

Manufacturing Industries.—There were on June 30, 1927, a total of 1,216 industrial establishments in the State employing either machinery or at least four hands The total number of persons employed in them was 20,417. The combined output of these establishments for 12 months ended June, 1927, was computed at £15,671,660.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported. The quantity of timber cut during the 18 months ended June, 1927, is computed to have been over 229 million super feet.

Minerals.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 408,352 oz. in 1927. The total amount produced in the State from 1886 to June 30, 1928, is 37,306,349 fine oz. Magnetic iron, lead, copper and tin ores exist in large quantities, as also coal.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 1917 afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of machinery, vehicles, manufactured hardware, clothing and textiles, also (mainly from the sister states of the Commonwealth) provisions. Principal exports for the year ended June 30, 1928:—Gold, £670,782; Wool, £4,962,916; timber, £1,265,321; sandalwood, pearls and shell, hides and skins, £886,702; wheat, £6,994,528; flour, £1,008,168; and fresh fruit, £191,915.

TOWNS.

CAPITAL, Perth. Population (1927) of Metropolitan area, including Fremantle, 191,791.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 31,983), Albany (3,980), Kalgoorlie and Boulder (over 11,000), Bunbury (5,570). Claremont (6,300), Geraldton (4,400), Midland Junction (5.100), Northam (5,000), and Collie (3,700).

THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. J. G. COATES, M.C., *Prime Minister.*)

THE Dominion of New Zealand, farthest in point of distance from the heart of the Empire, is proud to think that the loyalty of her attachment to the British Commonwealth of Nations is nowhere exceeded. It is not uncommon for visitors to describe us as "more British than the British," and indeed the truth of this observation is borne out by a study of the racial composition of the people. The latest available census figures show that 99·35 per cent. of the population are of British nationality: where else could we find so near an approach to an homogeneous people? Whatever the future may bring forth, we may remain calmly confident that New Zealand's destiny lies in closest co-operation with the other free nations of the Empire, assured as we are that within the bounds of the Empire we find ample scope for the realisation of our ideals as a people.

Consistent with our anxiety firmly to preserve the Imperial connection, we accord by differential Customs rates a substantial measure of preference to British-made goods. To Great Britain, New Zealand directs some 80 per cent. of her exports, and we already hold an important position as a supplier of food and raw materials to British markets. It is becoming abundantly clear that the restoration and the expansion of Britain's over-seas trade, upon which depends her prosperity as a manufacturing nation, demand the fullest possible extension of inter-Empire trading. It is the earnest desire of the Government and the people of New Zealand in every possible way to assist in that development.

In the few decades during which white men have inhabited these Islands, magnificent progress has been accomplished: yet pride in our past achievements does not make us unmindful of the need for vigorous progress in our time. It is no exaggeration to say that we have merely "scratched the surface of the land"—and of a very small part at that. Of the total area of the Dominion, less than 66 per cent. is occupied, and the improved land represents only 42 per cent. of that occupied area, or 28 per cent. of the whole area of New Zealand. One must of course recognise that an appreciable proportion of the "unoccupied" land cannot at an early date be profitably taken up: but there is still room for further settlement. Moreover, the intensive cultivation of the soil, the summoning of science to the aid of industry, promise to open up a new era of enhanced prosperity. Action is already under way for the establishment of a properly equipped College of Agriculture, of University standard, and for the co-ordination and strengthening of the scientific agencies of the Government. New Zealand possesses unrivalled facilities for exploiting the latent forces of nature, and the Government has accepted as a national responsibility the task of providing hydro-electric power on a comprehensive scale. Thus we shall at once furnish the motive-power necessary to the basic industries, and shall bring to the settler in the less accessible parts some of the amenities and comforts to which his labours unquestionably entitle him.

Generous provision is made in New Zealand for education. Illiteracy amongst the adult population has been reduced virtually to vanishing point—to such a level indeed that enquiry on the matter has been eliminated from the quinquennial census. Primary education, the full cost of which is defrayed by the general Government without recourse to local rates or taxes, is available free to every child, and 95 per cent. of the primary pupils are educated in State secular schools. Normally the highest class is passed at the age of fourteen years, and some 66 per cent. of the pupils who satisfactorily complete the primary course enter upon full-time secondary or technical education. The path to the University, too, is made easy by Government assistance to qualified students. In proportion to the population, New Zealand has more University students than any other country in the world, and more than 40 per cent. of the students hold scholarships or bursaries which entitle them to free tuition.

Withal, we are not prone to regard ourselves as having in any sense attained perfection, and with respect to education, as elsewhere in our national life, we are anxious to keep in constant touch with the developments abroad, and from the experience of others to sift what is best suited to our own needs.

Prime Minister of New Zealand.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22′ and 47° 18′ South latitude and 162° East longitude – 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 56° F., rainfall 48 in. (days with rain 159); South Island, mean temperature 52° F., rainfall 43 in. (days with rain 150).

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

In 1927, 55,676 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 45,930 In 1927 convictions (or sentences) in Supreme Courts were 1,739. Civil cases to number of 558 were tried, and 935 judgments were recorded for a total amount of £316,936.

POLICE.

On March 31, 1928, the strength of the Police Force was 1,117 of all ranks, equivalent to 1 for every 1,301 of the population. Average cost of police protection per inhabitant was, in 1927-28, 5*s.* 9¾*d.*

LOCAL GOVERNMENT

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards. Electors are adult ratepayers of both sexes.

Revenue of local bodies, 1926-27 ..	£14,265,945
Receipts not revenue, 1926-27	6,680,176
Expenditure, 1926-27	21,747,557
Net indebtedness March 31, 1927 ...	56,523,579

PASSPORTS.

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force and the Senior Cadets.

Units of the N.Z Permanent Forces are the New Zealand Staff Corps, the New Zealand Permanent Staff, the Royal New Zealand Artillery the New Zealand Permanent Air Force, the New Zealand Army Ordnance Corps, the New Zealand Army Pay Corps, the New Zealand Permanent Army Service Corps, and the New Zealand Army Medical Corps. The Territorial Force consists of 9 regiments of Mounted Rifles; 21 batteries of Artillery; 3 Depôts of Engineers (Field); 3 Depôts Corps of Signals; 12 Battalions of Infantry; 3 Depots Army Service Corps, and 3 Depots Medical Corps The Dominion, for purposes of defence, is divided into 3 Commands, each of which produces one-third of the above Units. The Senior Cadets are organised in Battalions and receive physical and elementary military training. There are a large number of Rifle Clubs in the Dominion established for the encouragement of rifle shooting. Military training is compulsory on all male citizens between the ages of 14 and 25; in the Senior Cadets from the age of 14 to 18, and in the Territorial Force from the age of 18 to 25, and in the Reserve from the age of 25 to 30.

During the South African War, New Zealand despatched 10 Contingents, totalling 6,500 men, to the assistance of the Imperial Forces in South Africa. On the outbreak of the Great War, the Dominion contributed a Force which captured and garrisoned German Samoa, and an Expeditionary Force for service in Europe. The latter force was engaged in Egypt and Gallipoli, and being subsequently expanded to a Division and a Brigade of Mounted Rifles, continued to operate on the Western Front and in Palestine until the termination of hostilities During this period of service the Expeditionary Force absorbed 100,000 men, and 10,000 more were ready for embarkation or under training when the Armistice was signed Seventeen thousand of the Dominion's soldiers lost their lives on service. The New Zealand Troops established a very high reputation for their gallantry and general behaviour under all circumstances.

Navy.

In 1909 New Zealand presented the battle-cruiser *New Zealand* to the Imperial Government. The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period (fixed at 12 years or until age 30), members on discharge to be drafted into the New Zealand Royal Naval

Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A Naval Board controls all matters relating to the Naval Forces, and is vested with the executive command of the Naval Forces. By Order-in-Council of the 20th June, 1921, it was provided that the ships and personnel shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy."

Banking.—At the end of 1927 there were six banks of issue doing business, two of which were New Zealand banks. Total assets (average of four quarters of year), £66,626,676; liabilities, £56,321,307; value of notes in circulation, £6,510,008.

Post-office and private savings banks had, at the close of the year 1927-28, 971,419 depositors, having £55 415,133 to their credit.

EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1927) 2,601 public primary schools, with 6,897 teachers and 223,388 scholars; there are also 305 registered private primary schools, with 27,388 scholars, and, in addition, 134 village schools for the Maoris with 6,620 scholars. The higher education of boys and girls in the cities and large towns is carried on in 43 endowed colleges and grammar schools, in 21 technical high and technical day schools. In addition there are 79 secondary depts. of district high schools, and 2 of junior high schools, 40 private secondary schools, and 12 secondary schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,878 students in 1927, and has power to confer degrees.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the Dominion (excluding annexed islands) is 66,390,262 acres, and, apart from boroughs and holdings under 1 acre, 43,587,698 acres of this were in occupation in 1927, this acreage representing 85,628 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1927-28 (preliminary figure) was 260,250 acres, giving a yield of 9,535,469 bushels. An area of 86,076 acres of oats was threshed, the yield totalling 3,849,761 bushels; while 198,472 acres were converted to chaff, hay, or ensilage. Other preliminary acreages in 1927-28 were: barley, 21,152; rye-grass, 23,877; and potatoes, 22,220. An area of 466,615 acres was sown in turnips and mangolds. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1928 (preliminary figures) numbered 3,273,588, sheep, 27,133,810, pigs, 586,704; and horses, 307,140. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Manufactures.—Statistics of factory production show (1926-27) 5,088 factories in operation, employing 81,904 hands. Value of output for year, £83,012,503.

Minerals.—Coal-mining is one of the largest industries, the output in 1927 being 2,366,740 tons, the approximate total output to the end of 1927 being 66,326,082 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, has been found in Taranaki, and in the form of brown hæmatite at Parapara, near Nelson.

COMMUNICATIONS.

Railways.—In March, 1928, there were 3,180 miles of Government railway lines in working order, and more under construction; and 117 miles of private lines, together with an excellent coaching system. The number of passengers carried in 1927–28, including season-ticket holders, was 25 379,655, while goods carried amounted to 7,366,762 tons Operating revenue and expenditure were £7,343,845 and £6 302.119 respectively.

Shipping—During 1927 the vessels entered inwards numbered 634 (tonnage, 2,195,804), and those entered outwards 633 (tonnage 2,200,763), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1927) 306,361,077 letters and postcards, 47,089,652 newspapers, 136,199,176 books and packets, and 6,903,535 parcels, and the work is effected by 1,955 post-offices. There are 12,727 miles of telegraph line with 62,648 miles of wire The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 16,567.514

TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The estimated population of the Urban Areas, at April 1, 1928, was as follows:—Wellington, 130,120, Auckland, 206,810, Dunedin, 84,060, Christchurch, 123.370; Invercargill, 22,920; Napier, 18,870, Gisborne 15 540; Palmerston North, 20,940; Nelson, 12,080; Timaru, 17,540, Wanganui, 27,510; New Plymouth, 17,050, Hamilton, 17,350; and Hastings. 15,290.

THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper.—*North Island* and adjacent islets; *South Island* and adjacent islets, *Stewart Island* and adjacent islets, and *Chatham Islands*, between 43° 30′ S. lat and 175° 40′–177° 15′ W. long. Chatham Islands have a population of 275 Europeans and 305 Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 9′ S lat. and 172° 8′ 8″ E long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in 50° 32′ S lat. and 166° 13′ E. long. The islands contain several good harbours, but are uninhabited *Campbell Island* (uninhabited). *Antipodes Group* (49° 41′ 15″ S. lat and 178° 43′ E. long.) uninhabited and *Bounty Islands* (47° 43′ S. lat., 179° 0′ 30″ E. long) uninhabited

The following islands have been annexed to New Zealand:—

The Kermadec Group, between 29° 10′ to 31° 30′ S. lat., and 177° 45′ to 179° W. long, includes Sunday, Macaulay, Curtis Islands, and L'Espérance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro, The Herveys (Manuae and Aoutu), Takutea, Palmerston, Penrhyn (or Tongareva), Manahiki, Rakahanga, Pukapuka (or Danger), Nine (or Savage), Suwarrow, and Nassau. The population at the Census of 1926 numbered 13,877, all except 313 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue) The trade is chiefly with New Zealand and the United States of America. The exports (1927) were valued at £152,707, and the imports at £130,612 Rarotonga is the chief island, with a native population of 3 732, and a population other than native of 205 The government is administered locally under the direction of New Zealand. The Island Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga The five Arikis of Rarotonga are of equal rank and are all members of the Council Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z. and San Francisco, U.S.A.

Ross Dependency.—By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea, with adjacent island and territories, were proclaimed a British settlement under the control of the Governor-General of New Zealand.

Tokelau or Union Islands.—A group of atolls (population 1.033), transferred from Gilbert and Ellis Islands Colony in 1926, and now administered on behalf of New Zealand by Administrator of Western Samoa

The Mandated Territories are:—

Western Samoa, consisting of the islands of Savaii, Manono, Apolima, Upolu, Fanuatapu, Namua, Nuutele and Nuulua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1.135 square miles and a population at the Census of 1926 of 40,229. 36 880 were Samoans, 2,079 Chinese and Melanesians, and 2,270 half-castes and Europeans. The largest islands are *Savaii* (703 square miles) and *Upolu* (430 square miles). Upolu contains the harbours of Apia and Saluafata, of which the former is the capital In 1889 a very heavy sea set up by a cyclone wrecked three U.S.A. warships and the *Eber* and *Adler* of the German Navy, H.M.S. *Calliope*, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons) Coco-nuts (copra), and cocoa are the chief products of the islands The exports were valued in 1927 at £335.978 (copra £242,672), and the imports at £304 369.

Administrator, Colonel S. S. Allen, C.M.G., D.S.O.

NAURU ISLAND.

Nauru Island, situated in longitude 166 degrees east, and 26 miles south of the Equator, was proclaimed German territory on Oct. 2, 1888, and was administered as part of the (German) Marshall Islands group until its surrender to the Australian Forces in 1914. The island was included in the cession of colonies made by Germany in 1919, and is now administered by the United Kingdom, the Commonwealth of Australia, and the Dominion of New Zealand under a mandate from the Allied and Associated Powers, 1919. the first and second Administrators having been appointed by agreement by the Australian Government. The island has a population (April 1, 1927) of 2,163, of whom 115 are Europeans. There are valuable deposits of phosphates on the island, and in 1926–27 the exports of phosphates were 504.990 tons. The value of the imports in 1926–27 was £80,266

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

PHYSIOGRAPHY.

Boundaries—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, *i.e.*, from 34° 50′ – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarte Bergen* and *Lange Bergen* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karroo Plateau, which is bounded on the east by the *Sneeuwbergen*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports, Harbours and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

THE LEGISLATURE.

The *Senate* consists of 40 members. For ten years after the establishment of Union eight were nominated by the Governor-General-in-Council and 32 were elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy was filled by the choice of the Provincial Council in respect of whose Province a vacancy occurred. Since 1921 the Provincial element has been elected, according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat. Originally, under Section 24 of the South Africa Act, nominated Senators held their seats for a period of ten years, but this provision was amended by Act No. 54 of 1926, and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government. Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The *House of Assembly* consists of 135 elected members, 51 of whom represent the Cape of Good Hope, 17 Natal, 50 Transvaal, and 17 the Orange Free State. Members of both Houses must be British subjects of European descent.

The Fifth Delimitation Commission, appointed on July 19, 1927, has divided the country into the following constituencies: Cape of Good Hope, 58; Natal, 17, Transvaal, 55, Orange Free State, 18

President of the Senate, Hon. H C. van Heerden £1,200

Speaker of the House of Assembly, Hon. E G. Jansen 2,000

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25 Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

DEFENCE

The South Africa Defence Act, 1912, became law on June 14, 1912 This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising :—

1. *The South Africa Permanent Force*, which consists of :—
   (i) The South African Staff Corps.
   (ii) The South African Instructional Corps.
   (iii) The South African Naval Service
   (iv) The South African Field Artillery.
   (v) The South African Permanent Garrison Artillery.
   (vi) The South African Engineer Corps.
   (vii) The South African Air Force.
   (viii) The South African Service Corps.
   (ix) The South African Medical Corps
   (x) The South African Ordnance Corps
   (xi) The South African Veterinary Corps
   (xii) The South African Administrative, Pay, and Clerical Corps.

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service.

2. *The Coast Garrison Force*, which consists of :—
   (i) The South African Garrison Artillery.
   (ii) The South African Coast Defence Corps

3. *The Citizen Force*, which consists of :—
   (i) The Active Citizen Force.
   (ii) The Citizen Force Reserve.
   (iii) The National Reserve

4. *The South African Division of the Royal Naval Volunteer Reserve.*

5 *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas, where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils.

Under Act No. 5 of 1922, a definition is given of the term "higher education" Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows —The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*, (*a*) Education provided by universities and university colleges incorporated by law (*b*) education provided by the South African Native College; (*c*) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education; (*d*) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (*e*) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses (*c*), (*d*) and (*e*) above, the Provinces have been relieved of all vocational education (technical, industrial and agricultural), and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following :—

1. *University of South Africa*, with the following constituent colleges—
   Transvaal University College, Pretoria
   Potchefstroom University College, Potchefstroom.
   Grey University College Bloemfontein.
   Rhodes University College, Grahamstown.
   Huguenot University College, Wellington, C.P.
   Natal University College, Pietermaritzburg.
2. *University of Capetown.*
3. *University of Stellenbosch.*
4. *University of the Witwatersrand.*

II. Technical colleges which have been established under Act No. 30 of 1923 at Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria and Pietermaritzburg.

III Industrial, trade and agricultural schools (State and State-aided) at various centres throughout the Union.

The number of students at universities and university colleges for the year 1928 was 6,613. The State expenditure on higher education as above defined during the financial year 1927–28 was £738,200.

Primary Education and Education other than Higher Education.—The central direction of

public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education In the Cape Province practically all the schools are State-aided. In Natal they are partly State-schools, and partly State-aided. In the Transvaal and Orange Free State they are in the main State schools. In all Provinces primary education is free.

Number of Schools in the Union in 1926.—For European scholars, 4,707, 1927—4,665; for coloured scholars, 3,408, 1927—3,501; total, 8,115, 1927—8,166

Number of Scholars and Teachers in 1926—European scholars, 330,762, 1927—336,459; coloured scholars, 289,545, 1927—304,617; total, 620,307, 1927—641,076. Teachers, 22,274, 1927—23,121

Expenditure from State Funds in 1926.—Cape, £3,068,793, 1927—£3,240,918; Natal, £601,473, 1927—£629,256; Transvaal, £2,679,220, 1927—£2,859,113, Orange Free State, £834,773, 1927—£868,385, total, £7,186,259, 1927—£7,597,672.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

The Funded Debt of the Union at March 31, 1928, was £224,378,047 and the Floating Debt £14,548,017

PROVINCIAL FINANCE.

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925 Session of Parliament, and as from April 1, 1925, the sources of revenue available to the Provinces are —

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province.

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) Special grants of £75,000 each to the two smaller Provinces of Natal and the Orange Free State.

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31, 1924.

The ordinary Revenue and Expenditure for the five years ended March 31, 1926, were as follows :—

Financial Year	Revenue transferred or assigned	Subsidies.	Total Ordinary Revenue	Total Ordinary Expenditure

Manufactures.—The development of local industries has been most marked during the last three years, the scarcity of oversea supplies, with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations From the recently published returns of manufactures in the Union, the total output during the year 1917-18 was £60,123,111 sterling, 1918-19, £70,934,098; 1919-20, £92,913,844; 1920-21, £98,307,910; 1921-22, £79,446,299; 1922-23, £74,496,292; 1923-24, £79,789,348, 1924-25, £84,159,604; and 1925-26, £91,536,926. Amongst the new industries which have been established during the period of the War may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle-making, starch from maize; iron smelting (still in the initial stage); arsenic production; detinning of scrap tin; copper manufacture, &c. The production during 1925-26 of certain specified industries is indicated by the following figures:—

The labour employed in coal mining in December, 1927, was: Natal, 736 Europeans, 17,427 coloured; Transvaal, 868 Europeans, 14,928 coloured; Cape, 6 Europeans, 88 coloured; O.F.S., 129 Europeans, 2,368 coloured; a total of 1,739 Europeans and 34,811 coloured.

Silver.

There are no silver mines in the Union. The output, valued at £118,531 in 1927, represents silver contained in gold bullion and base metal ores.

Copper.

(Tons of 2,000 lb.)

In 1927, 7,898 tons of concentrates were produced in the Transvaal, value £435,340. 2,909 tons of matte and ore valued at £141,779, were shipped from the Cape during 1927.

Tin.

(Tons of 2,000 lb.)

The Union figures for 1927 are 1,928 tons, valued at £329,947.

* Premium included—1920, £921, 1922, £923, 1924—£36,842, £8,553,598, £2,567,501, £2,772,151, and £1,653,251 respectively.

Other Minerals.

The value of the total mineral production of the Union for 1927 was £61,158,470. The value of miscellaneous products: quarry products, £90,959; lead, £7,543; magnesite, £3,935; graphite, £2,027.

COMMUNICATIONS.

Railways.—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey This was very shortly followed by Natal, who started the construction of a line running from Durban Another two lines finally linked up at Heidelberg in 1895 The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864. Little progress was however made in succeeding years, and it became evident that the development of the country could not be left to private enterprise The existing Cape lines were therefore purchased by the Government on Jan 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal

The total open mileage of Government-owned lines at the end of March, 1927, was 12,206 miles (comprising Cape 4,932, Orange Free State 1,504, Transvaal 2,958, Natal 1,460, and South-West Africa 1,352), of which 11,295 miles are 3 ft 6 in gauge and 911 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1926, amounted to £123,479,707 The difference between this figure and the one furnished previously for 1925-26 is due to the transfer of the capital expenditure on certain lines to the Defence Department and Colenso power station and transmission lines to the Electricity Supply Commission. The capital expenditure up to March 31, 1927, amounted to £129 001,673. The gross earnings for the year ending March 31, 1927, were £24,093,347, and the net profit, after payment of interest, £262,515. Working expenditure (excluding depreciation) amounted to £17,937 177, or 74 45 per cent. of the gross revenue, as compared with £17,235,324, or 71·37 per cent. of the gross revenue for the previous year. The *Cape to Cairo Railway* projected by Cecil Rhodes had advanced to Buluwayo by 1902, 1,362 miles from Cape Town, and 3,600 miles from Cairo In 1922 there were certain small links to be completed along the Congo River, where steamers filled the gaps; and a big link between Stanleyville and El Obeid. The *Trans-Zambesi Railway*, from Dondo (on the Beira-Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs.—On March 31, 1928, there were 3,244 post and telegraph offices open in the Union 200,505,000 letters and cards, 128,706,000 newspapers, books, and circulars, 7,239,000 parcels, 3,315,000 registered articles, 19 848,000 official letters and other articles and 6,088,598 (including press telegrams) telegrams were received and despatched during the year ended March 31, 1928. The number of money orders issued during the year ended March 31, 1928, was 610,259, while 577,483 were paid; 4,386,667 postal orders were issued, and 3,845,161 paid. The revenue of the Department of Posts and Telegraph 1927-28, was £2,551,512; expenditure, £2,511,889 (Postal and Telegraph) The revenue of the telegraph service was £530,994, that of the telephone service, £1,383,752, and the expenditure for telephone, £1,314,699. 7,744 miles of telegraph line, carrying 37,107 miles of wire, and 35 488 miles of telephone route, carrying 336,331 miles of wire, were open in 1927-28. There are 4 wireless stations in the Union During 1927-28, 20,971 messages, valued at £8,659, were sent. The number of depositors in the Post Office Savings Bank on March 31, 1928, was 368,986, the amount standing to their credit being £6,594,311.

Shipping.—In 1927, 5,183 vessels (14 966,359 tons) entered, and 5,163 vessels (14 905,241 tons) cleared at the ports of the Union of South Africa.

RAILWAYS AND HARBOURS BOARD.

Chairman, Hon C W Malan, M L A, Minister of Railways and Harbours.

Members, Hon P Whiteside, The Hon. A. Kuit, and C. T. M Wilcocks.

Secretary, C M Hoffe.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

South-West Africa.
(Suidwes-Afrika)

Administered under Mandate as an integral part of the Union of South Africa

Administrator, Albertus Johannes Werth.

Secretary, H. P. Smit.

SOUTH-WEST AFRICA lies between S. lat 17° 23′ and the Orange River. There is in addition a narrow strip lying between 18°–18° 30′ S. lat extending from 21° to 25° E. long. This is known as the Caprivi Zipfel, and gives access to the Zambesi river. The estimated area of the country is 312,194 square miles, and the population amounts to approximately 271,686, of whom 24,115 are Europeans (European Population Census 1926) The last census taken of the native population was in 1921. The present estimated native population is distributed as follows: Territory proper, 93,491; *Ovamboland*, 136,900; *Kaokoveld*, 3,180; *Okavango*, 14,000. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau The boundaries are the Okavango and Kunene Rivers, in the north, and the Orange River, in the south, all perennial streams of considerable volume. On the Orange are the *Aughrabies Falls*, twice the height of Niagara.

The native races are:—In the South, Hottentots. In the centre, Hereros and Bergdamaras, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the North, Ovambos To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovatyimbas; the only Europeans are those allowed in under permit for the purpose of prospecting for minerals. It is very mountainous, and in many places well supplied with water.

The Administration of the country is vested in the Government of the Union of South Africa by mandate, and is actually exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The seat of Administration is Windhoek, which lies practically in the centre of the country, and is 5,590 ft above sea-level. The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government. The territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The only other harbour which can be made use of is at Luderitz. The power of legislation was formerly vested in the Administrator, but a measure of self-government has now been conferred on the local population. The constitution granted under Union Act No. 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman. The powers of legislation granted exclude the following matters which are permanently reserved to the Union Government:—

(*a*) Native affairs or any matters specially affecting natives, including the imposition of taxation upon the persons, land, habitations or earnings of natives. Whenever any ordinance of the Assembly imposes taxation upon persons, lands, habitations, or incomes or earnings generally, natives and their lands, habitations and earnings shall be exempt from its provisions;

(*b*) Mines, minerals, mineral oils and precious stones; or the moneys derivable therefrom or payable to the administration in respect of licences for prospecting or winning the same or as share of the produce thereof or any taxation in connection therewith;

(*c*) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of employment of and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harbours administration,

(*d*) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory and the payment of pensions, retiring allowances and financial benefits to such persons;

(*e*) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the practice or procedure to be observed therein;

(*f*) The administration, management and working of the postal, telegraph and telephone services;

(*g*) The establishment or control of any military organization in the territory;

(*h*) The movements or operations of any unit of the South African Defence Forces within the territory;

(*i*) The entry of immigrants into the territory or of other persons;

(*j*) Tariffs of customs and excise duties and the control and management of customs and excise;

(*k*) Currency and banking and the control of banking institutions.

The following matters are reserved for a period of three years, after which period the Assembly may by resolution assume control thereof:—

(*a*) The establishment or control of any police force in the territory;

(*b*) Civil aviation;

(*c*) Primary or secondary education in schools supported or aided from the revenues of the territory;

(*d*) The establishment, management or control of any land or agricultural bank in the territory;

(*e*) The allotment, sale, lease or disposal of Government lands in the territory

In regard to finance, the Assembly may not initiate any ordinance imposing taxation unless recommended to it by the Administrator.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 343 miles), comprises Union Lines 363 miles, S W. Territory Lines 1,352 miles and privately owned Lines 74 miles, a total of 1,789 miles.

The Capital of the Protectorate is Windhoek (Urban white population, 1926, 3,809), other inland towns being Keetmanshoop (Urban white population, 1926, 1,159), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otjiwarongo, Outjo, Rehoboth, Warmbad and Maltahohe. The ports are Walvis Bay (Urban white population, 1926, 662) and Lüderitz Bay (Urban white population, 1926, 1,234).
